

A contour plot on a square domain with a light blue background. The plot features a central orange region, which is irregular and elongated towards the bottom-left corner. This central region is surrounded by concentric, roughly rectangular contour lines that transition through yellow and green as they move outwards. The contours are more densely packed on the right side of the central region. A white rectangular box is centered over the plot, containing the title and date.

100 random blobs

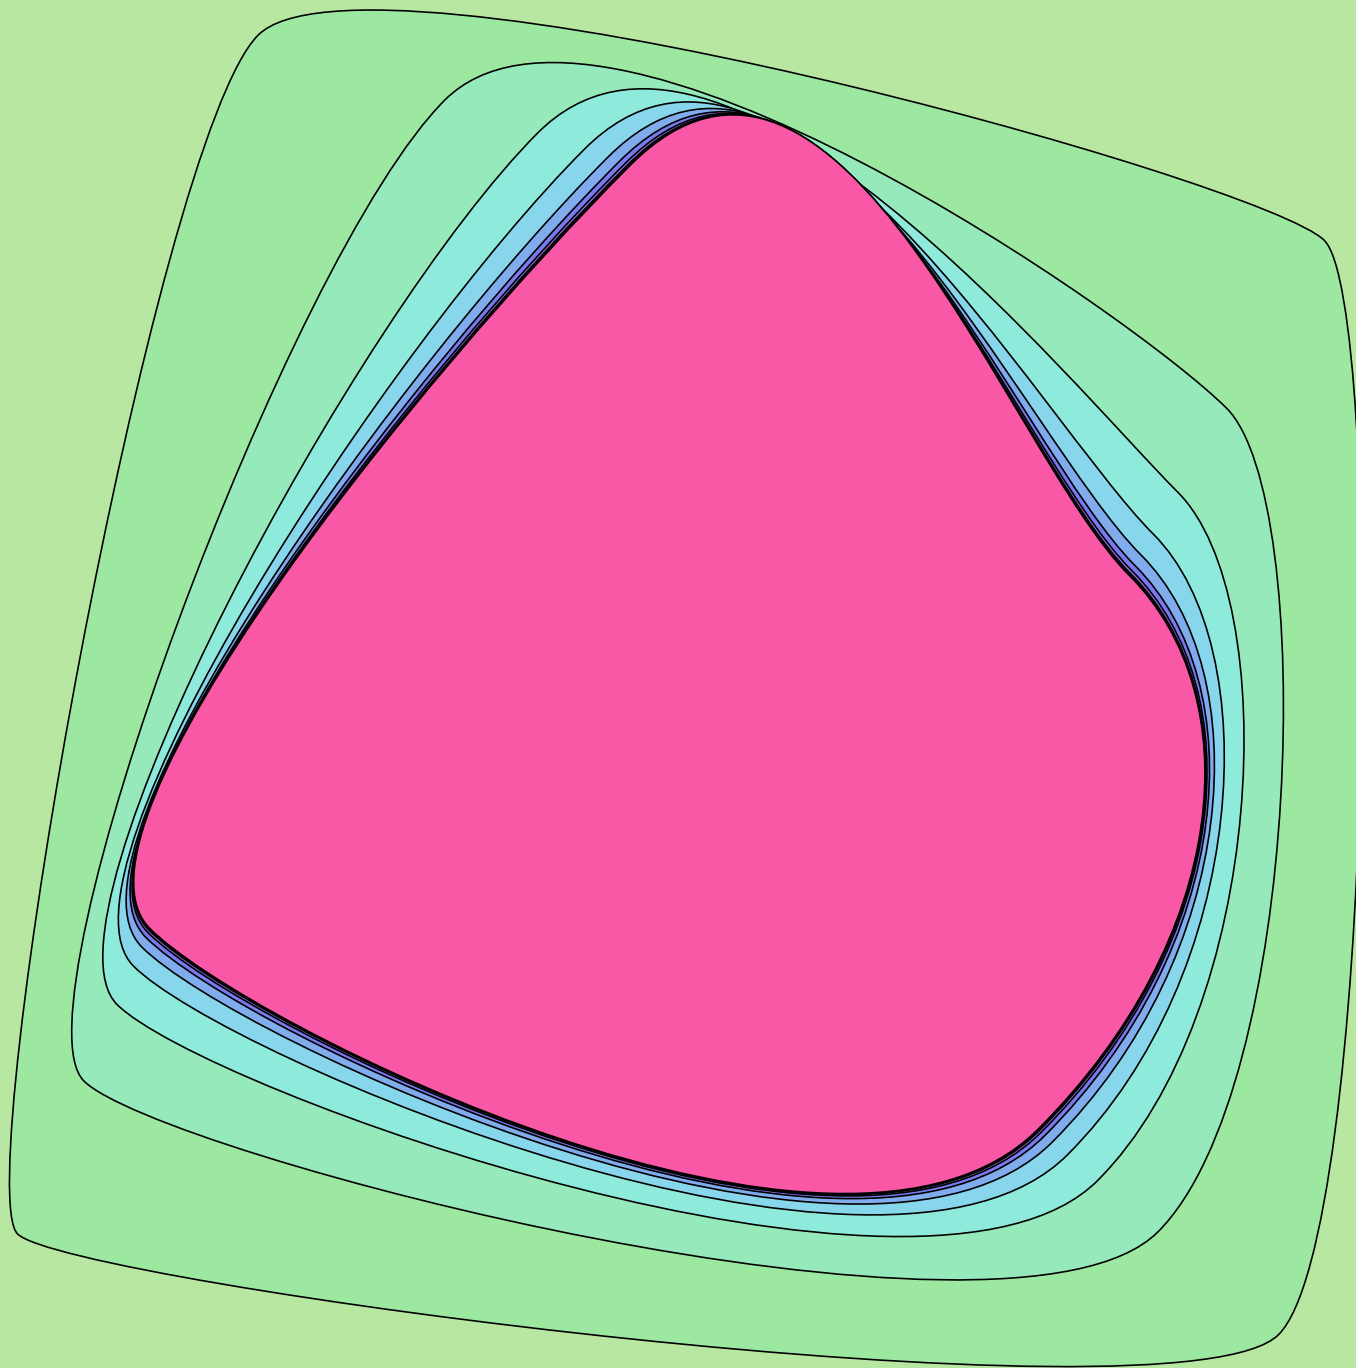

December the 18th, 2015 — Vasilis van Gemert

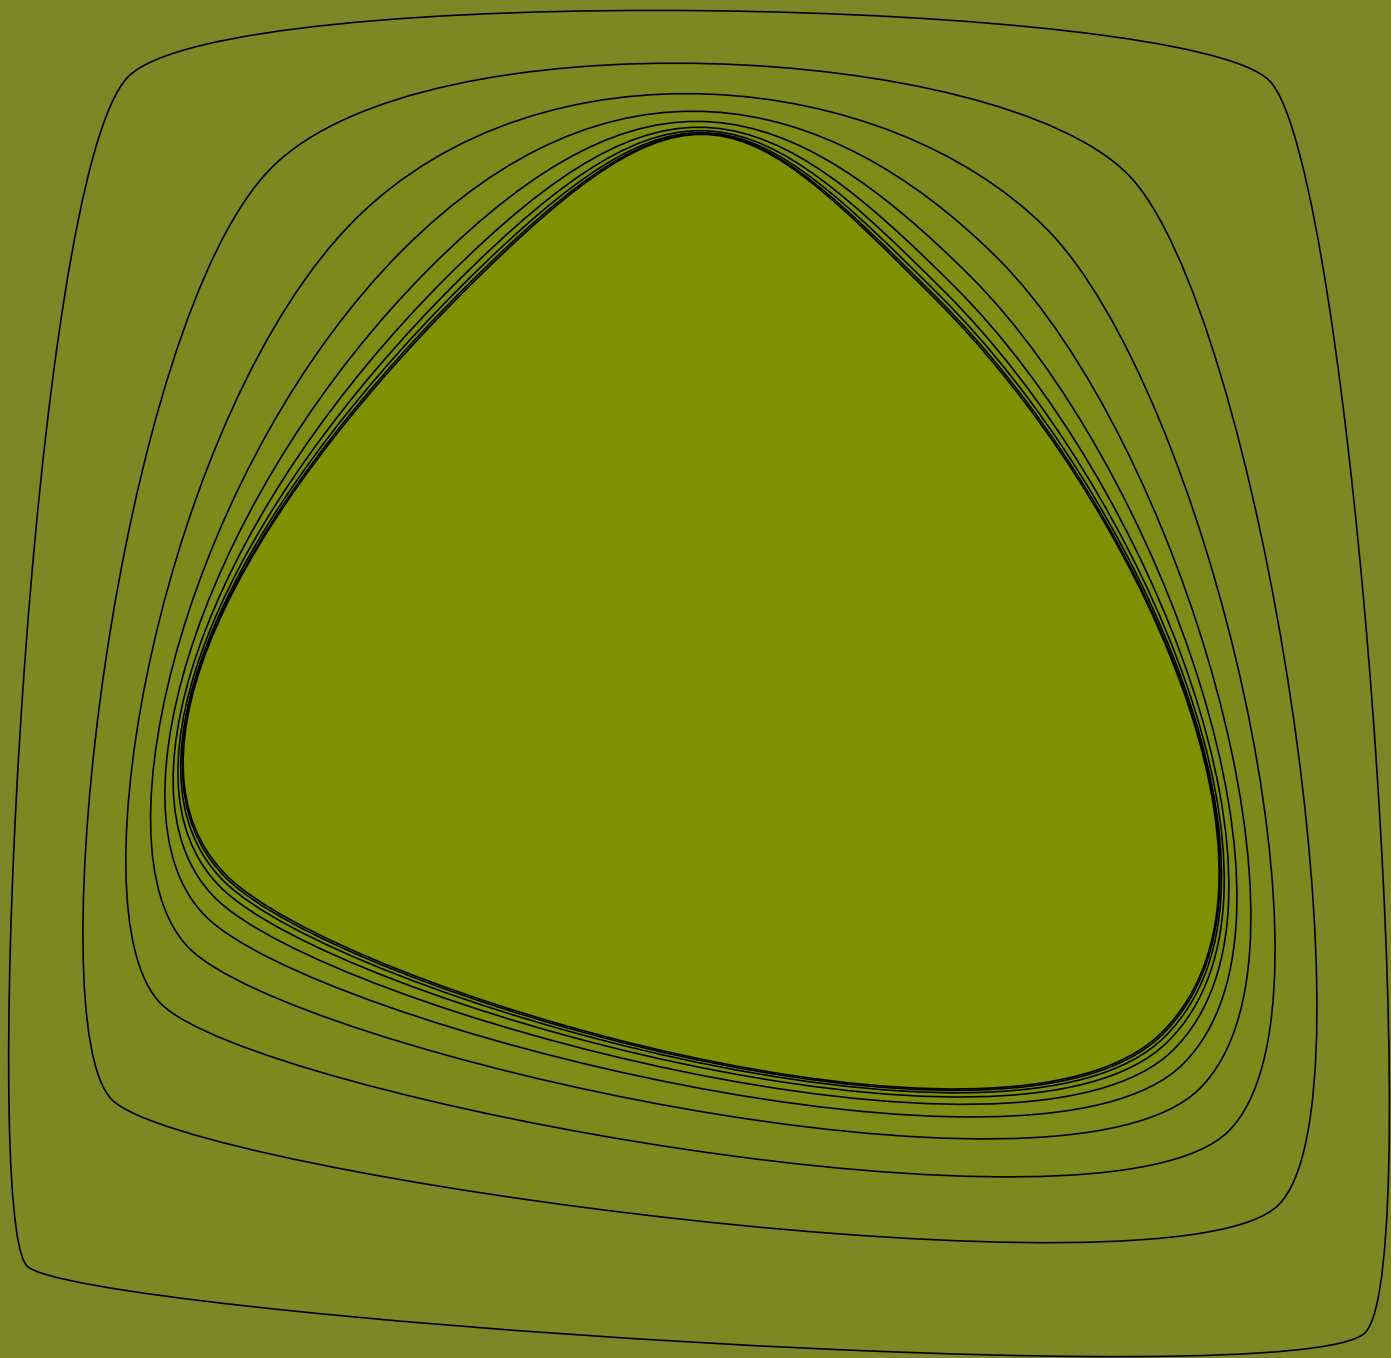

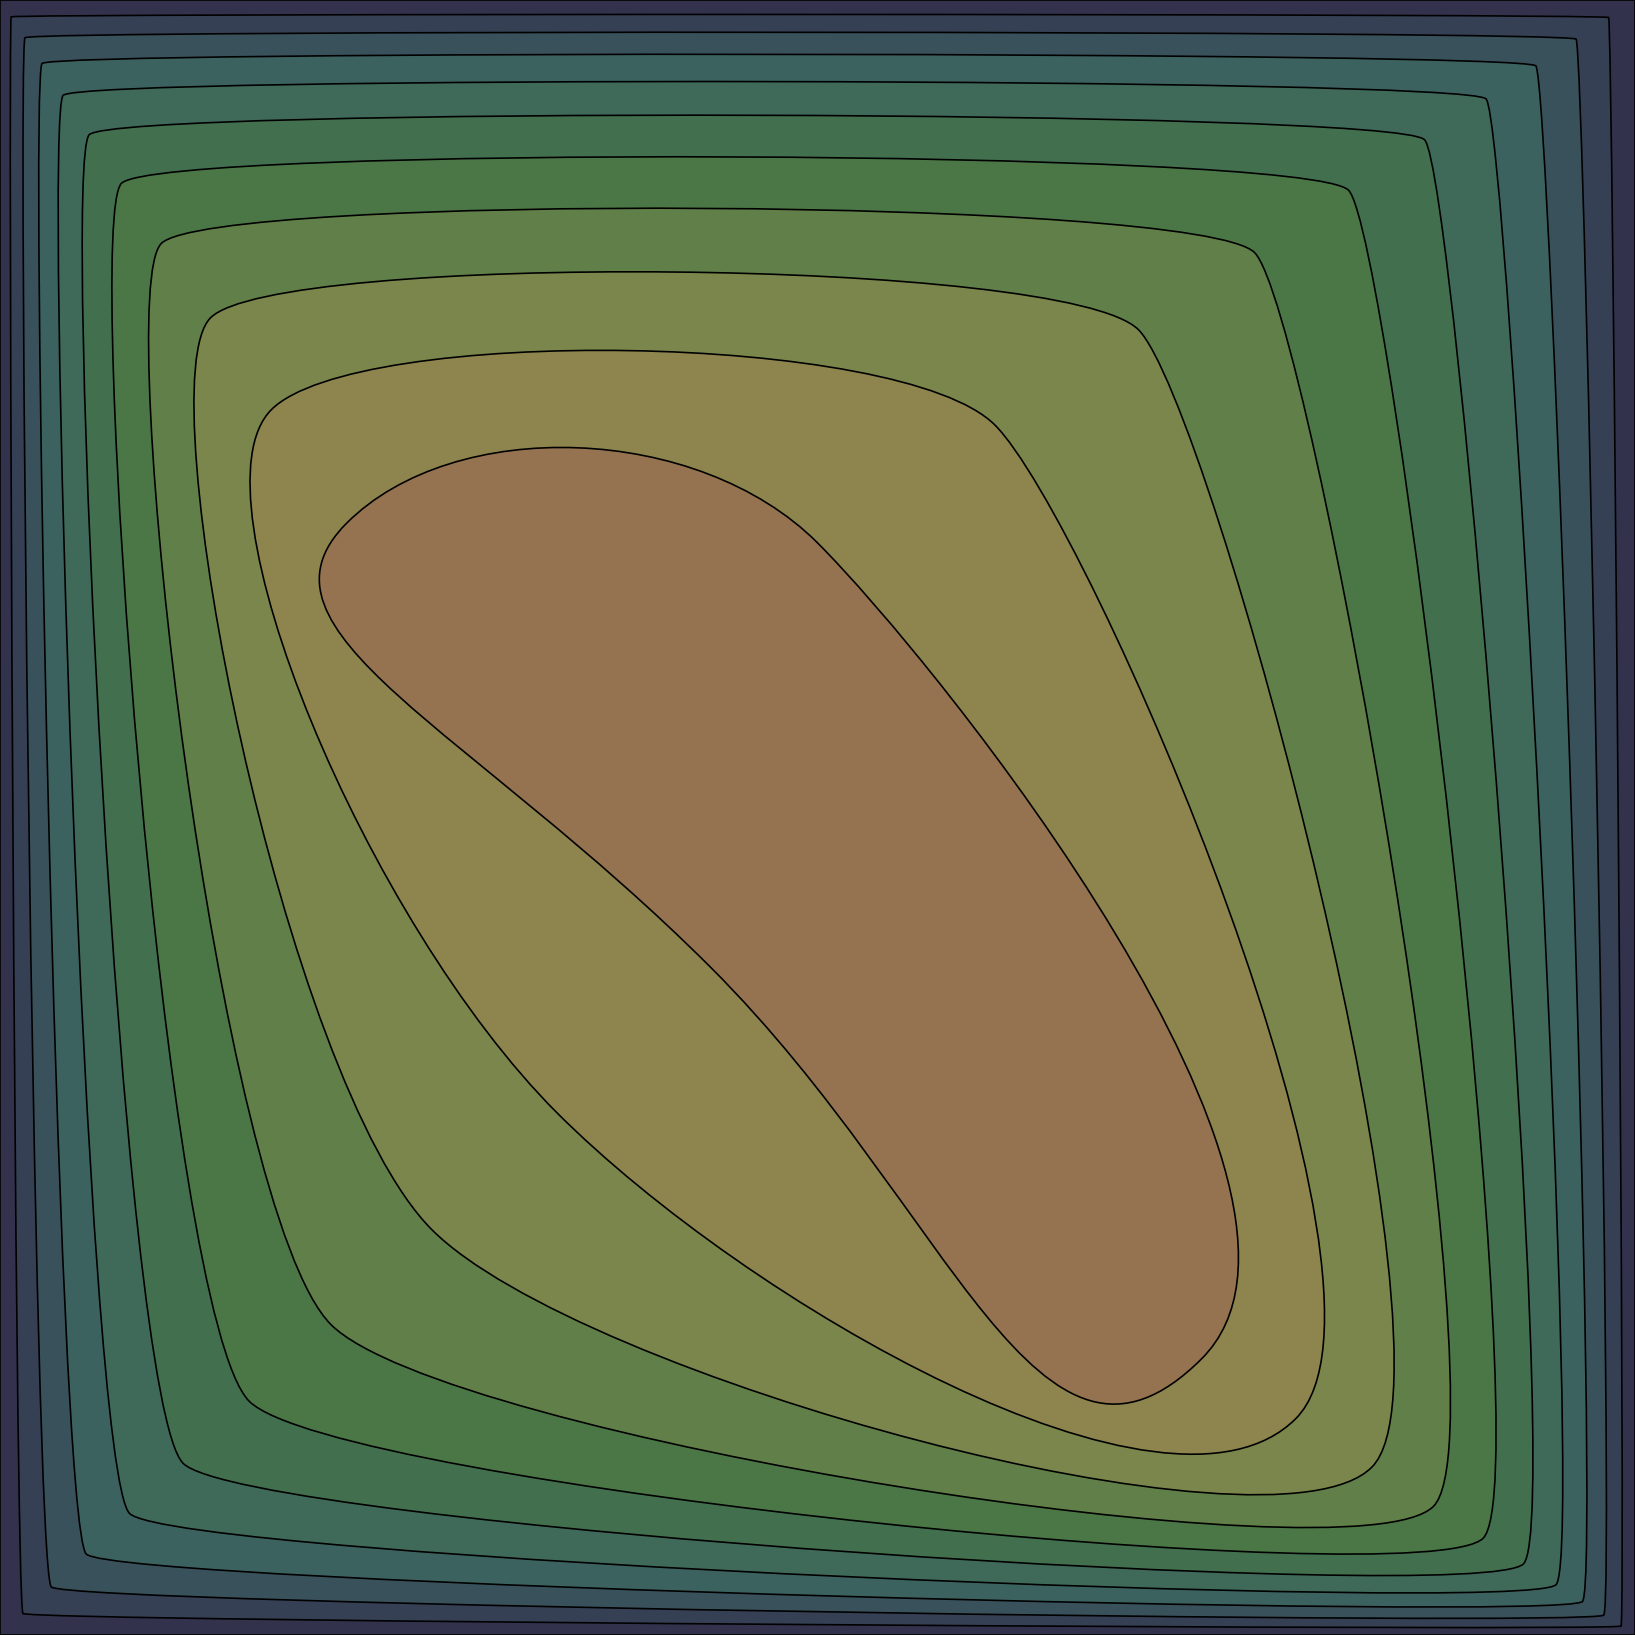

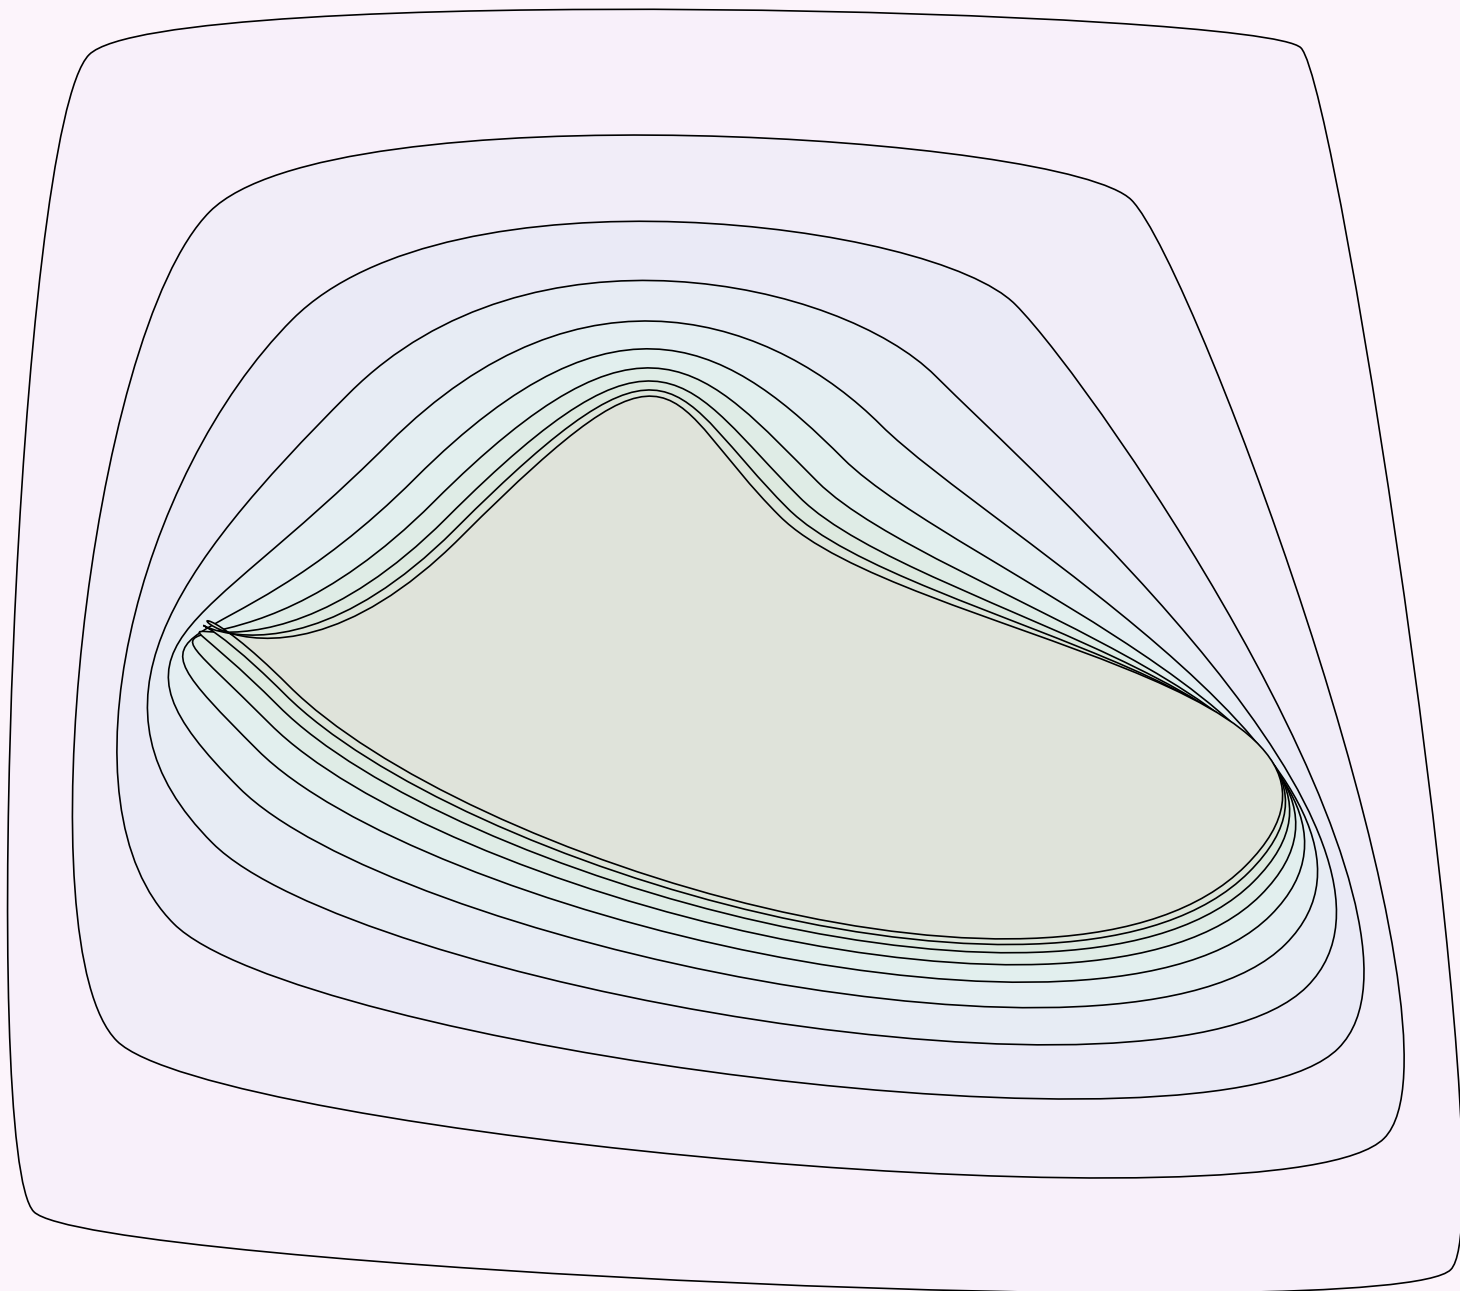

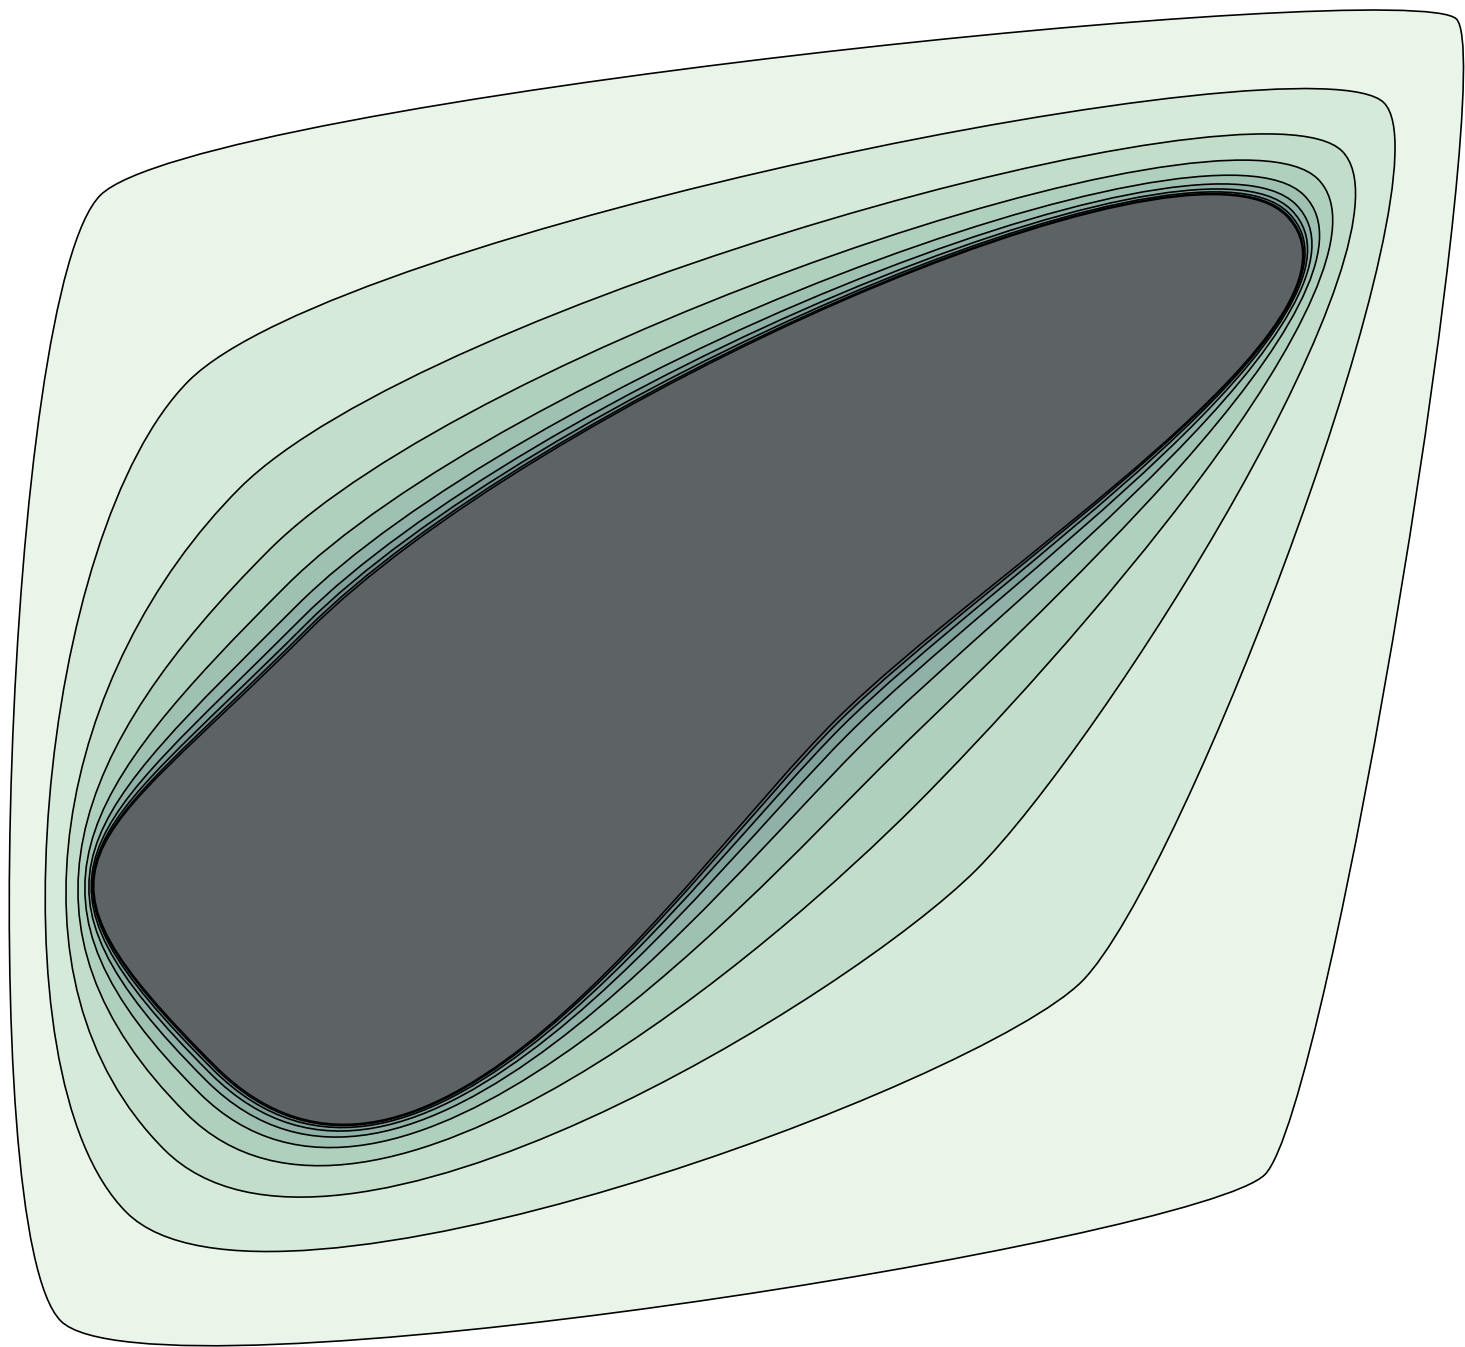

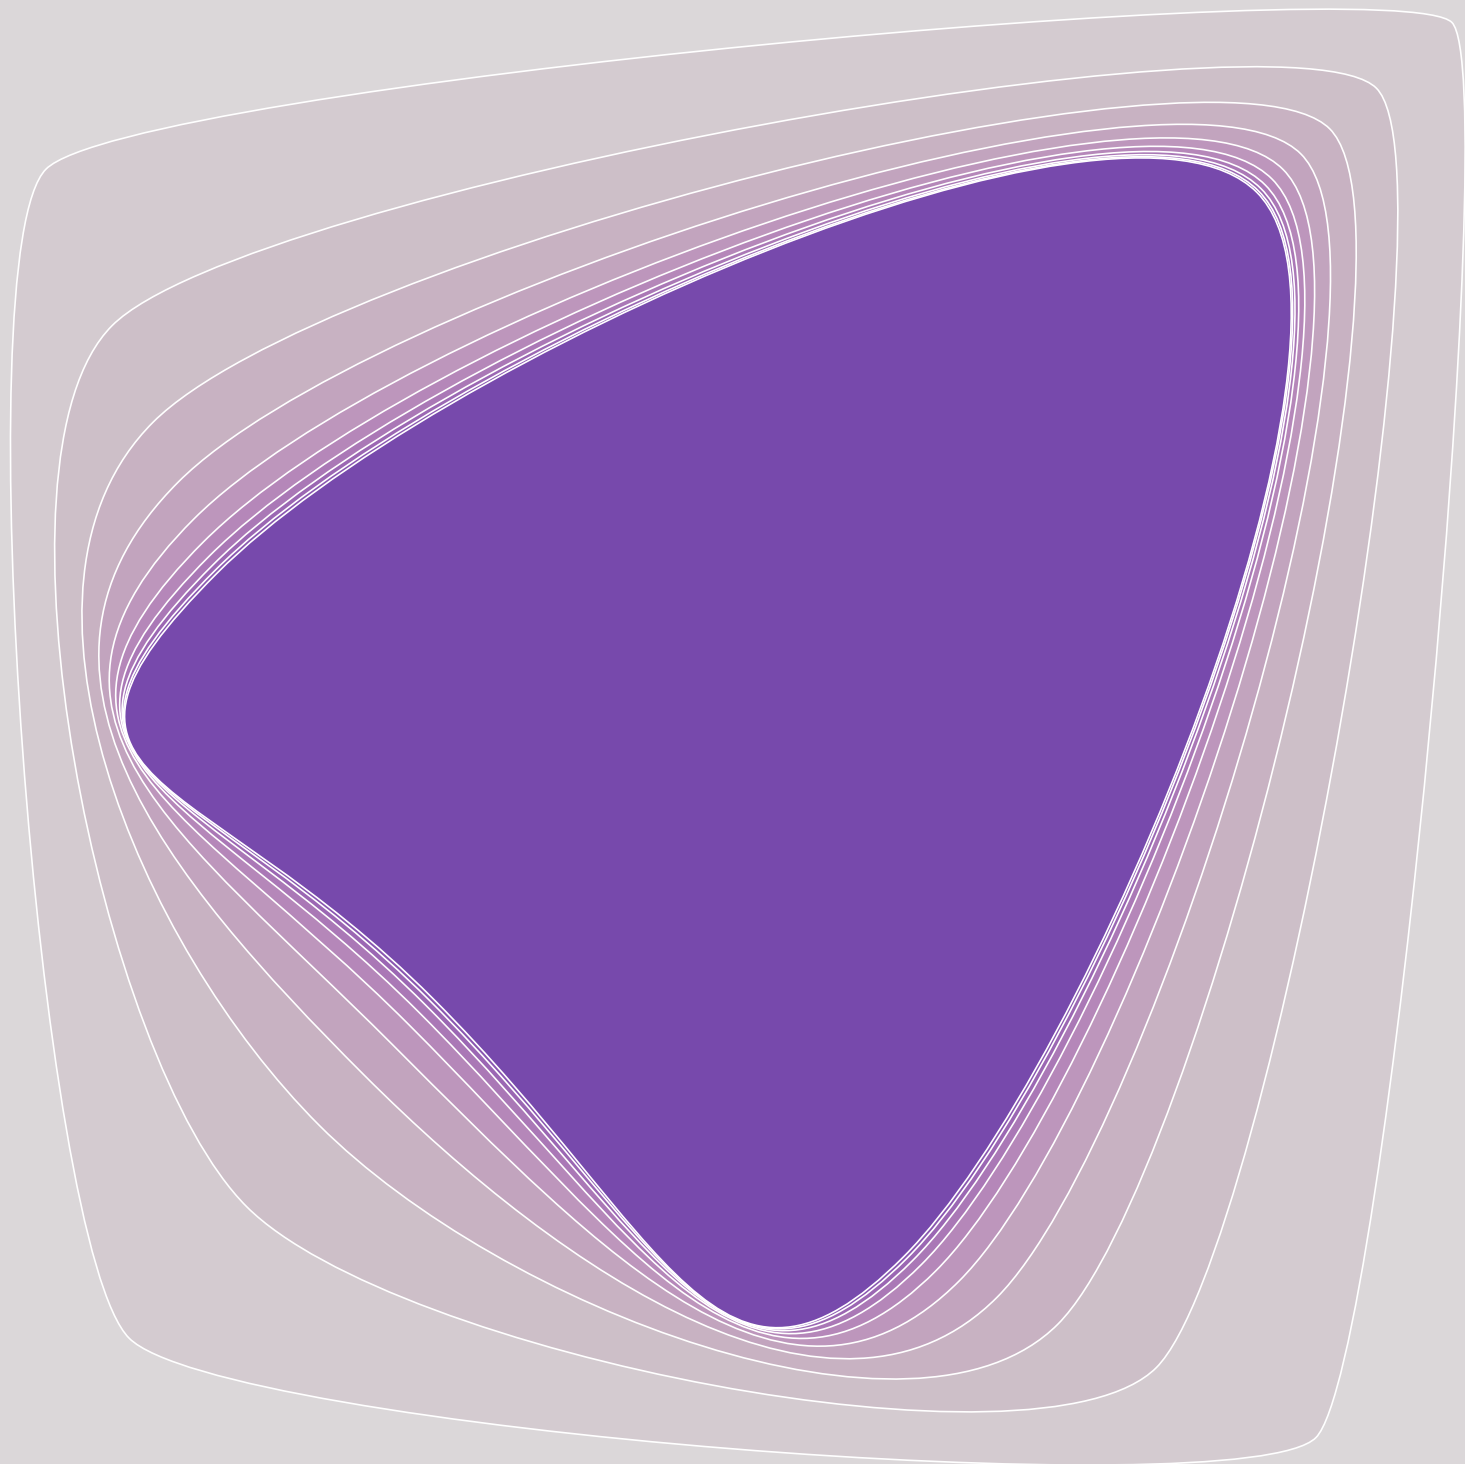

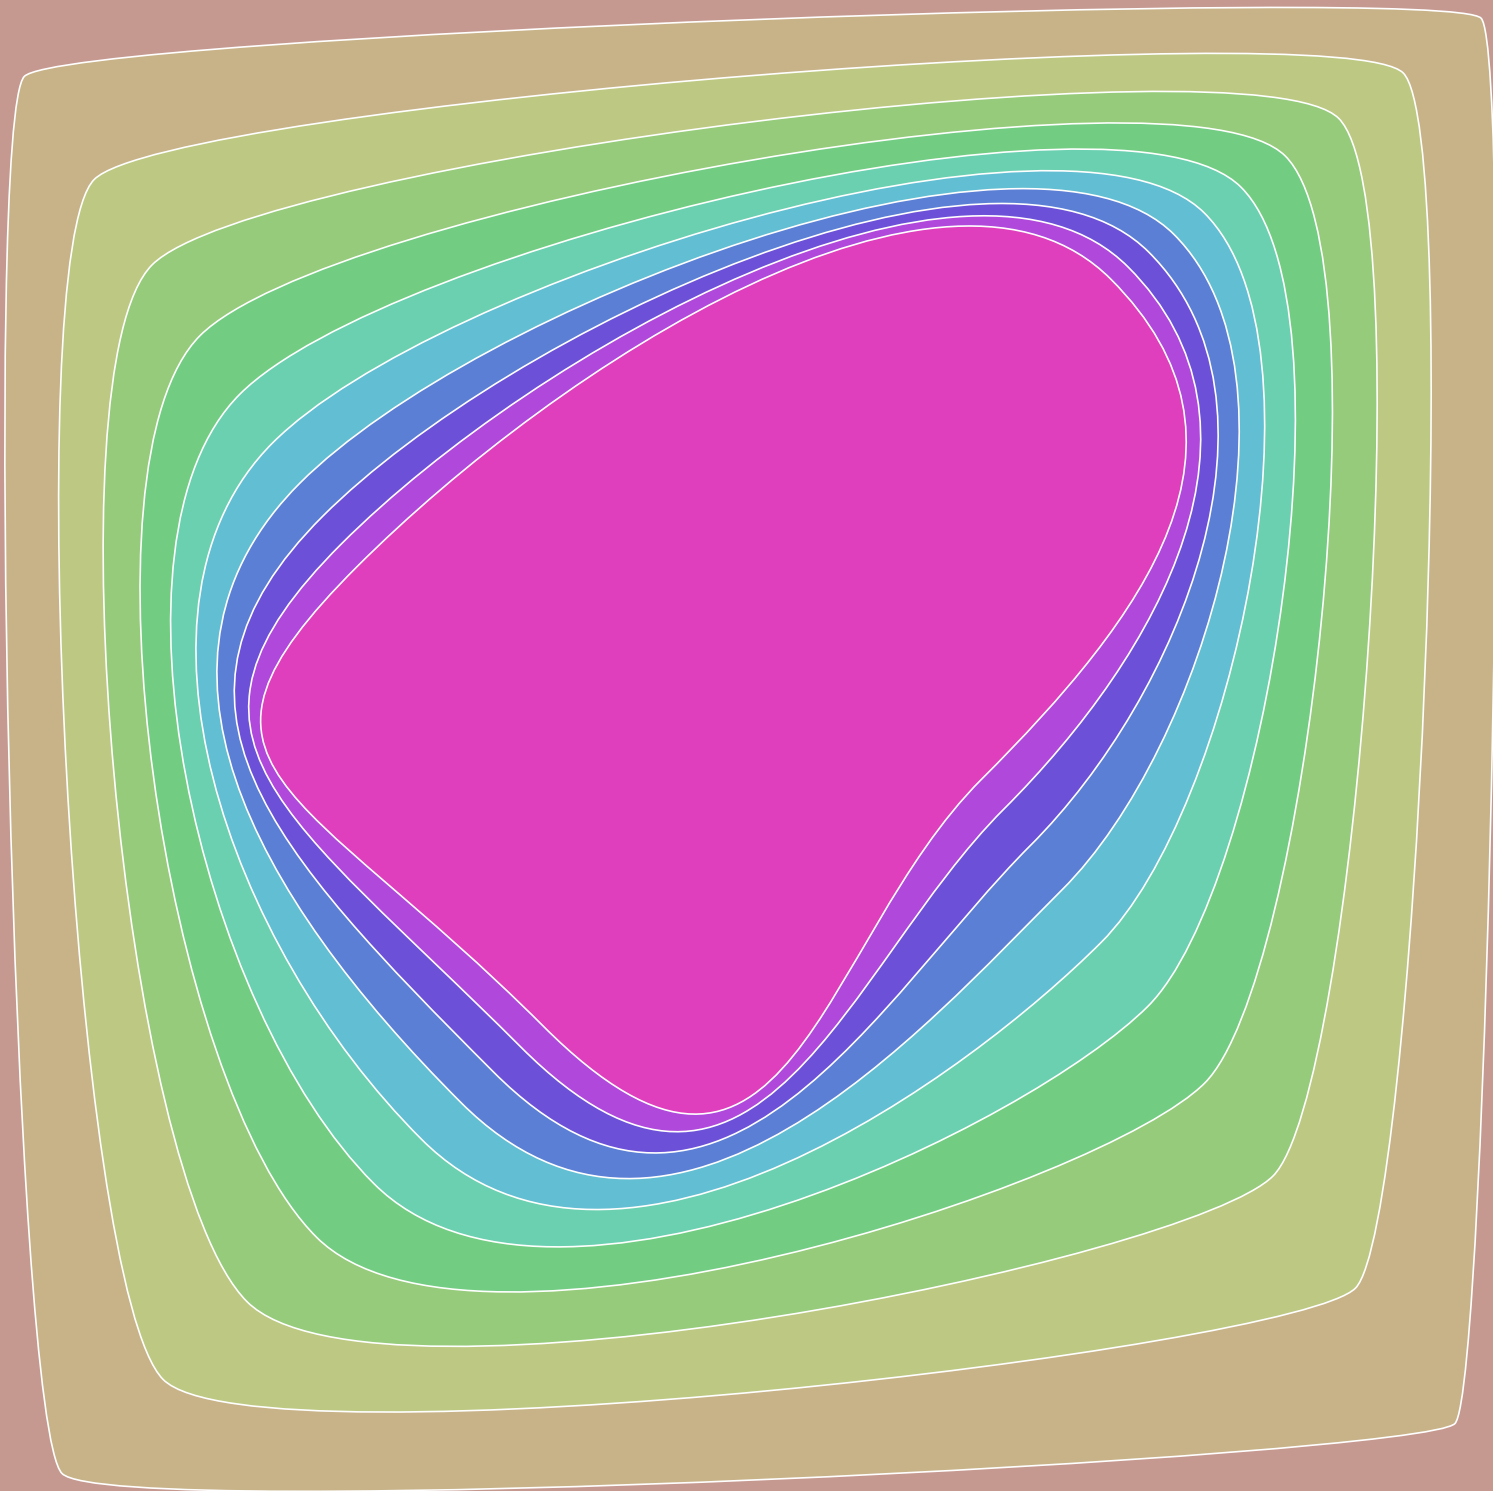

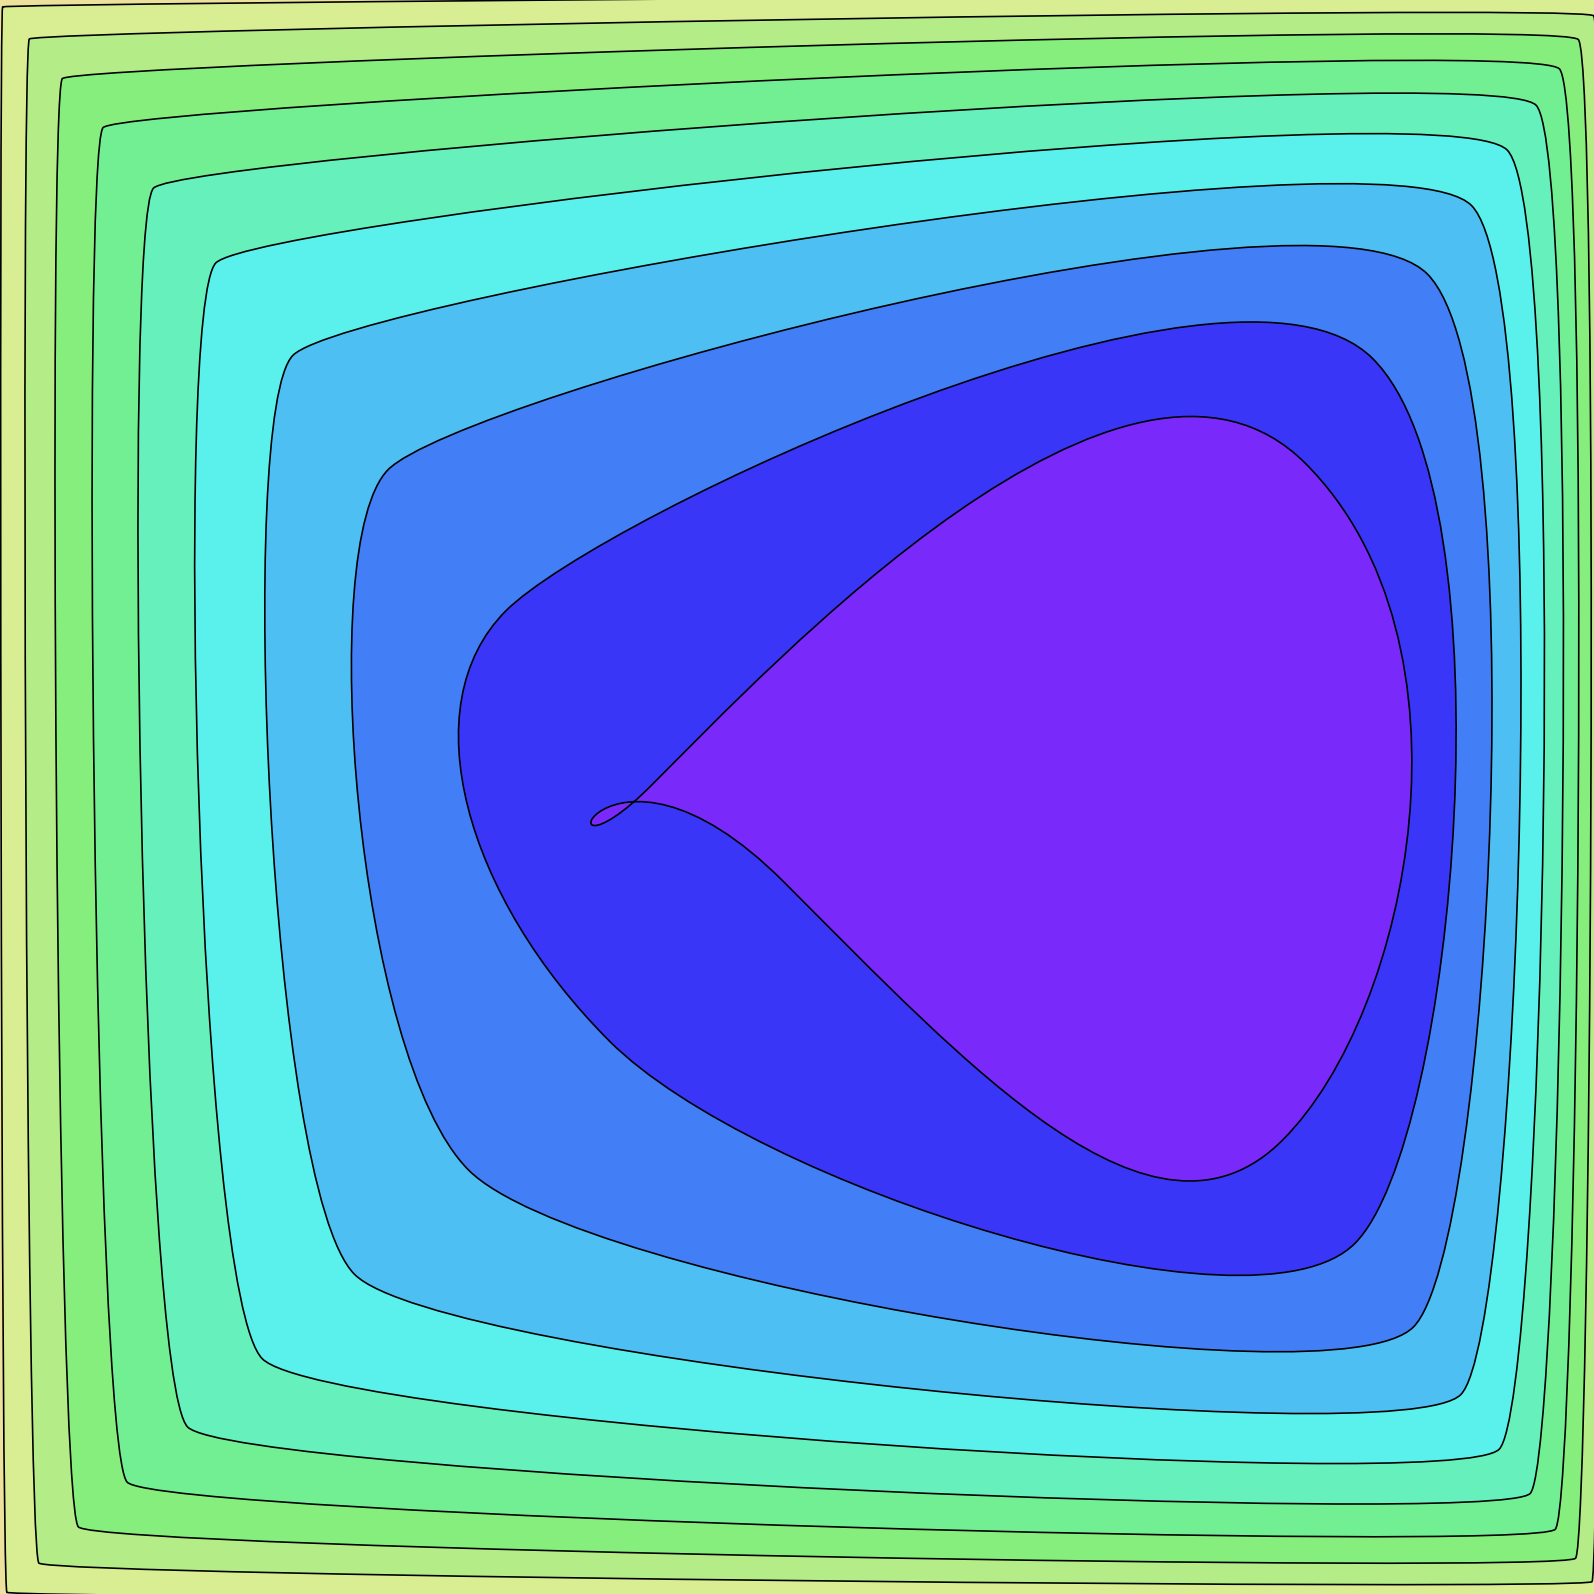

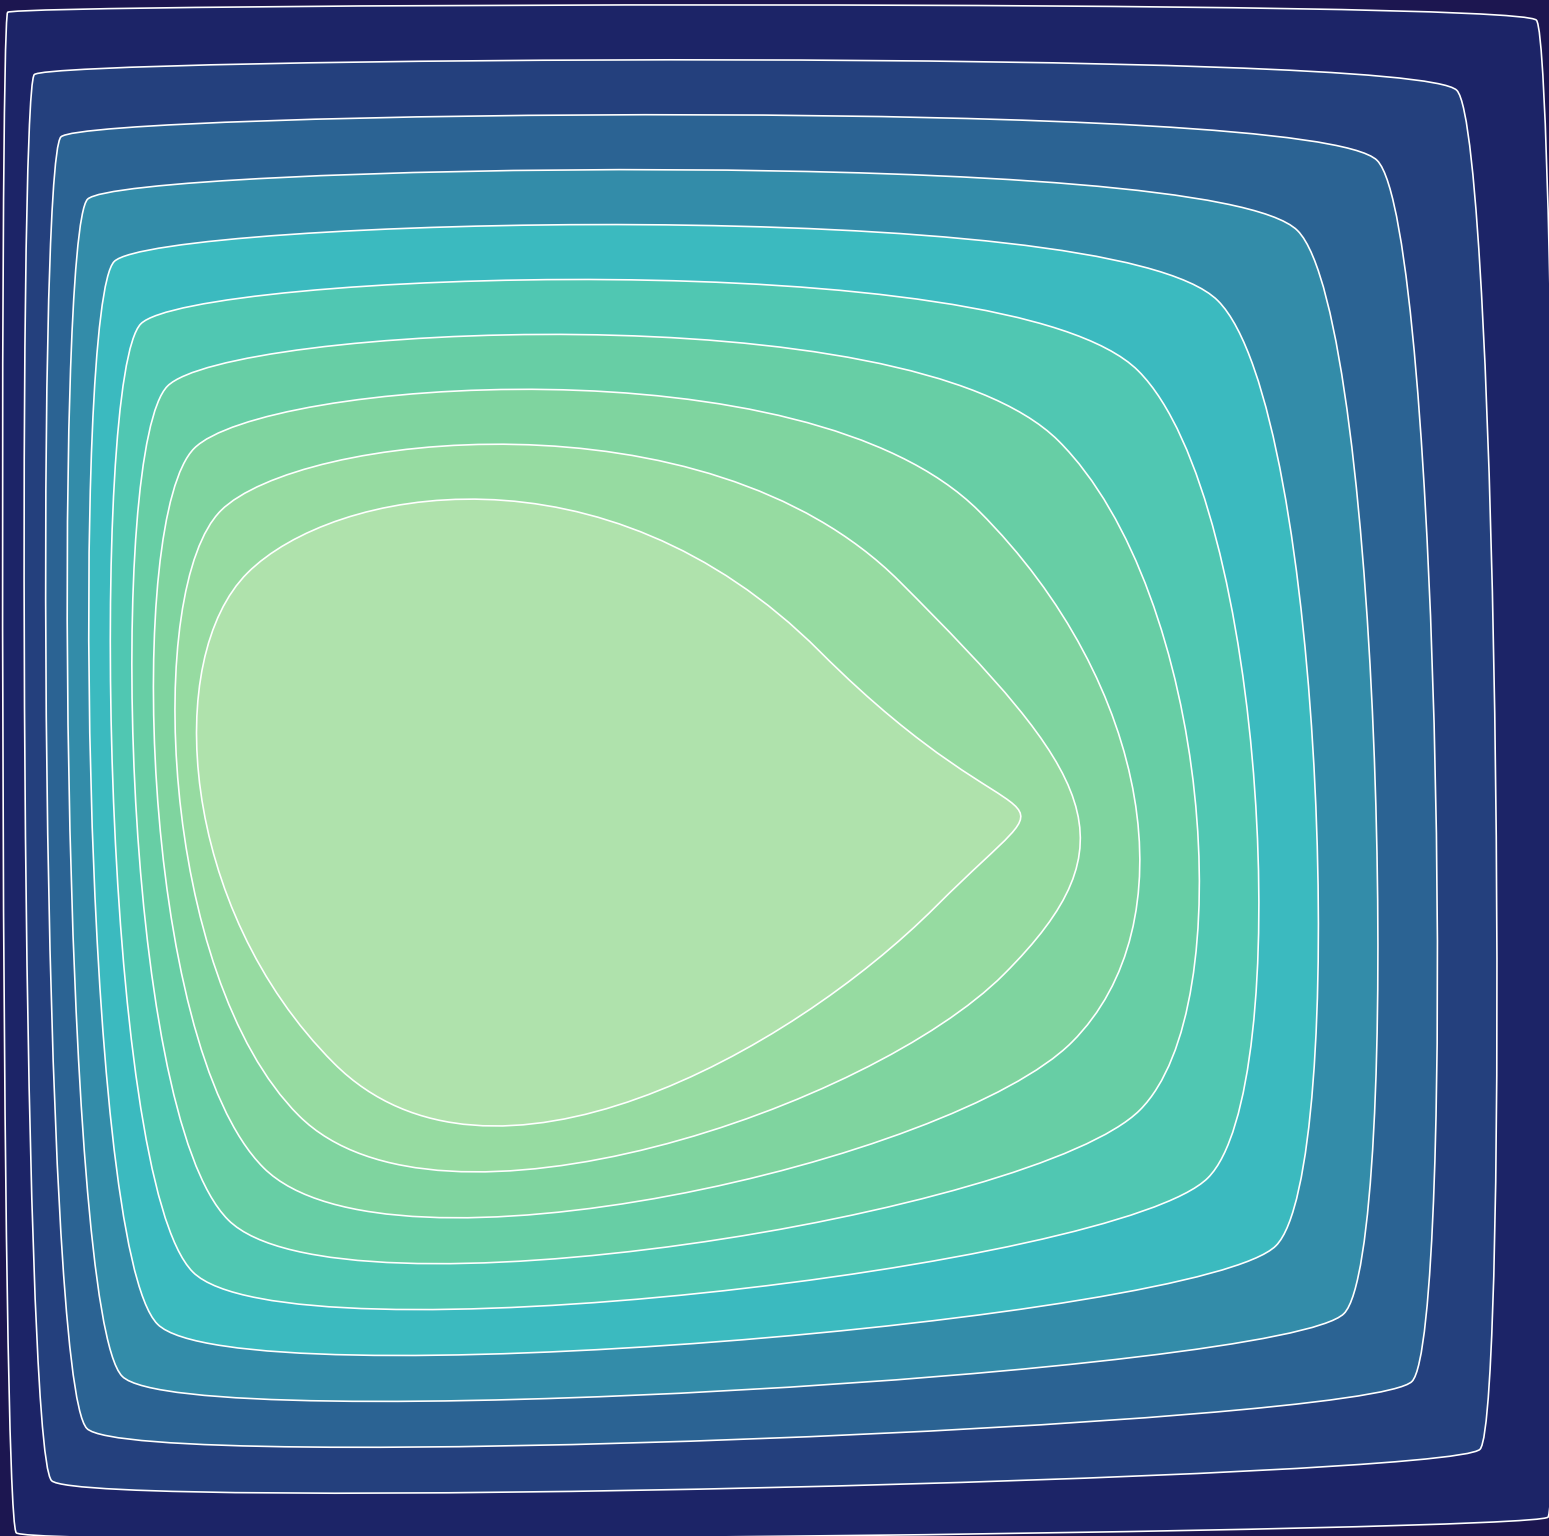

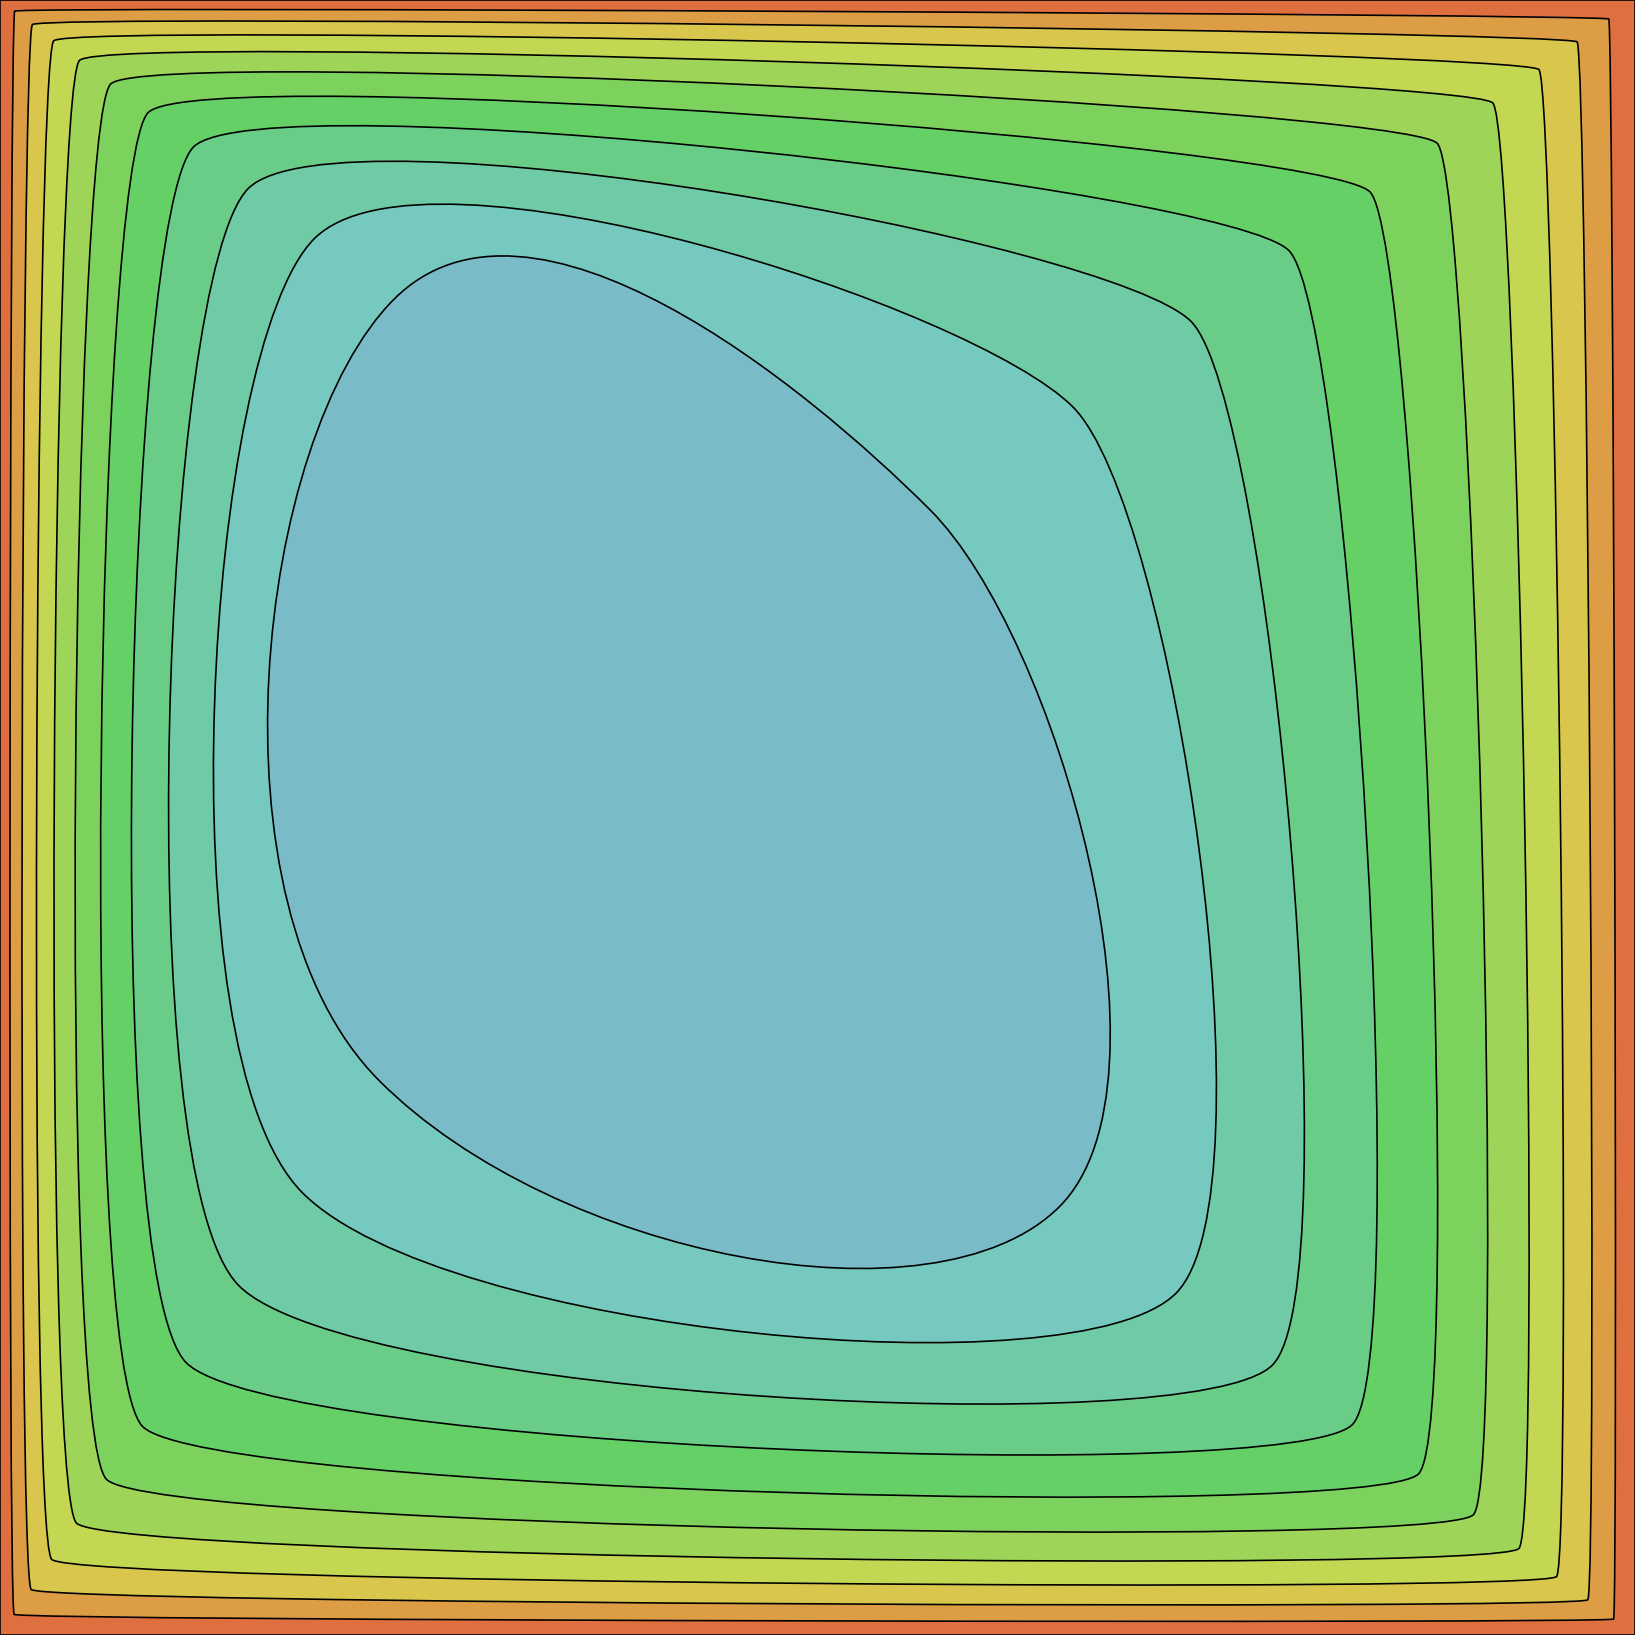

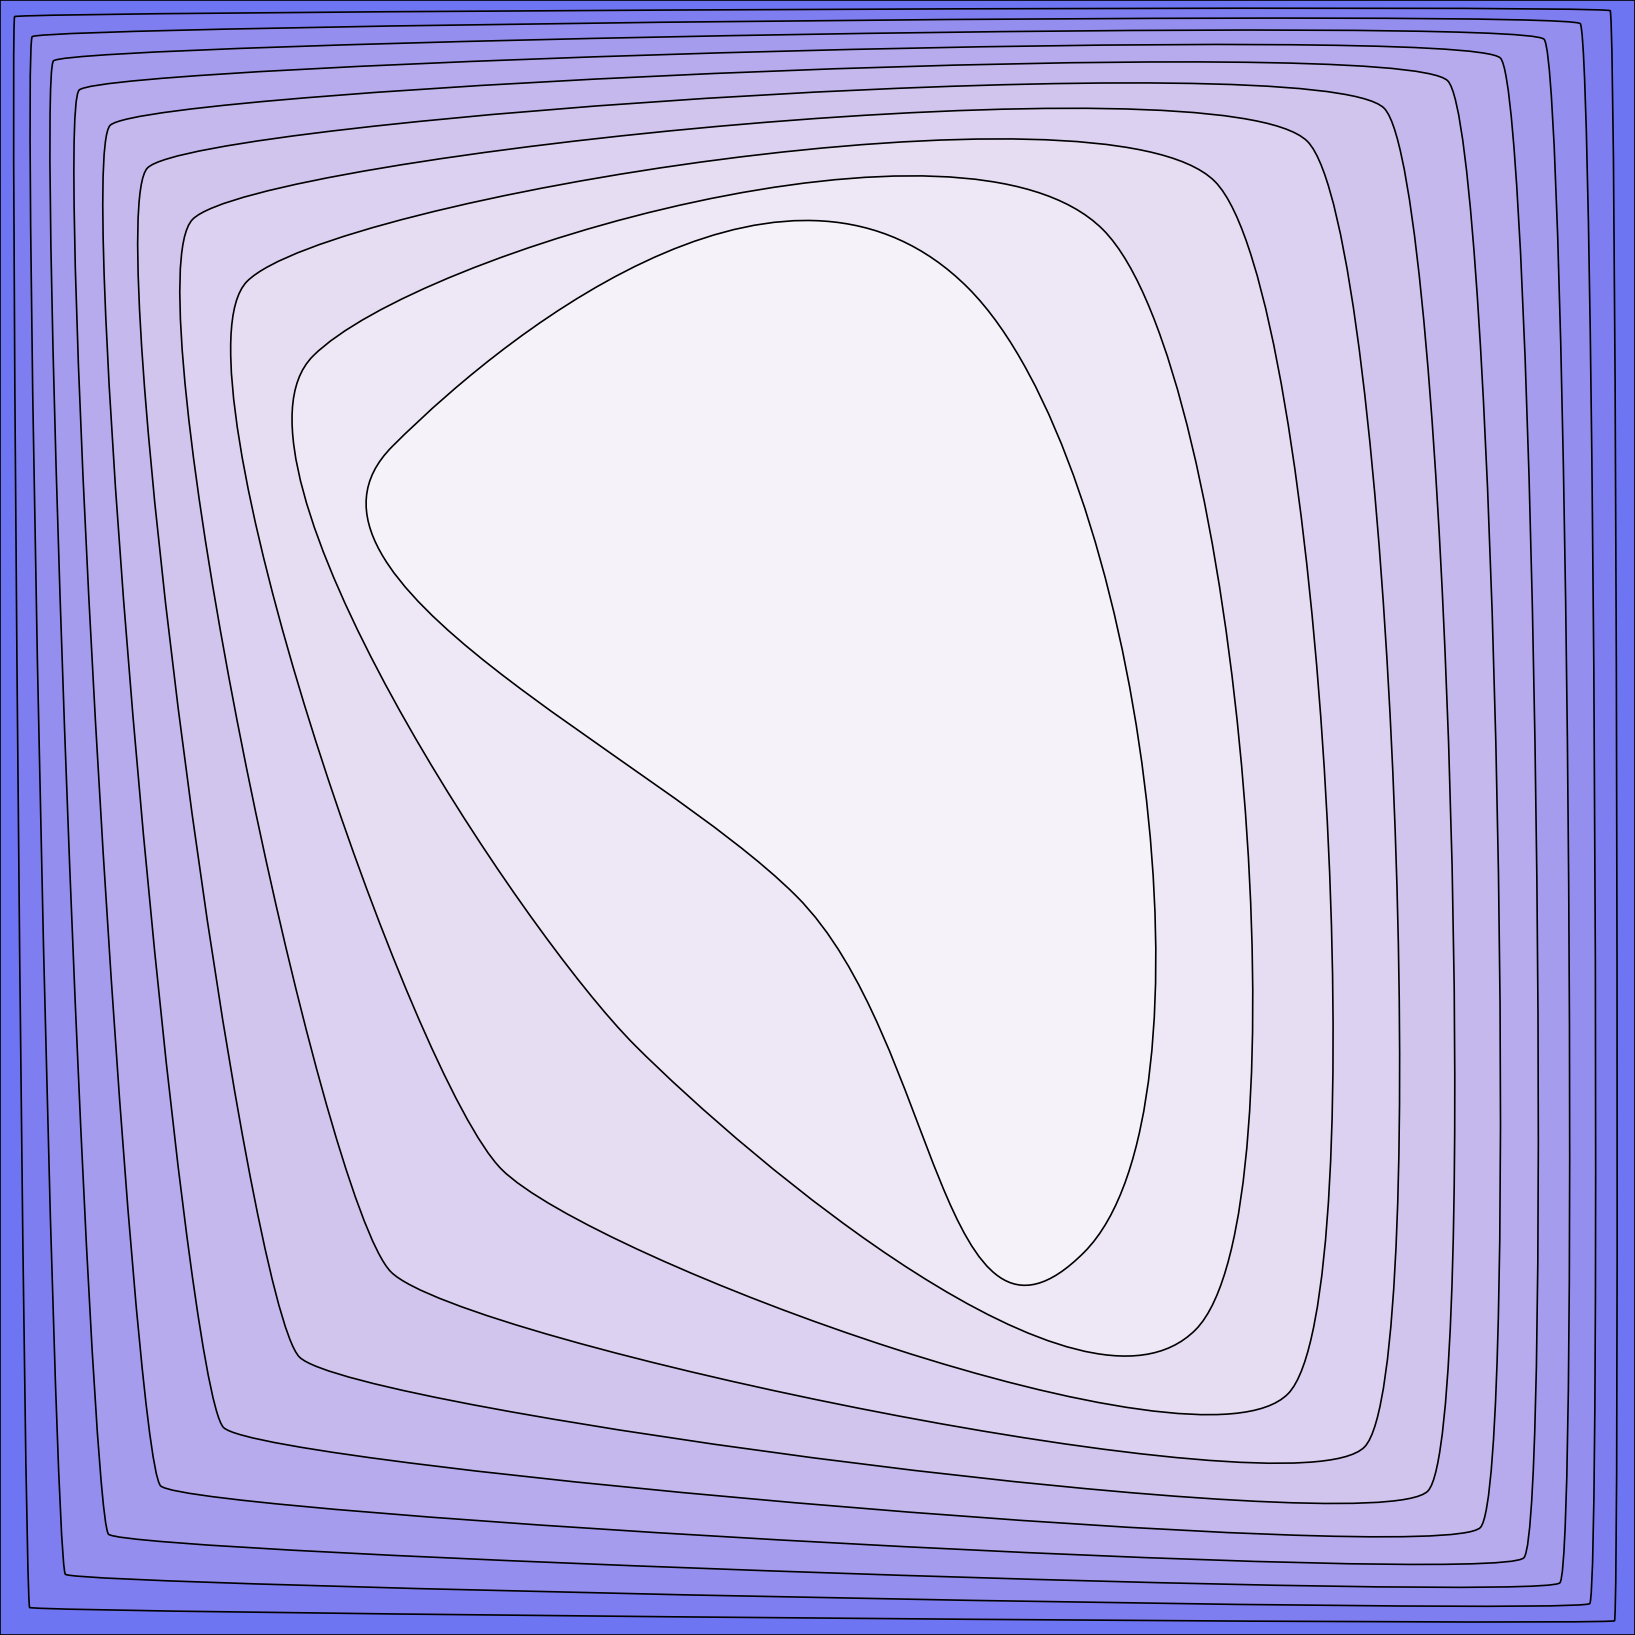

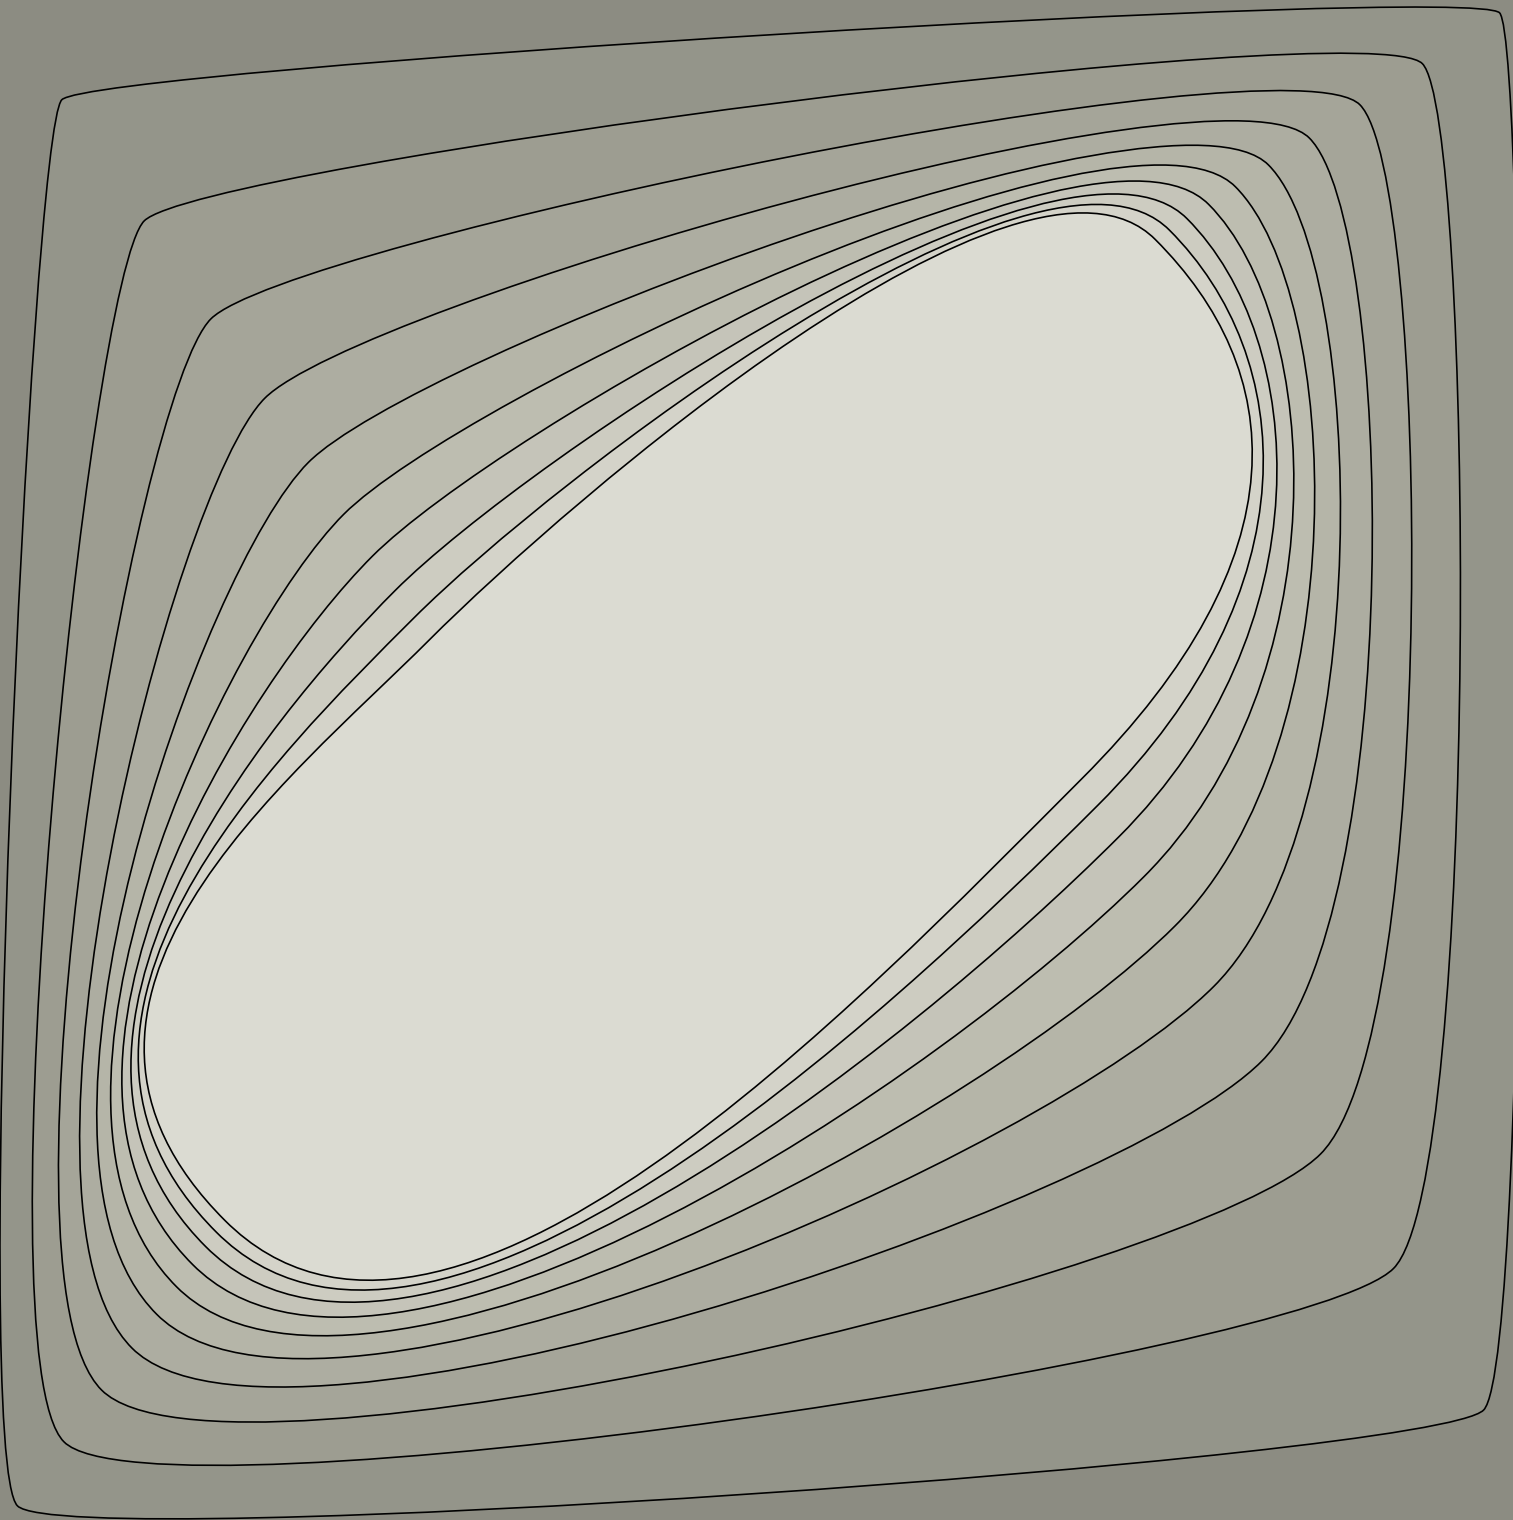

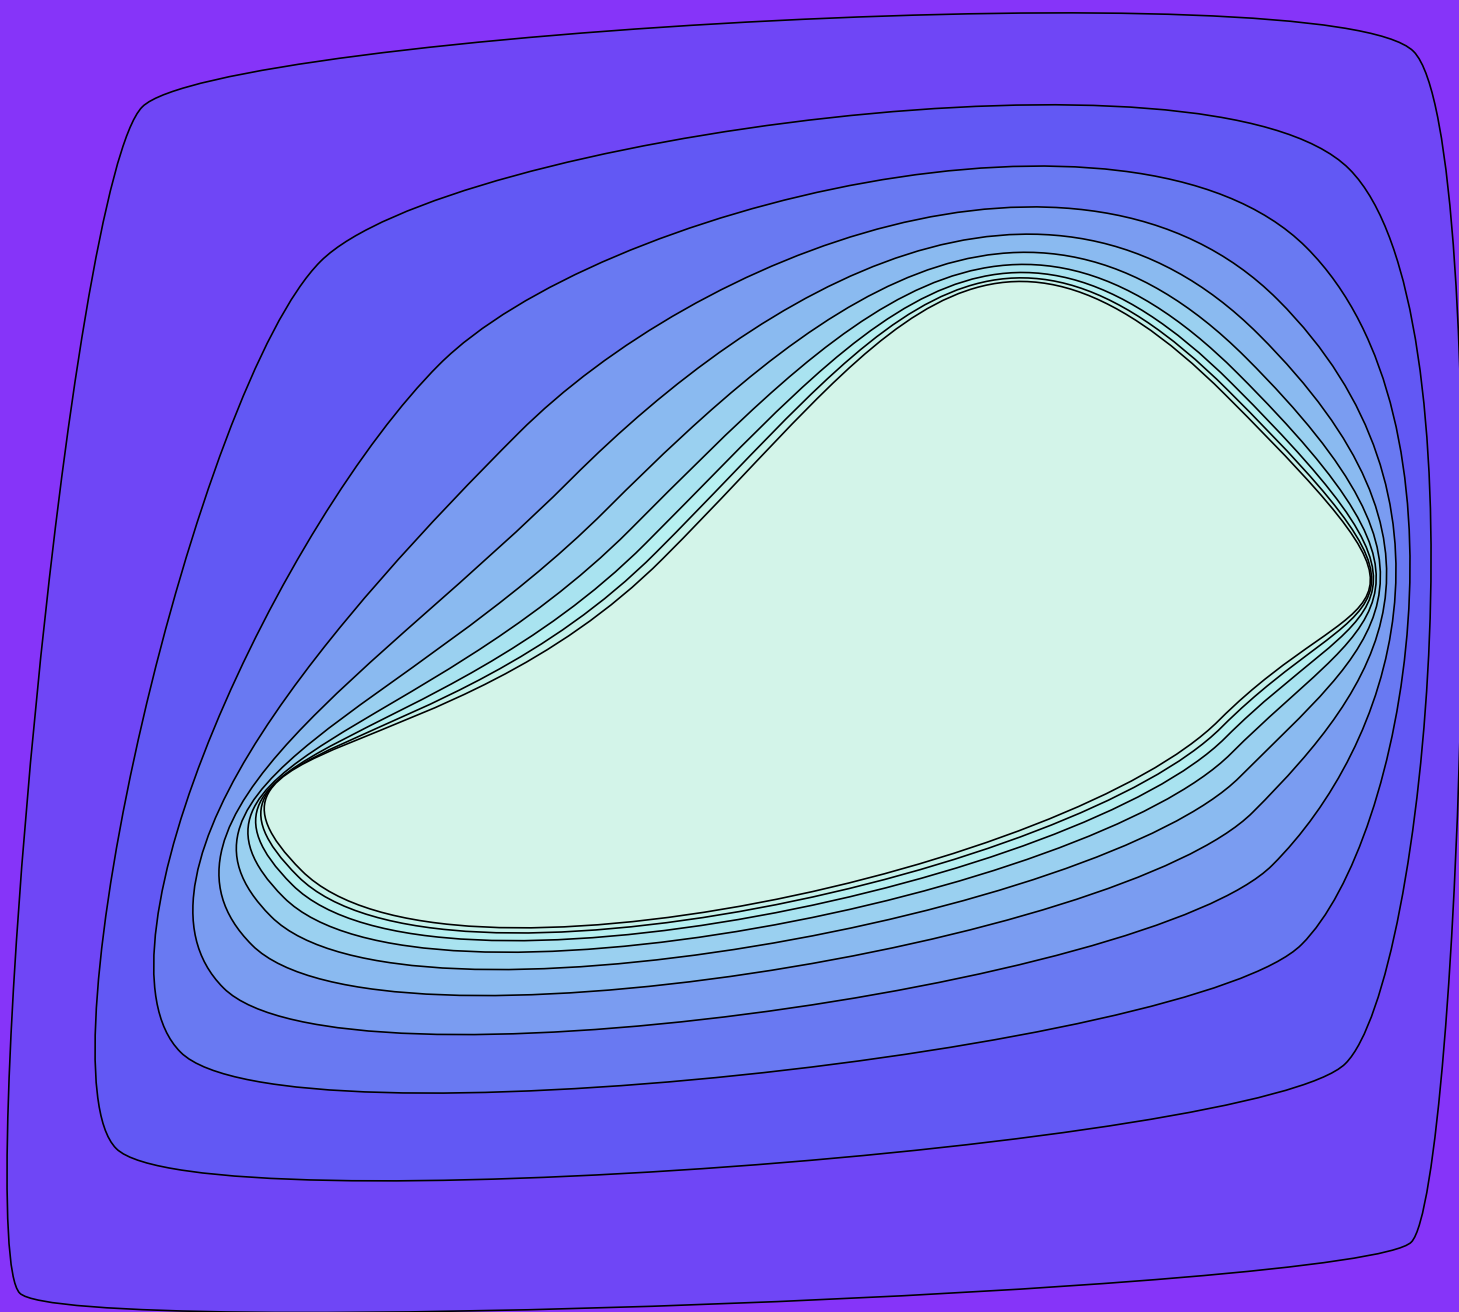

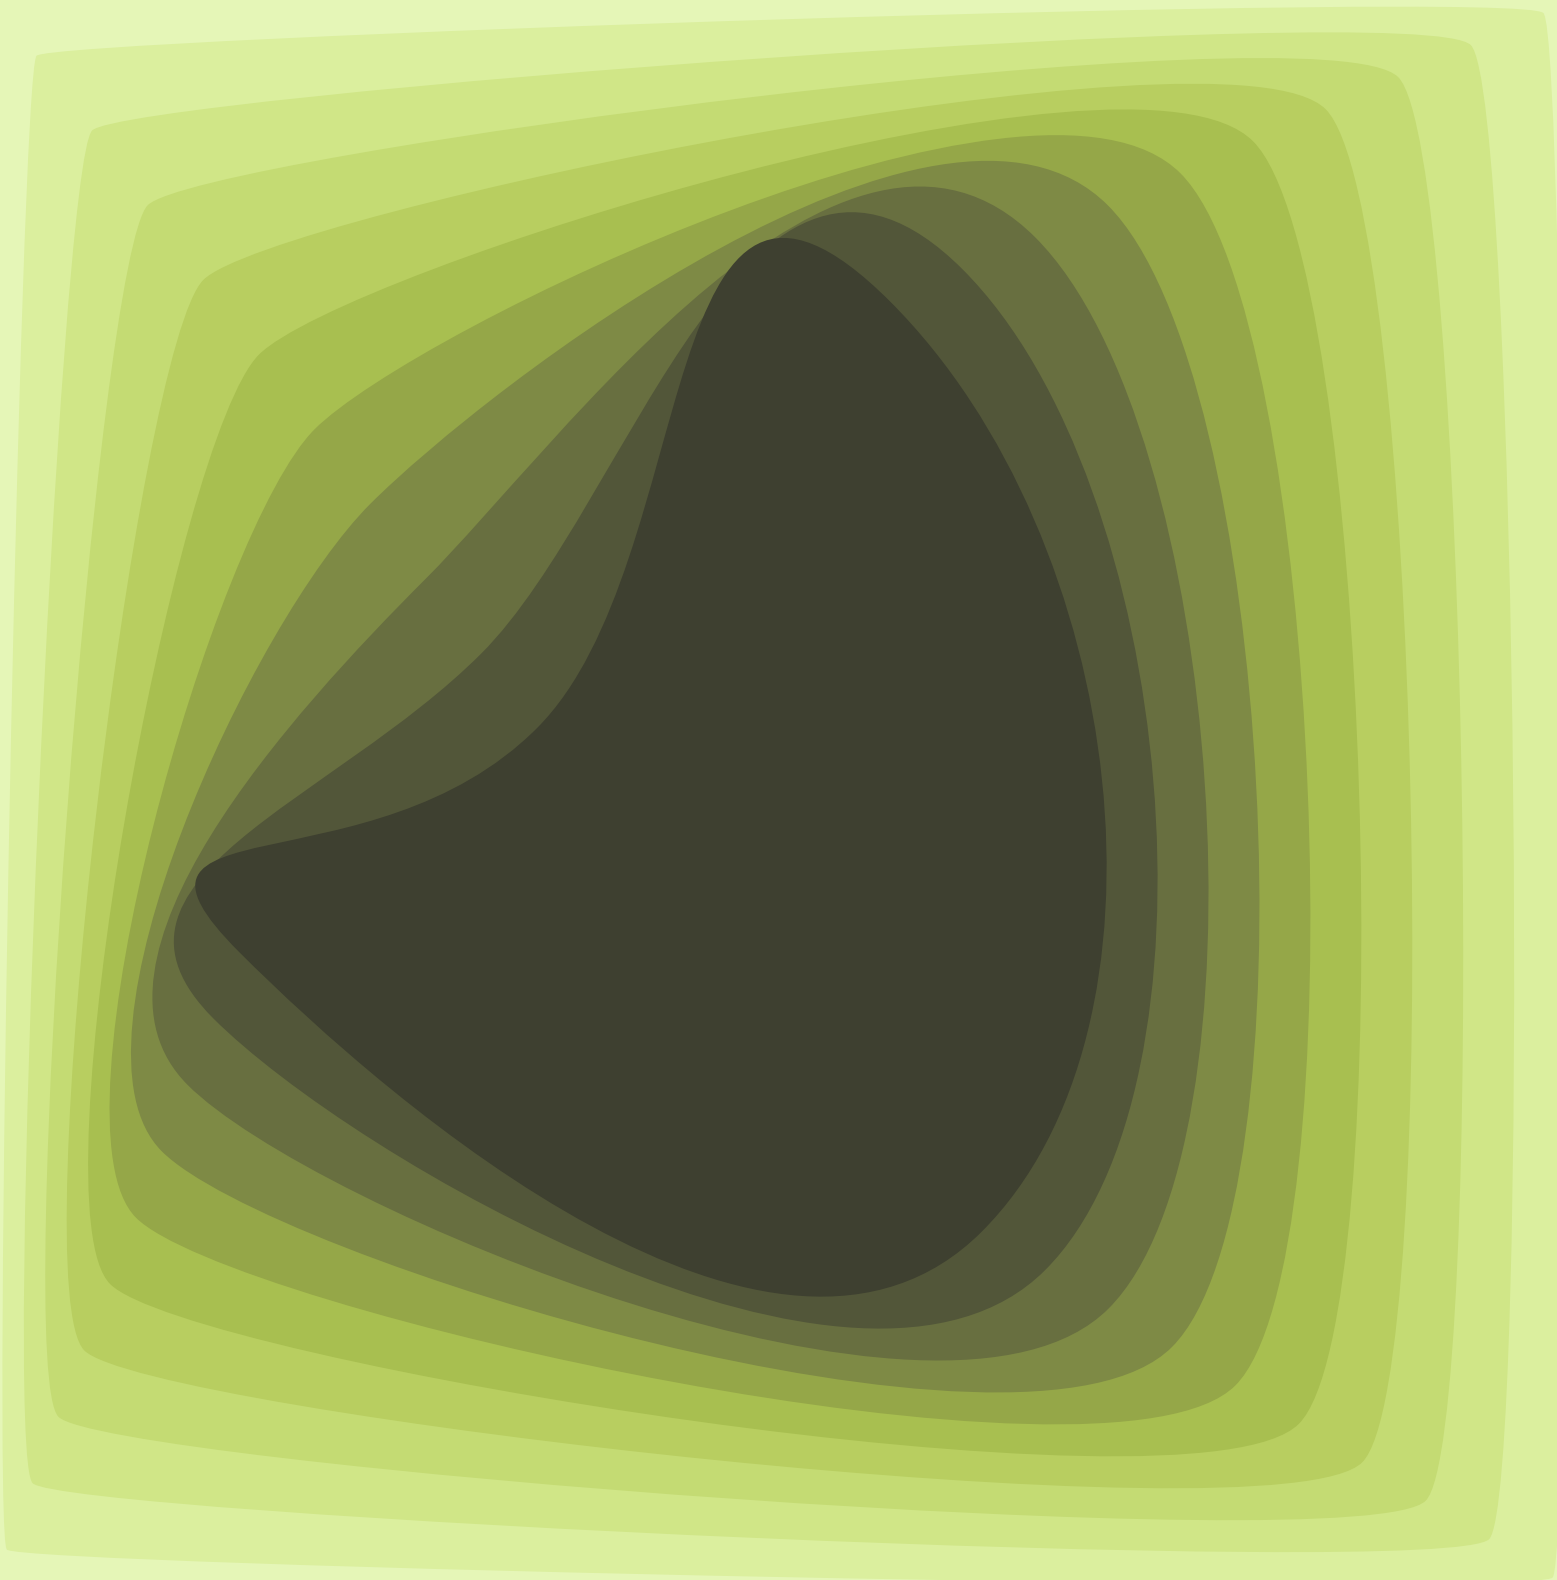

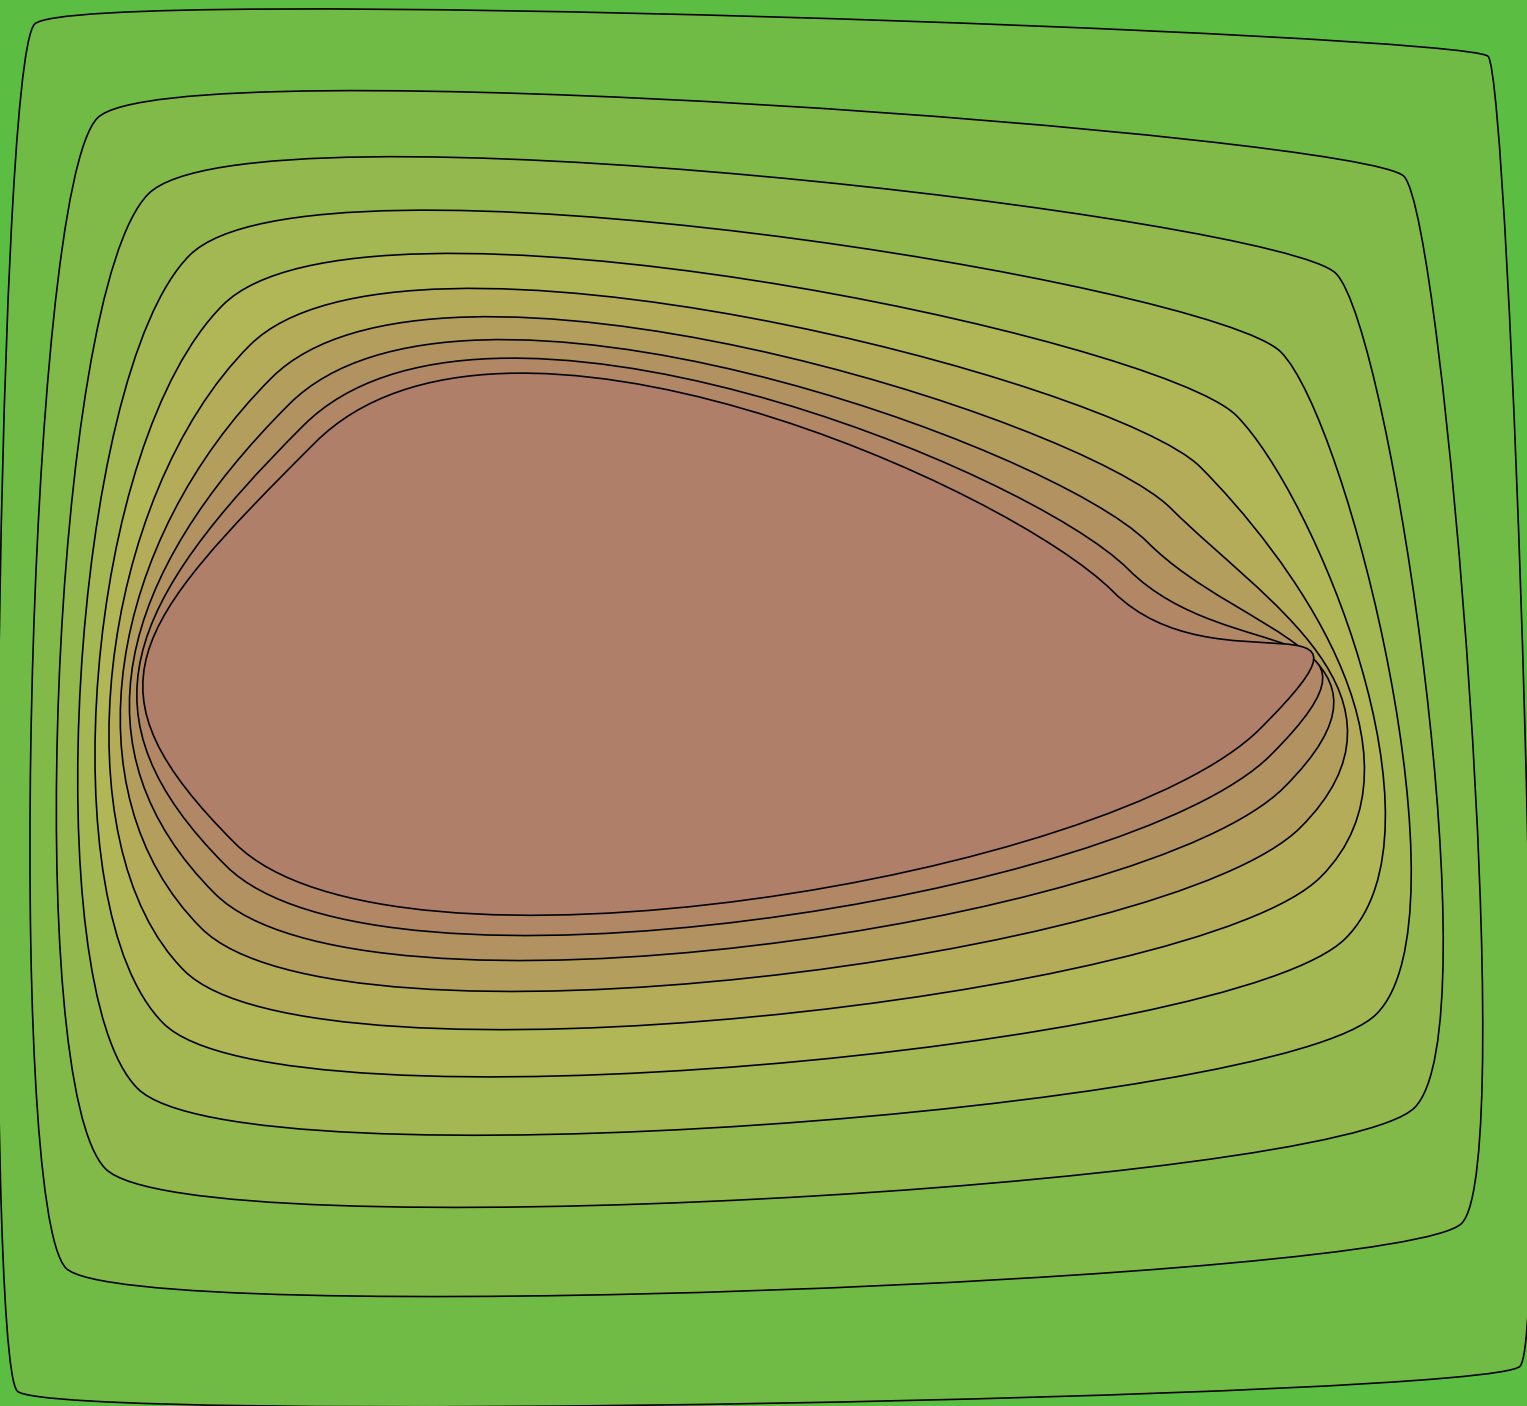

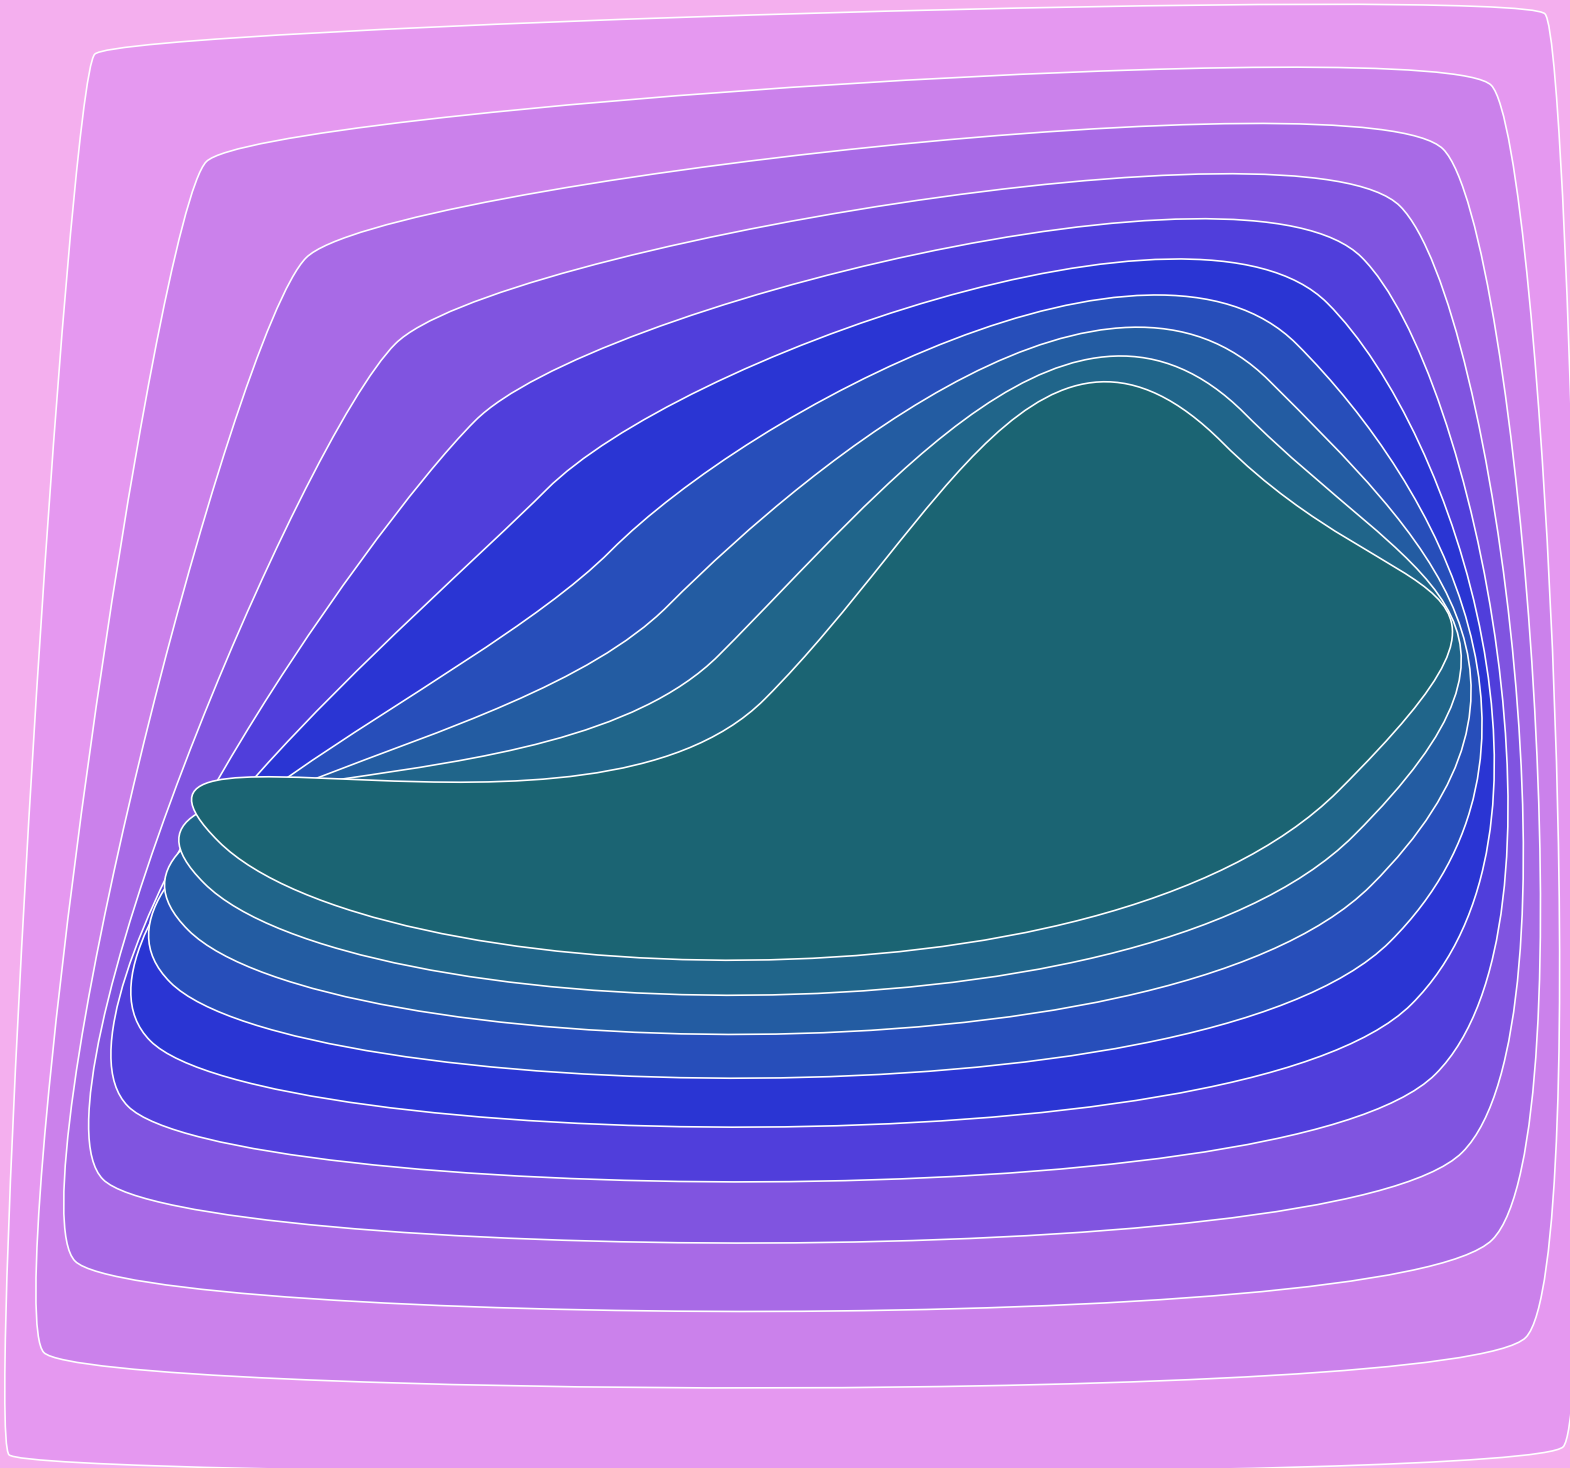

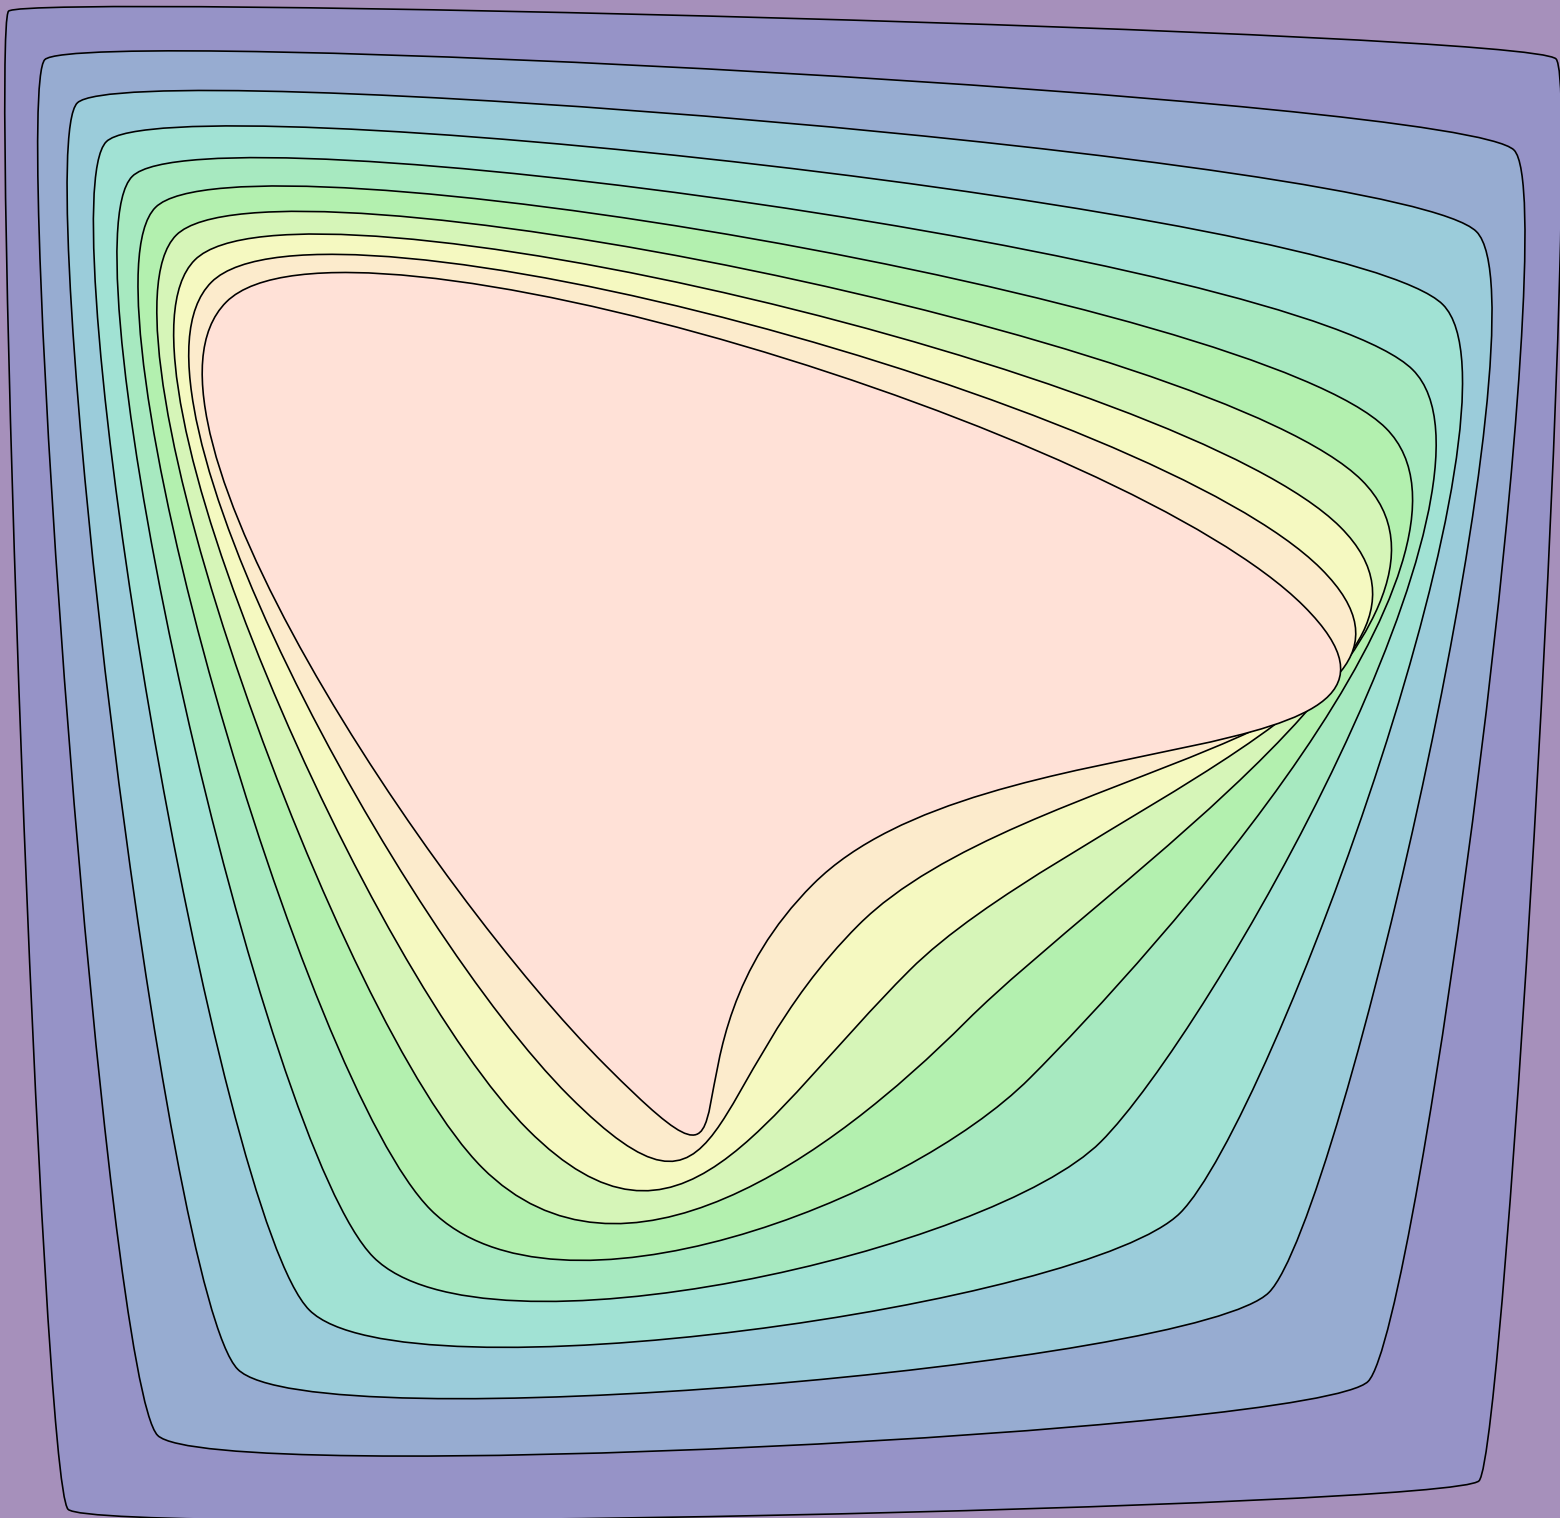

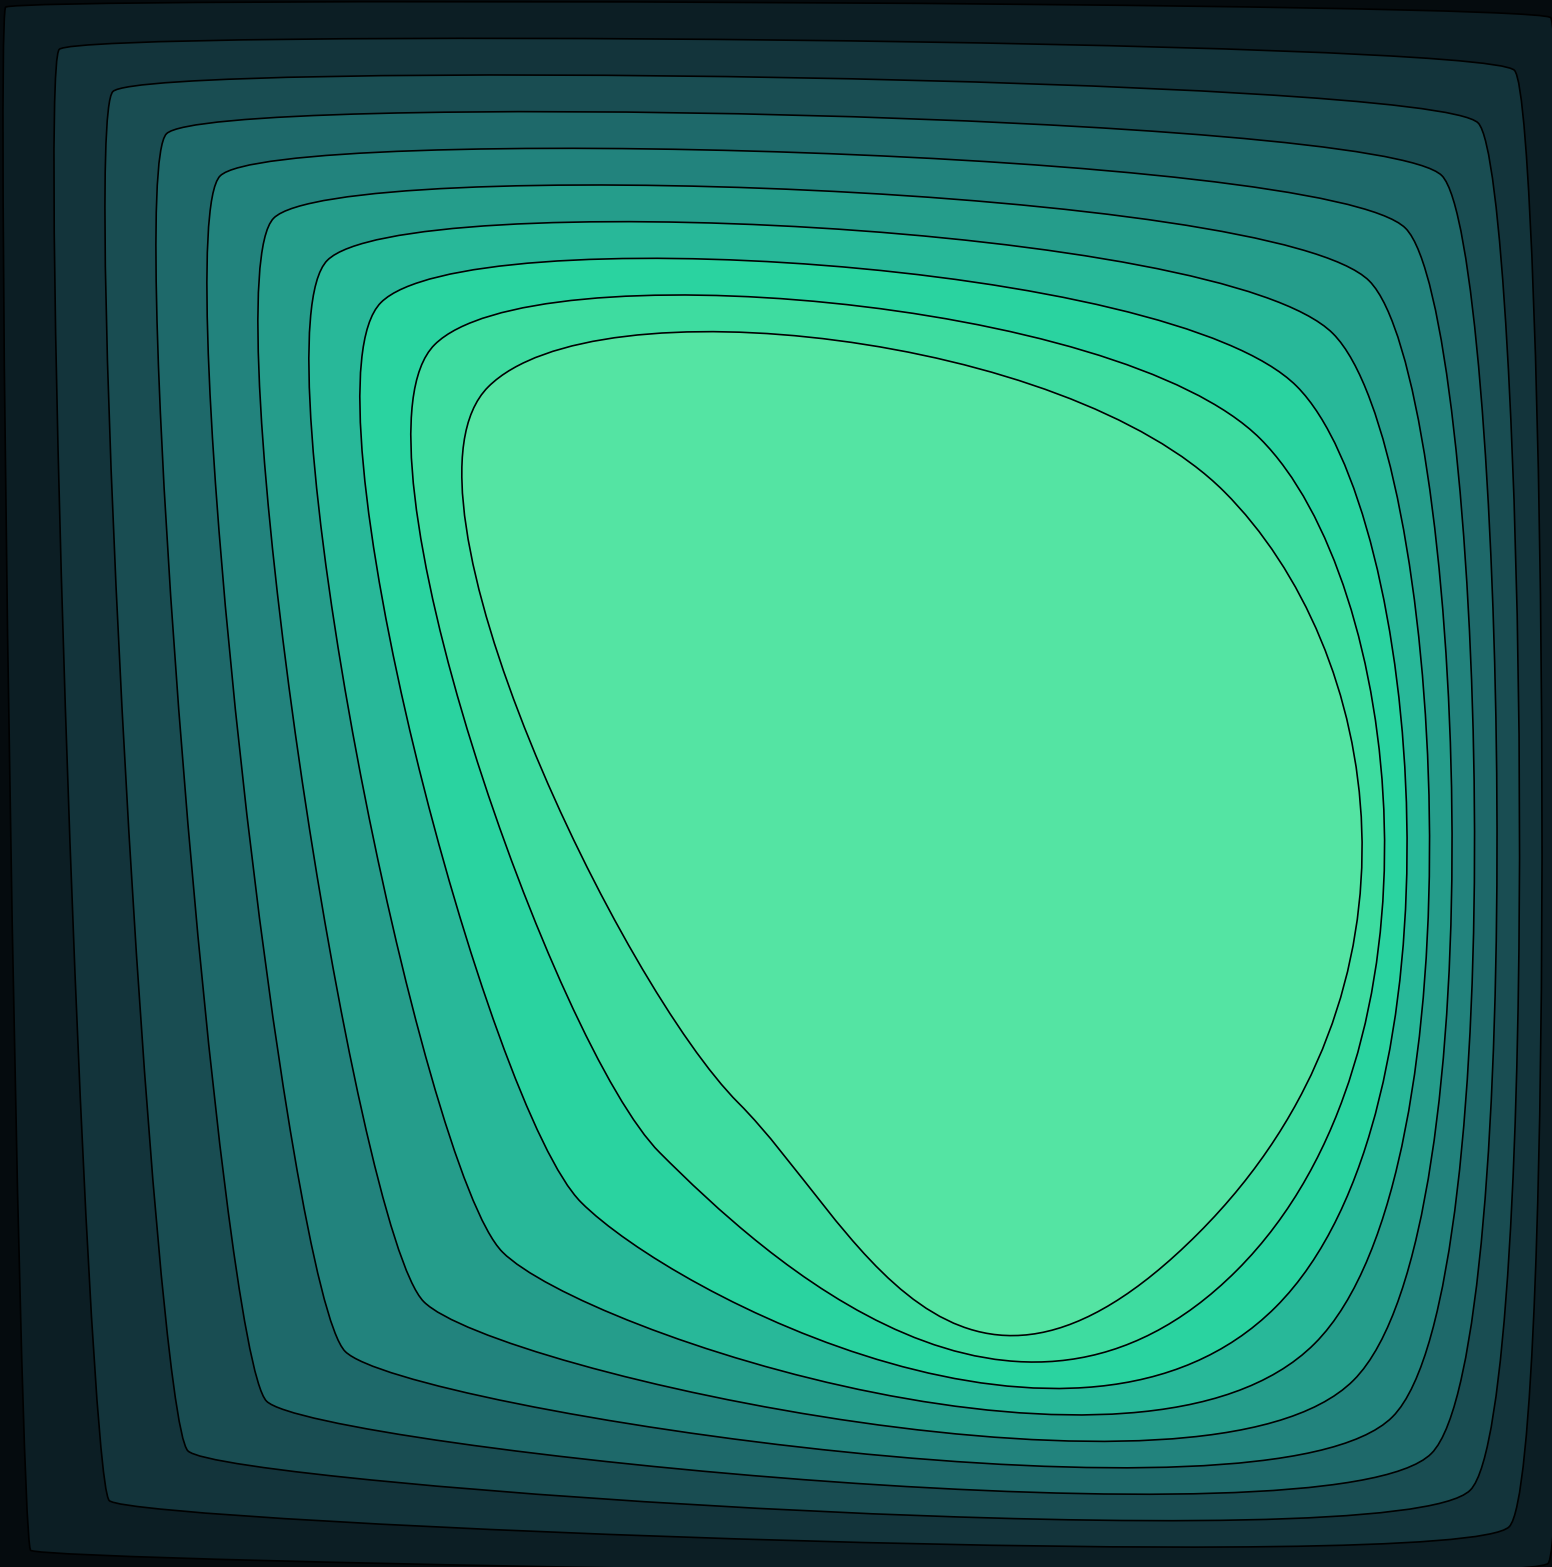

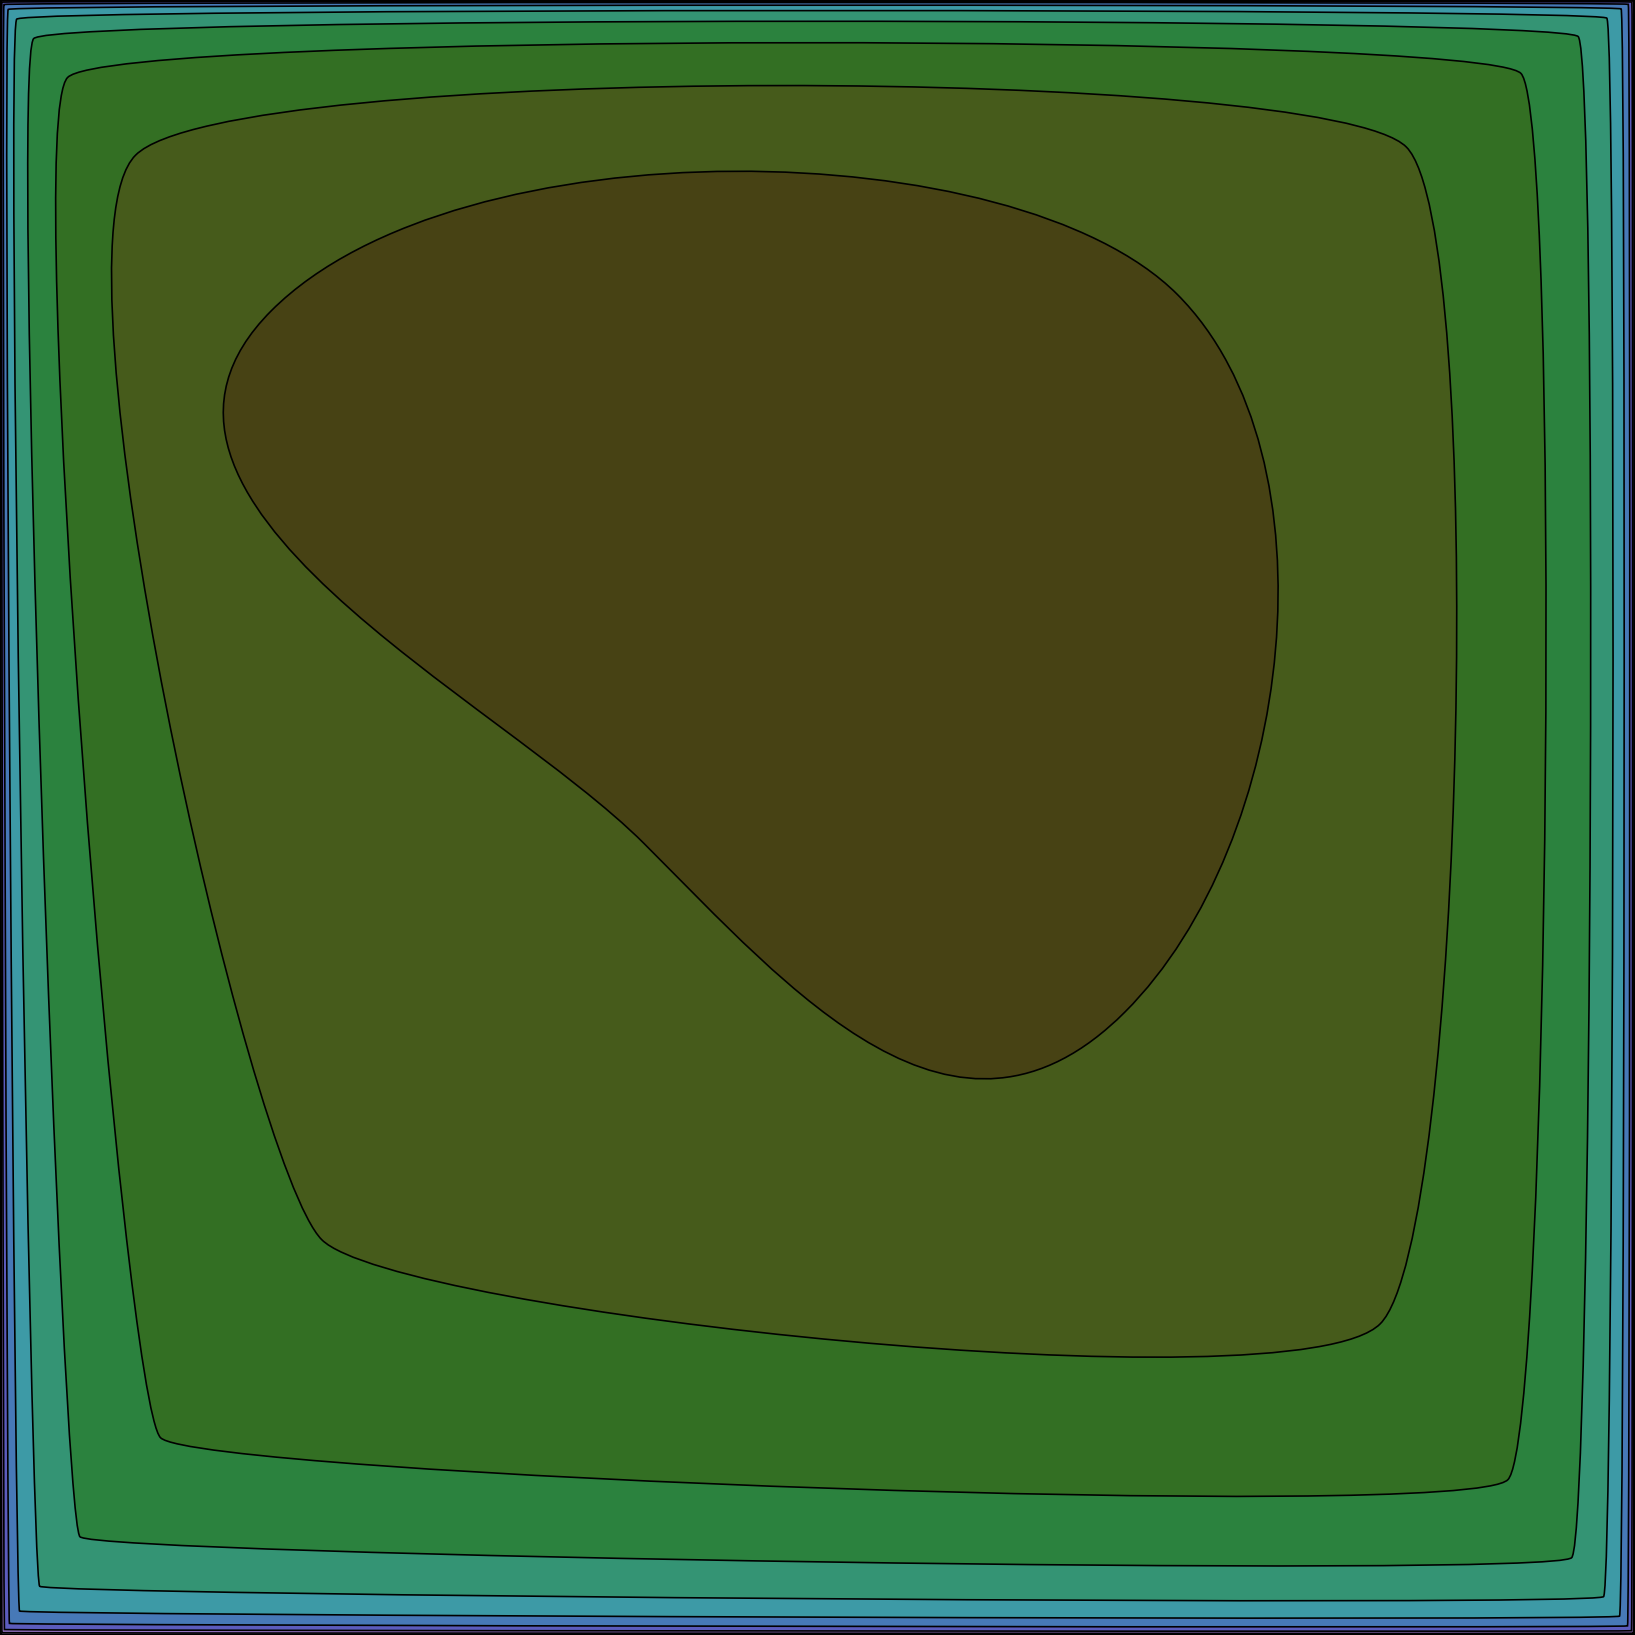

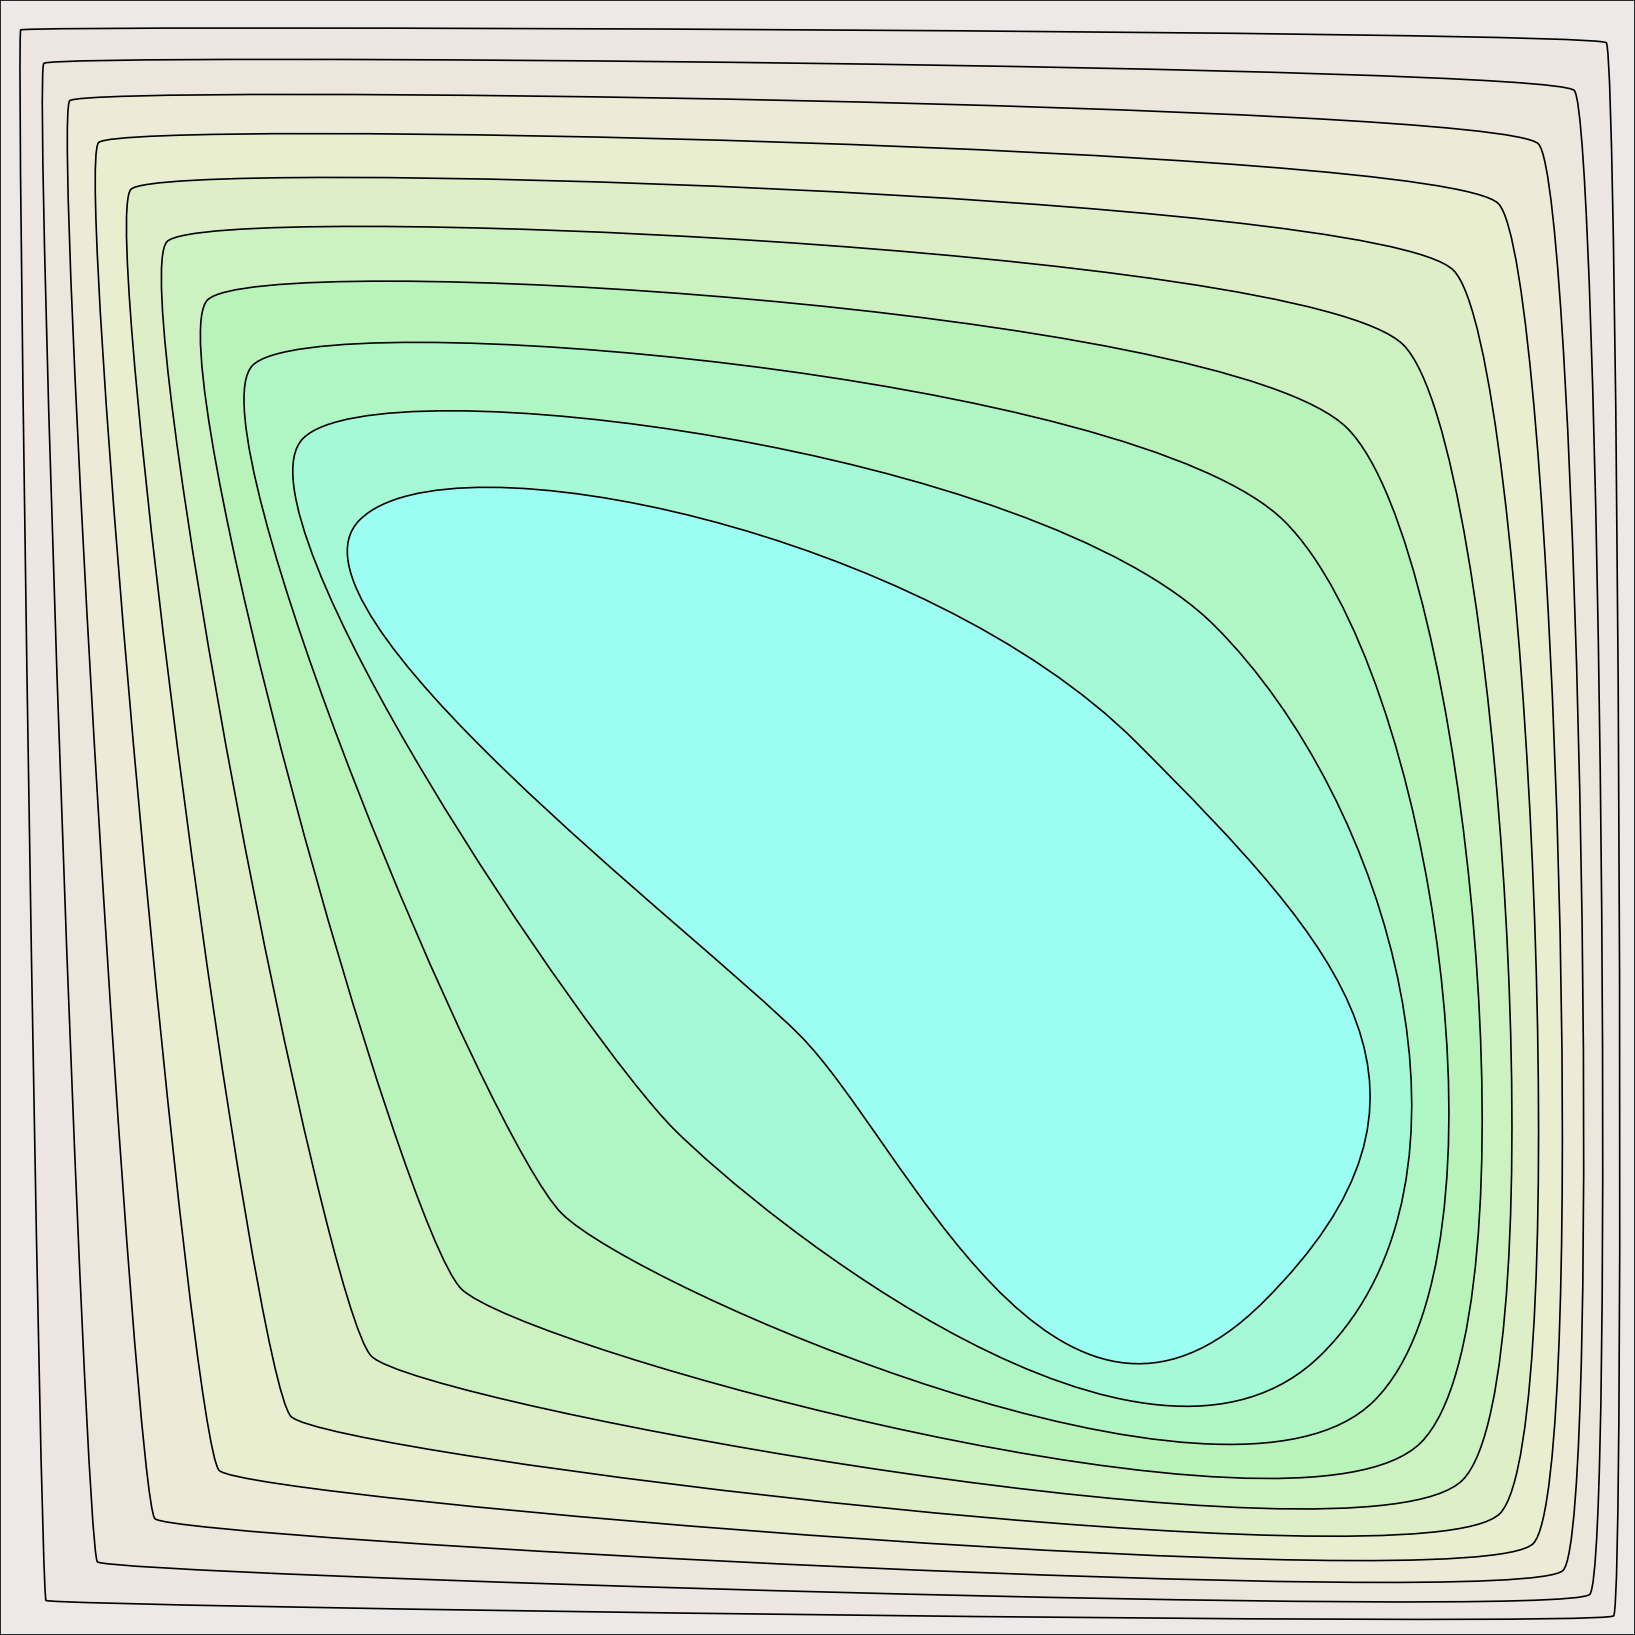

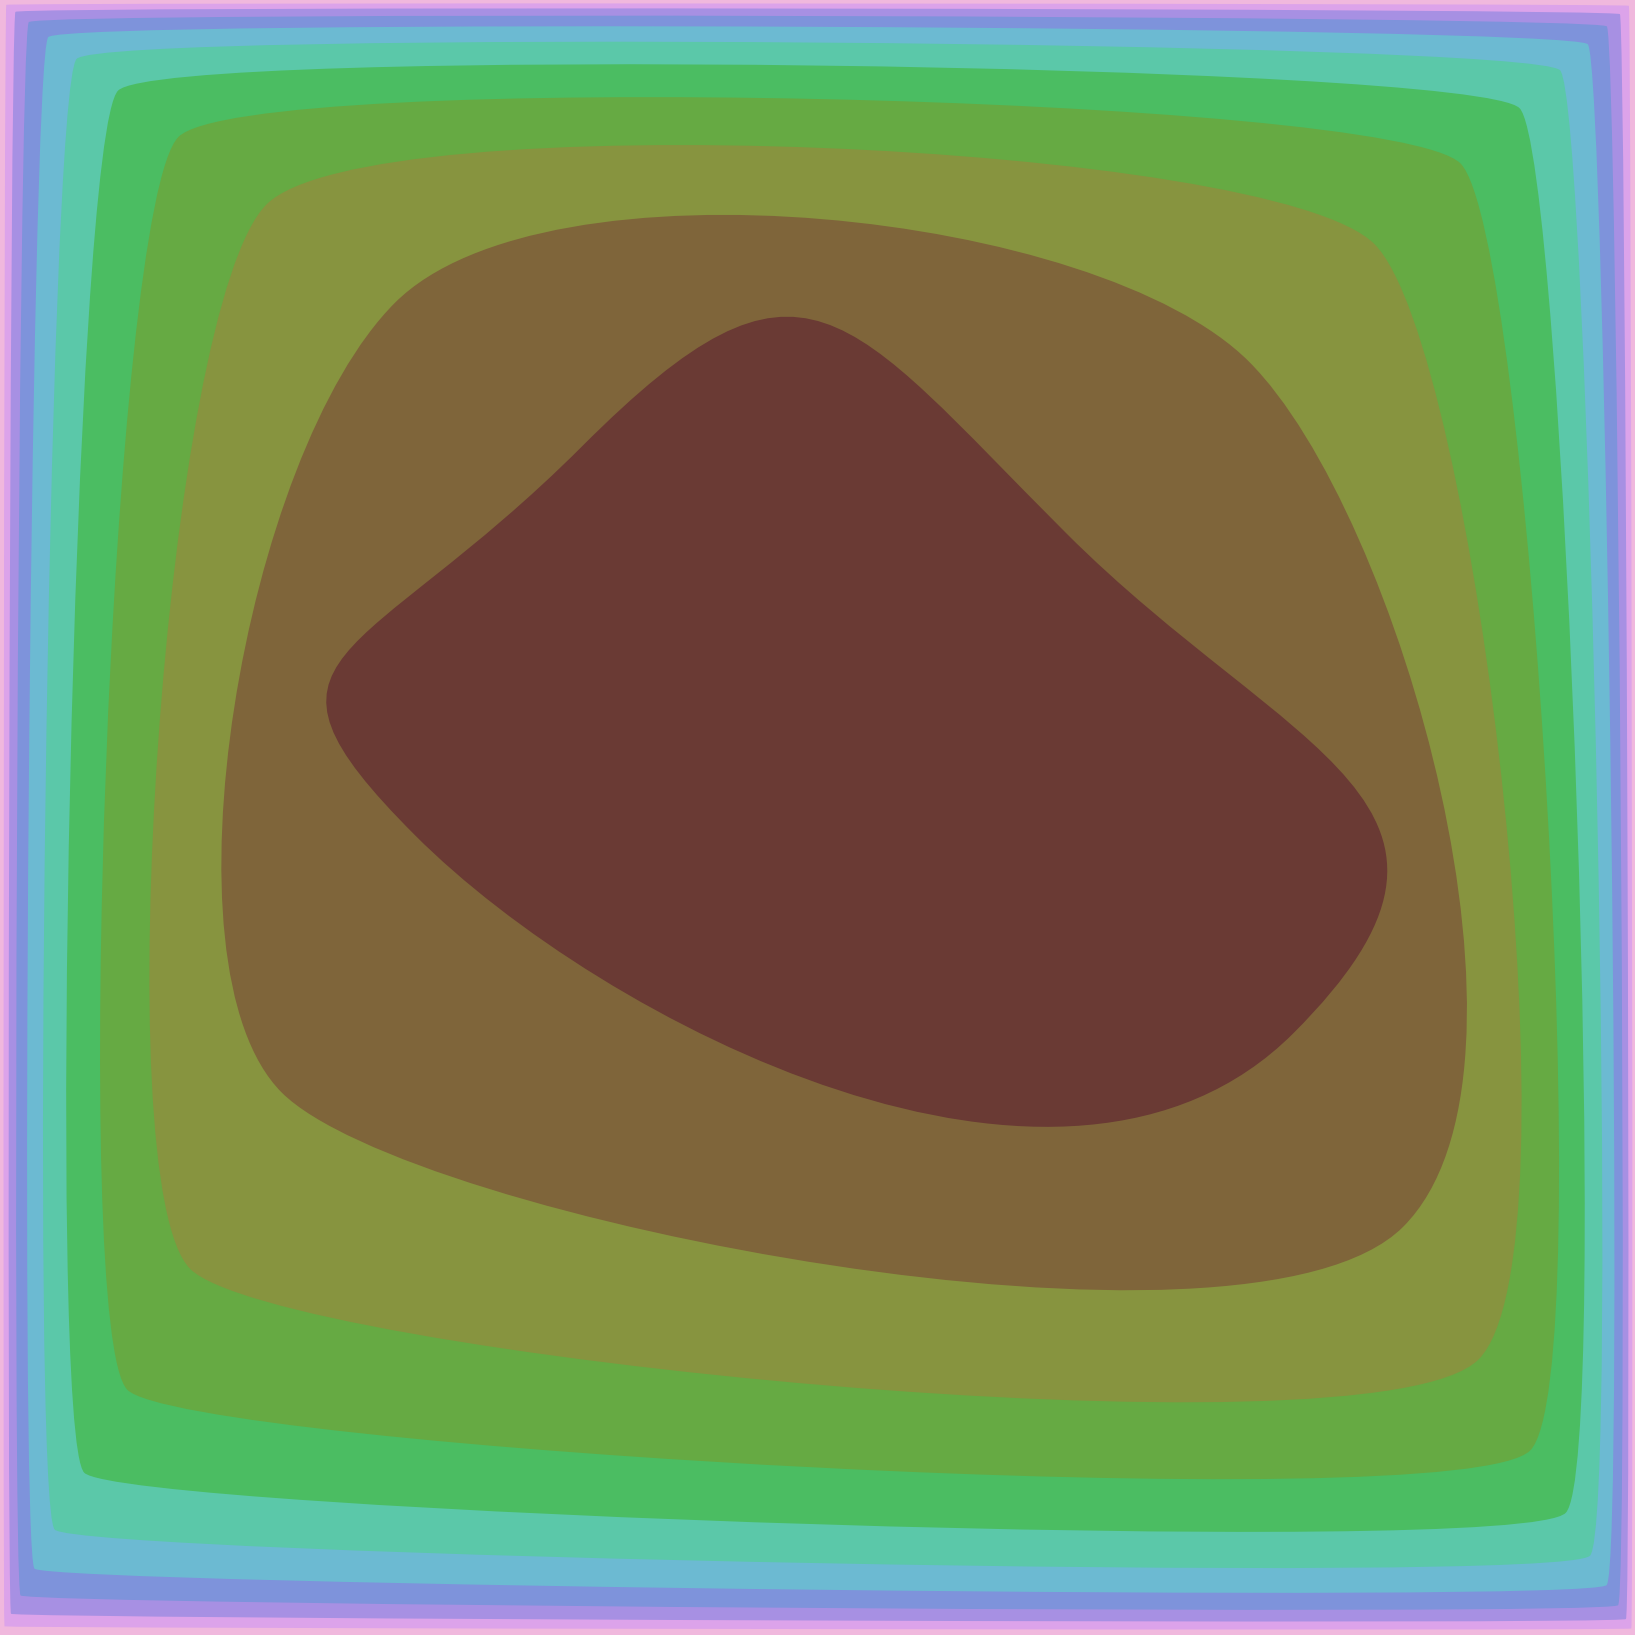

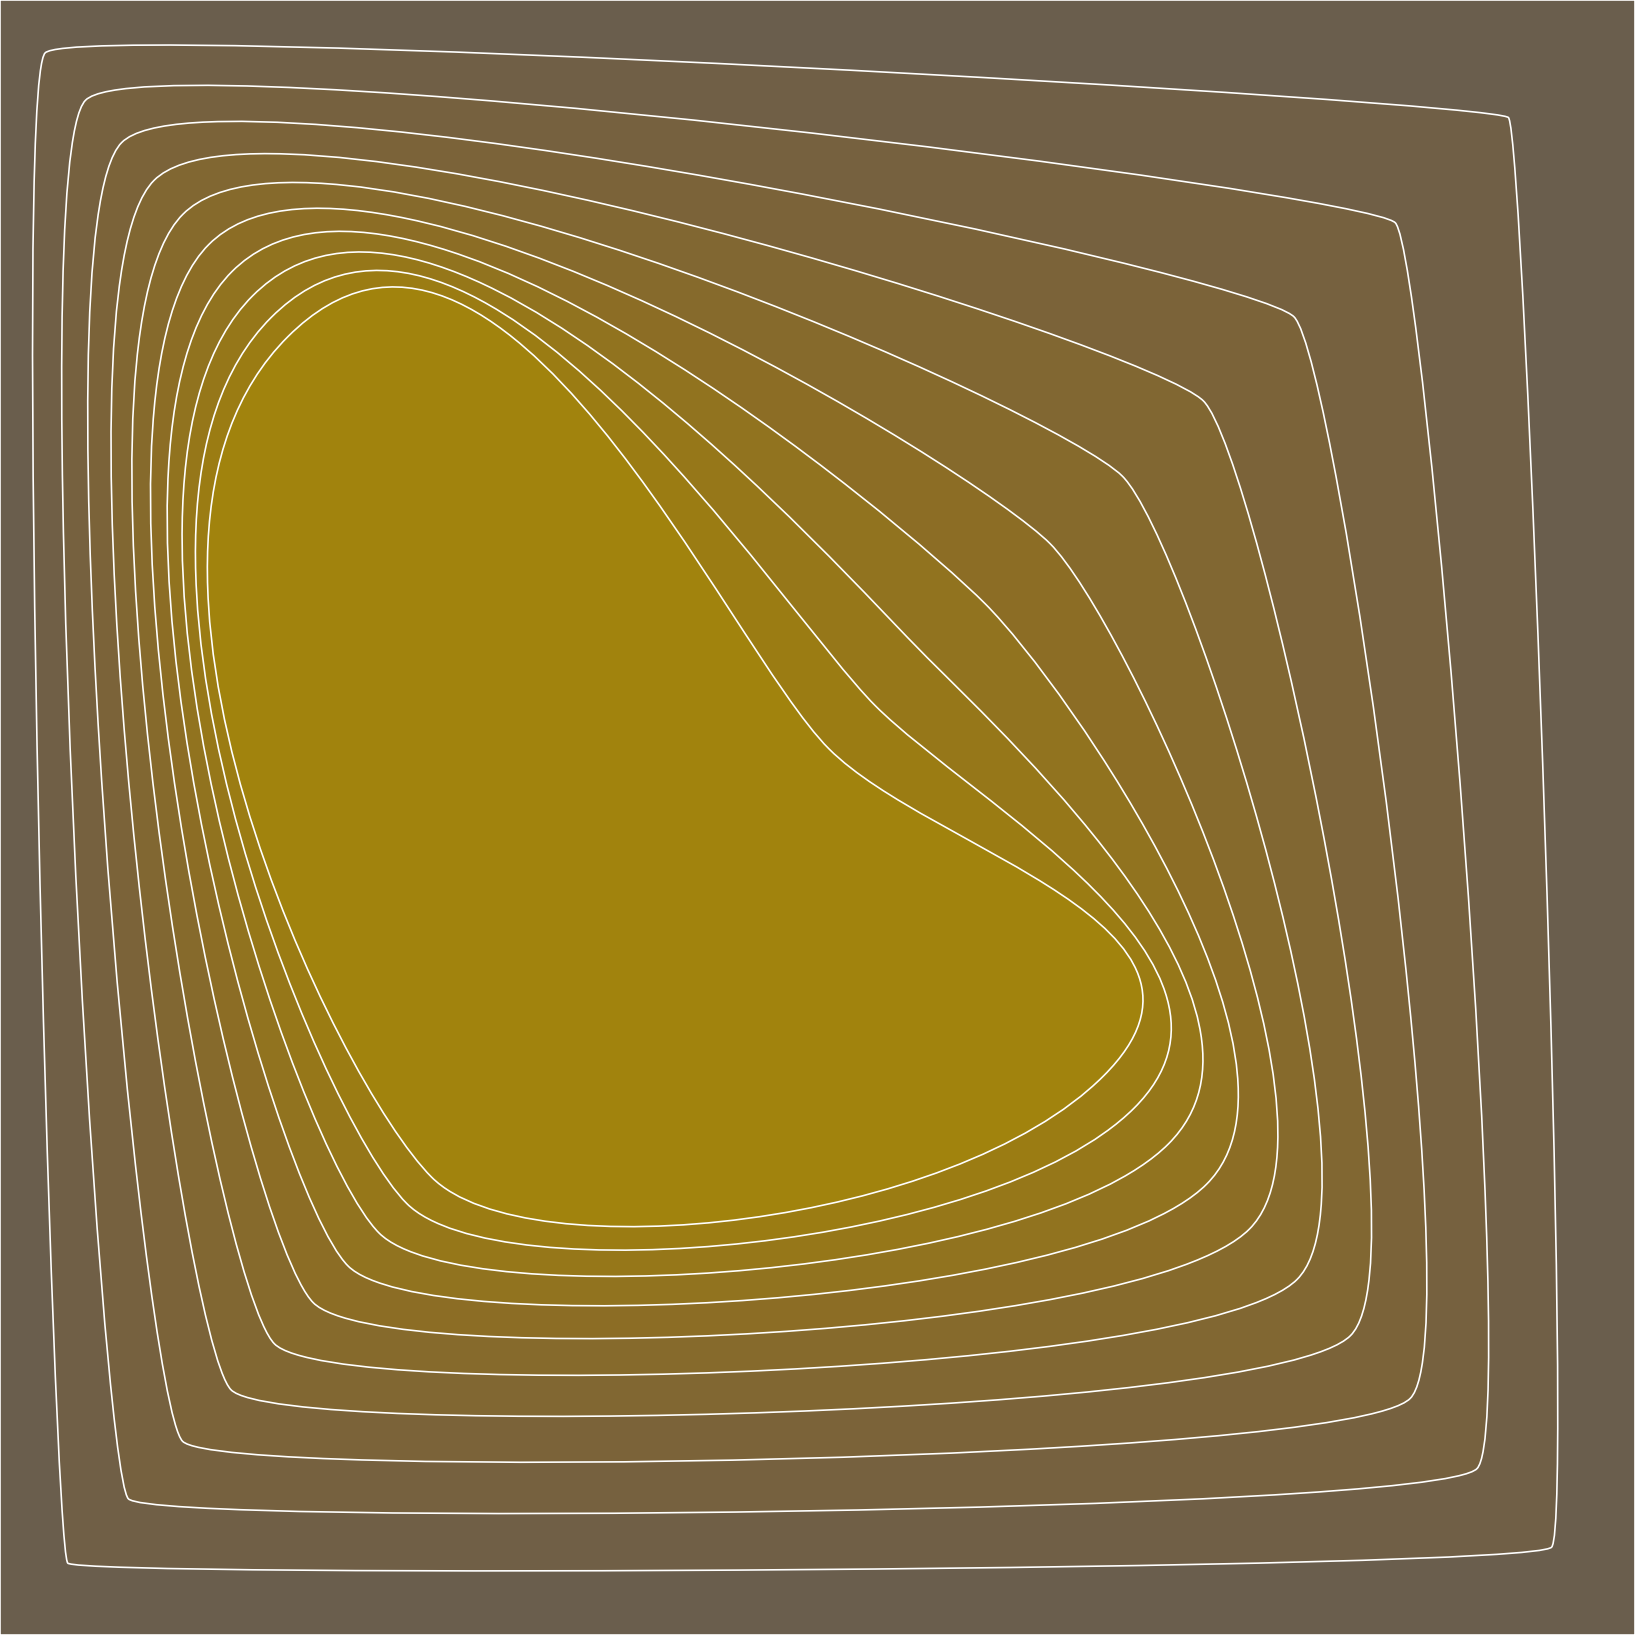

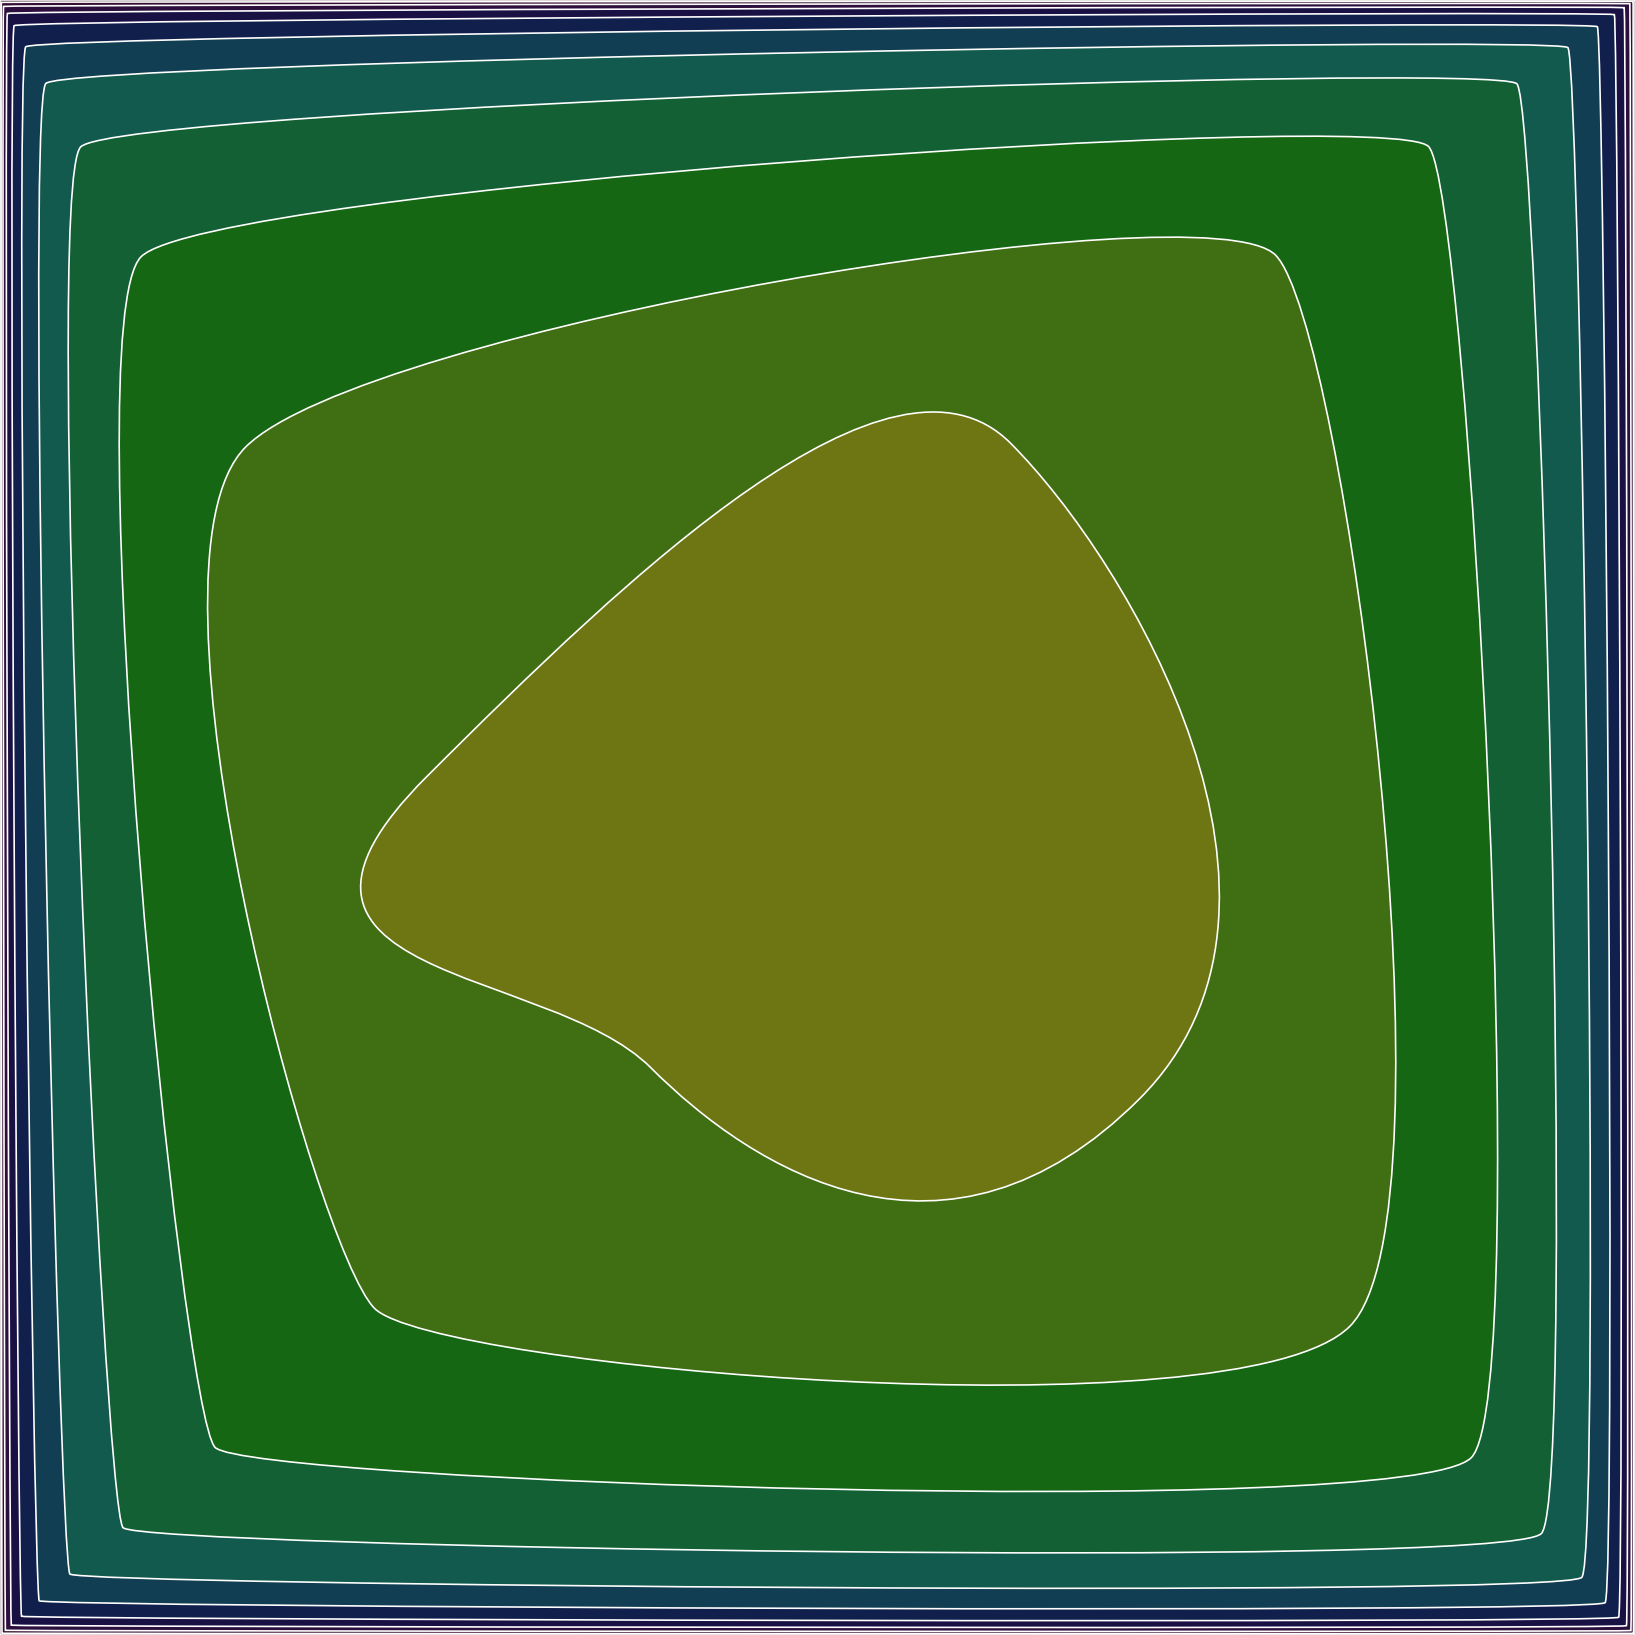

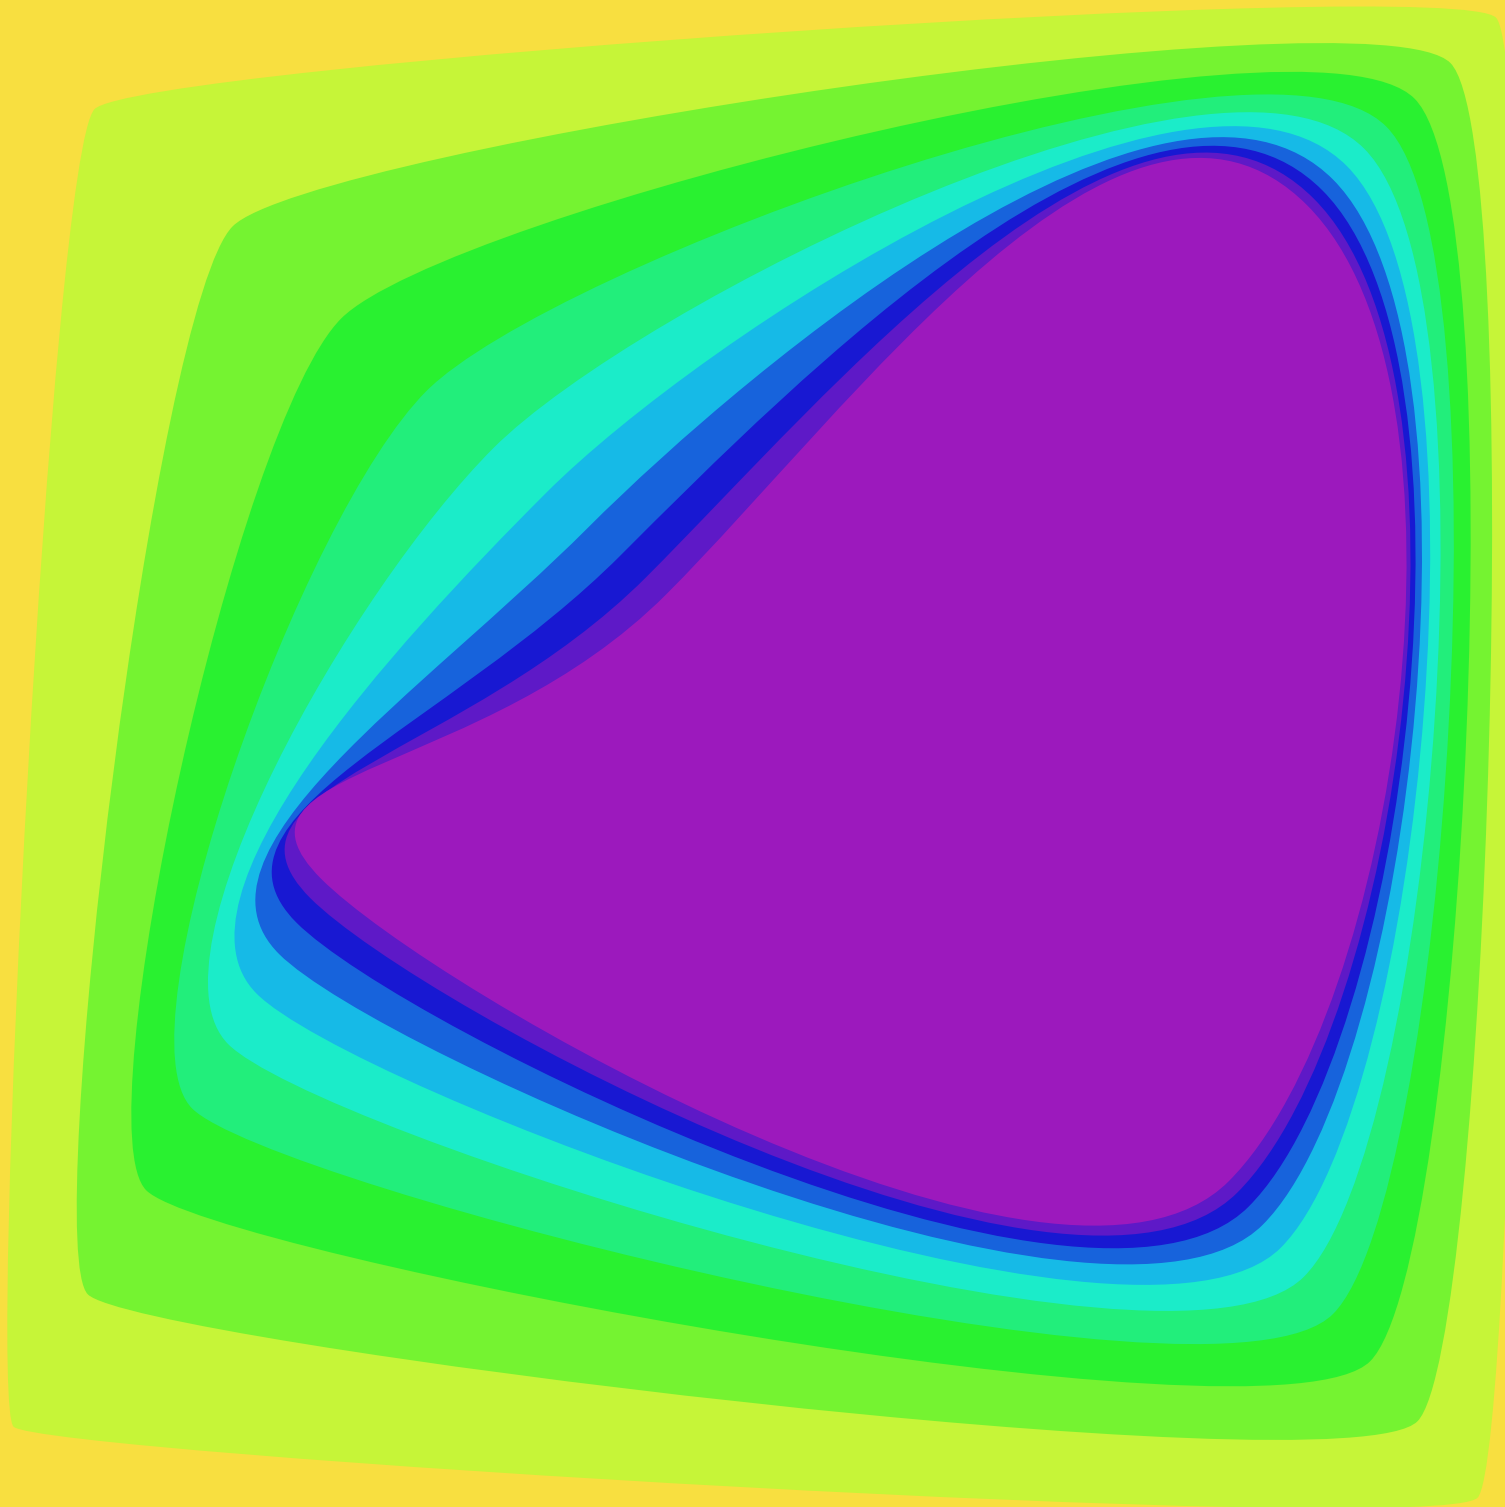

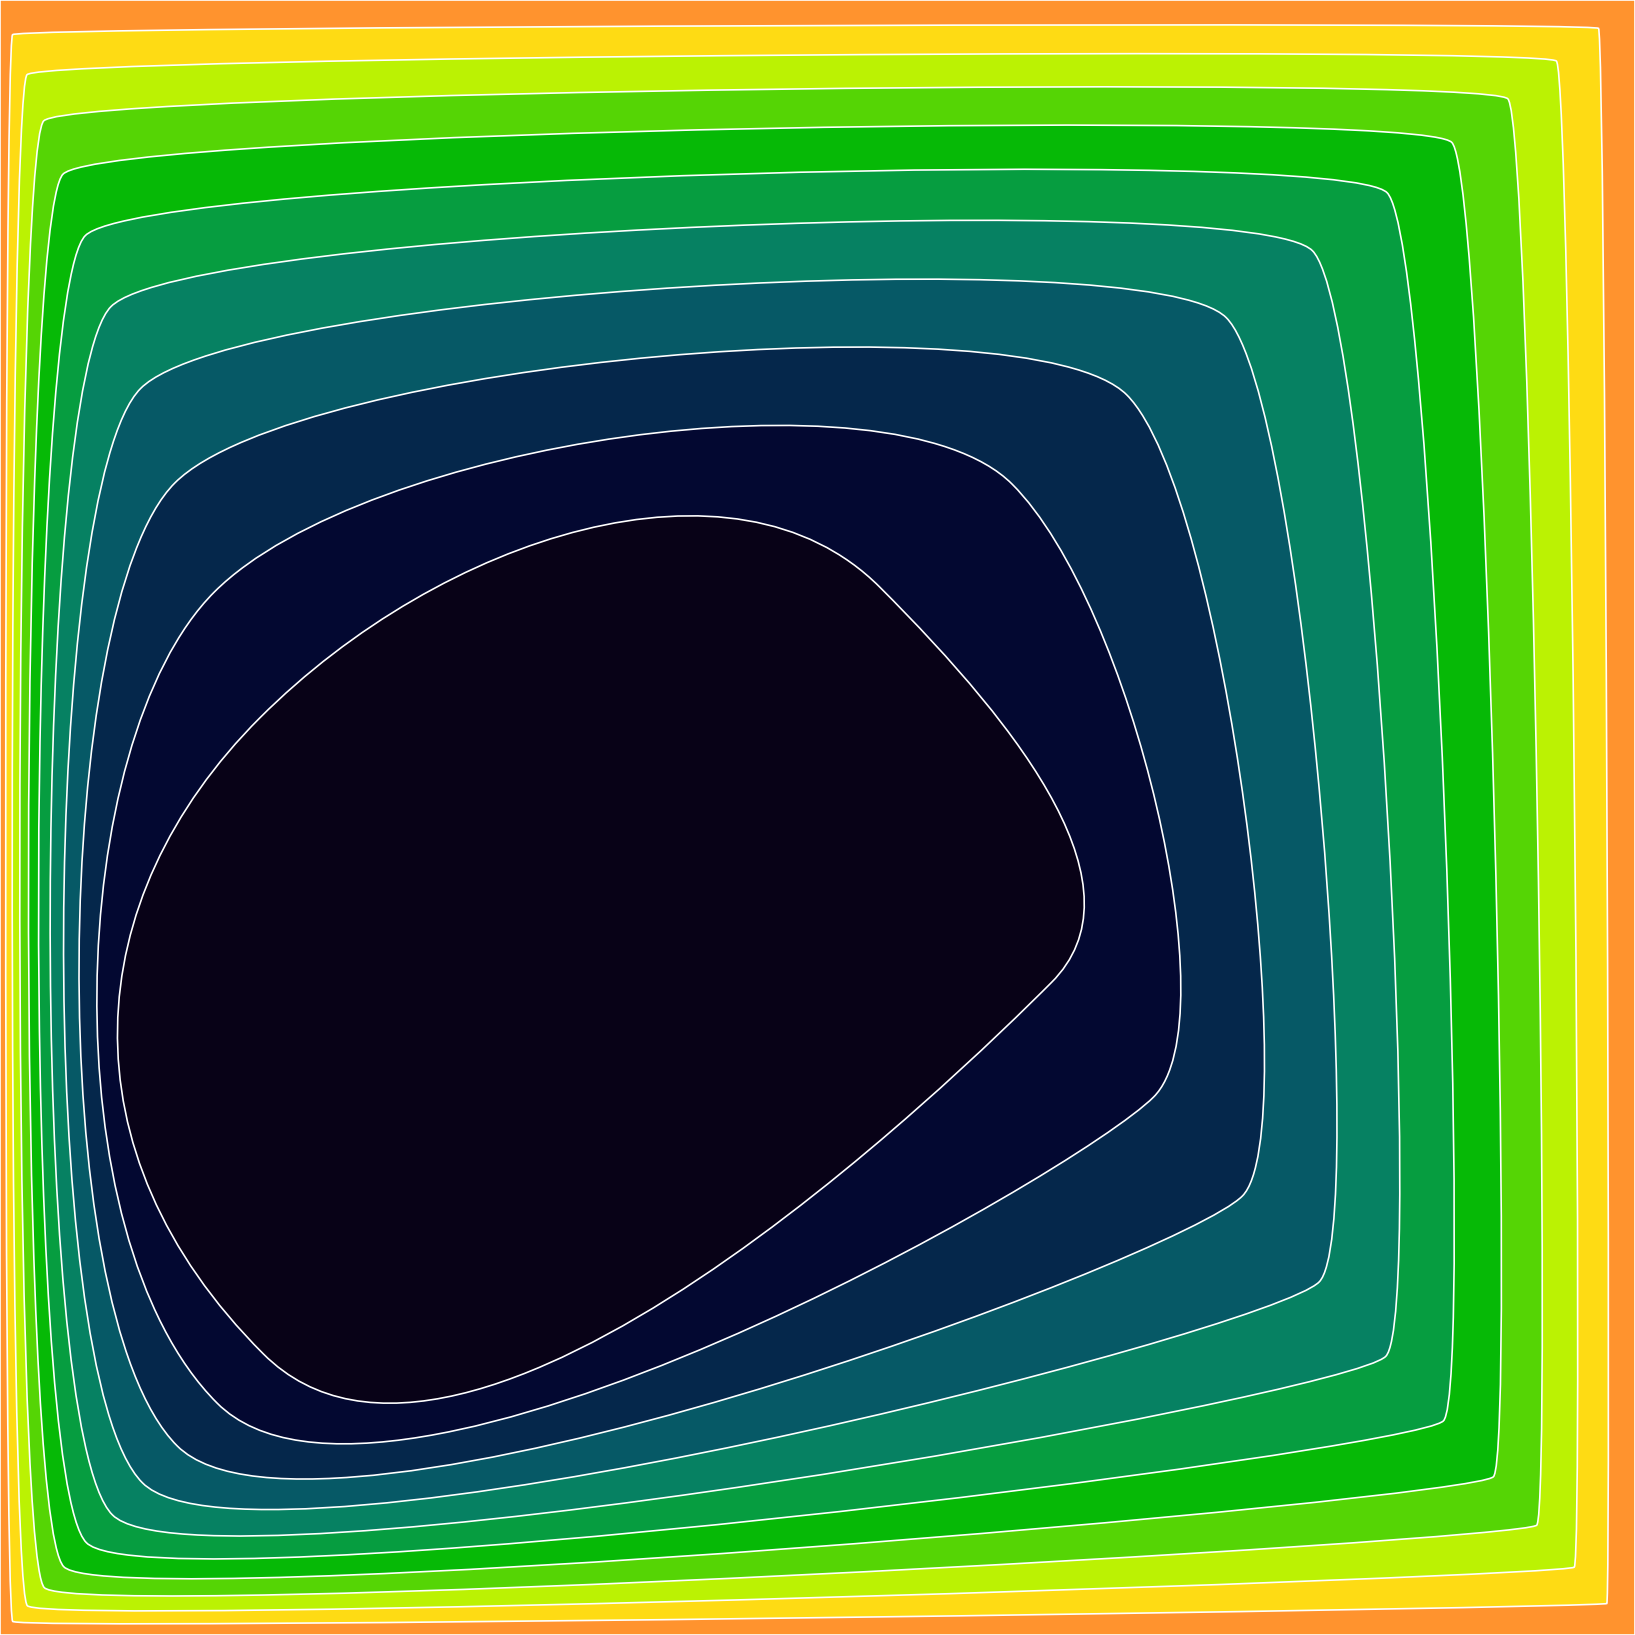

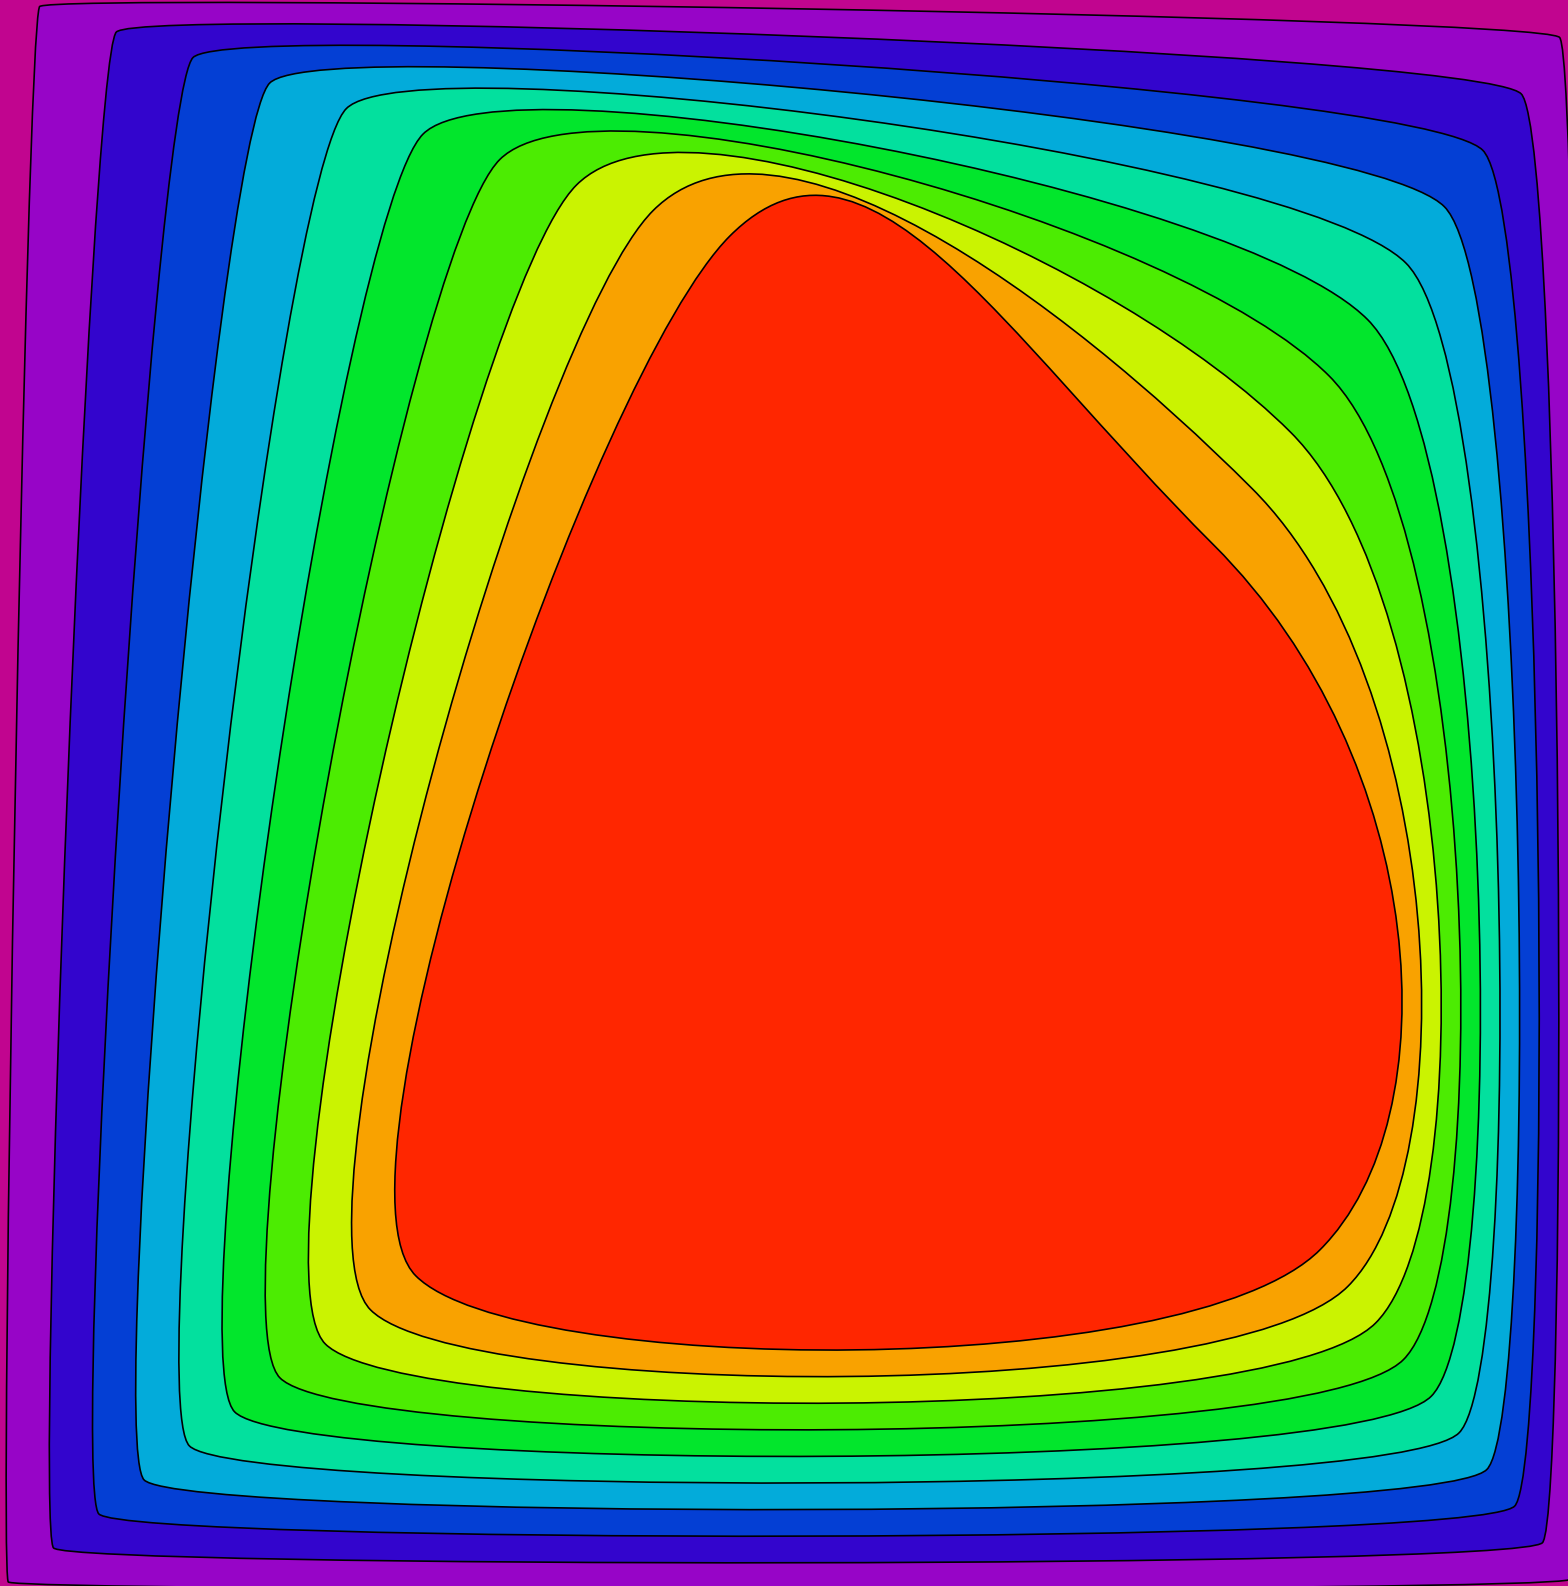

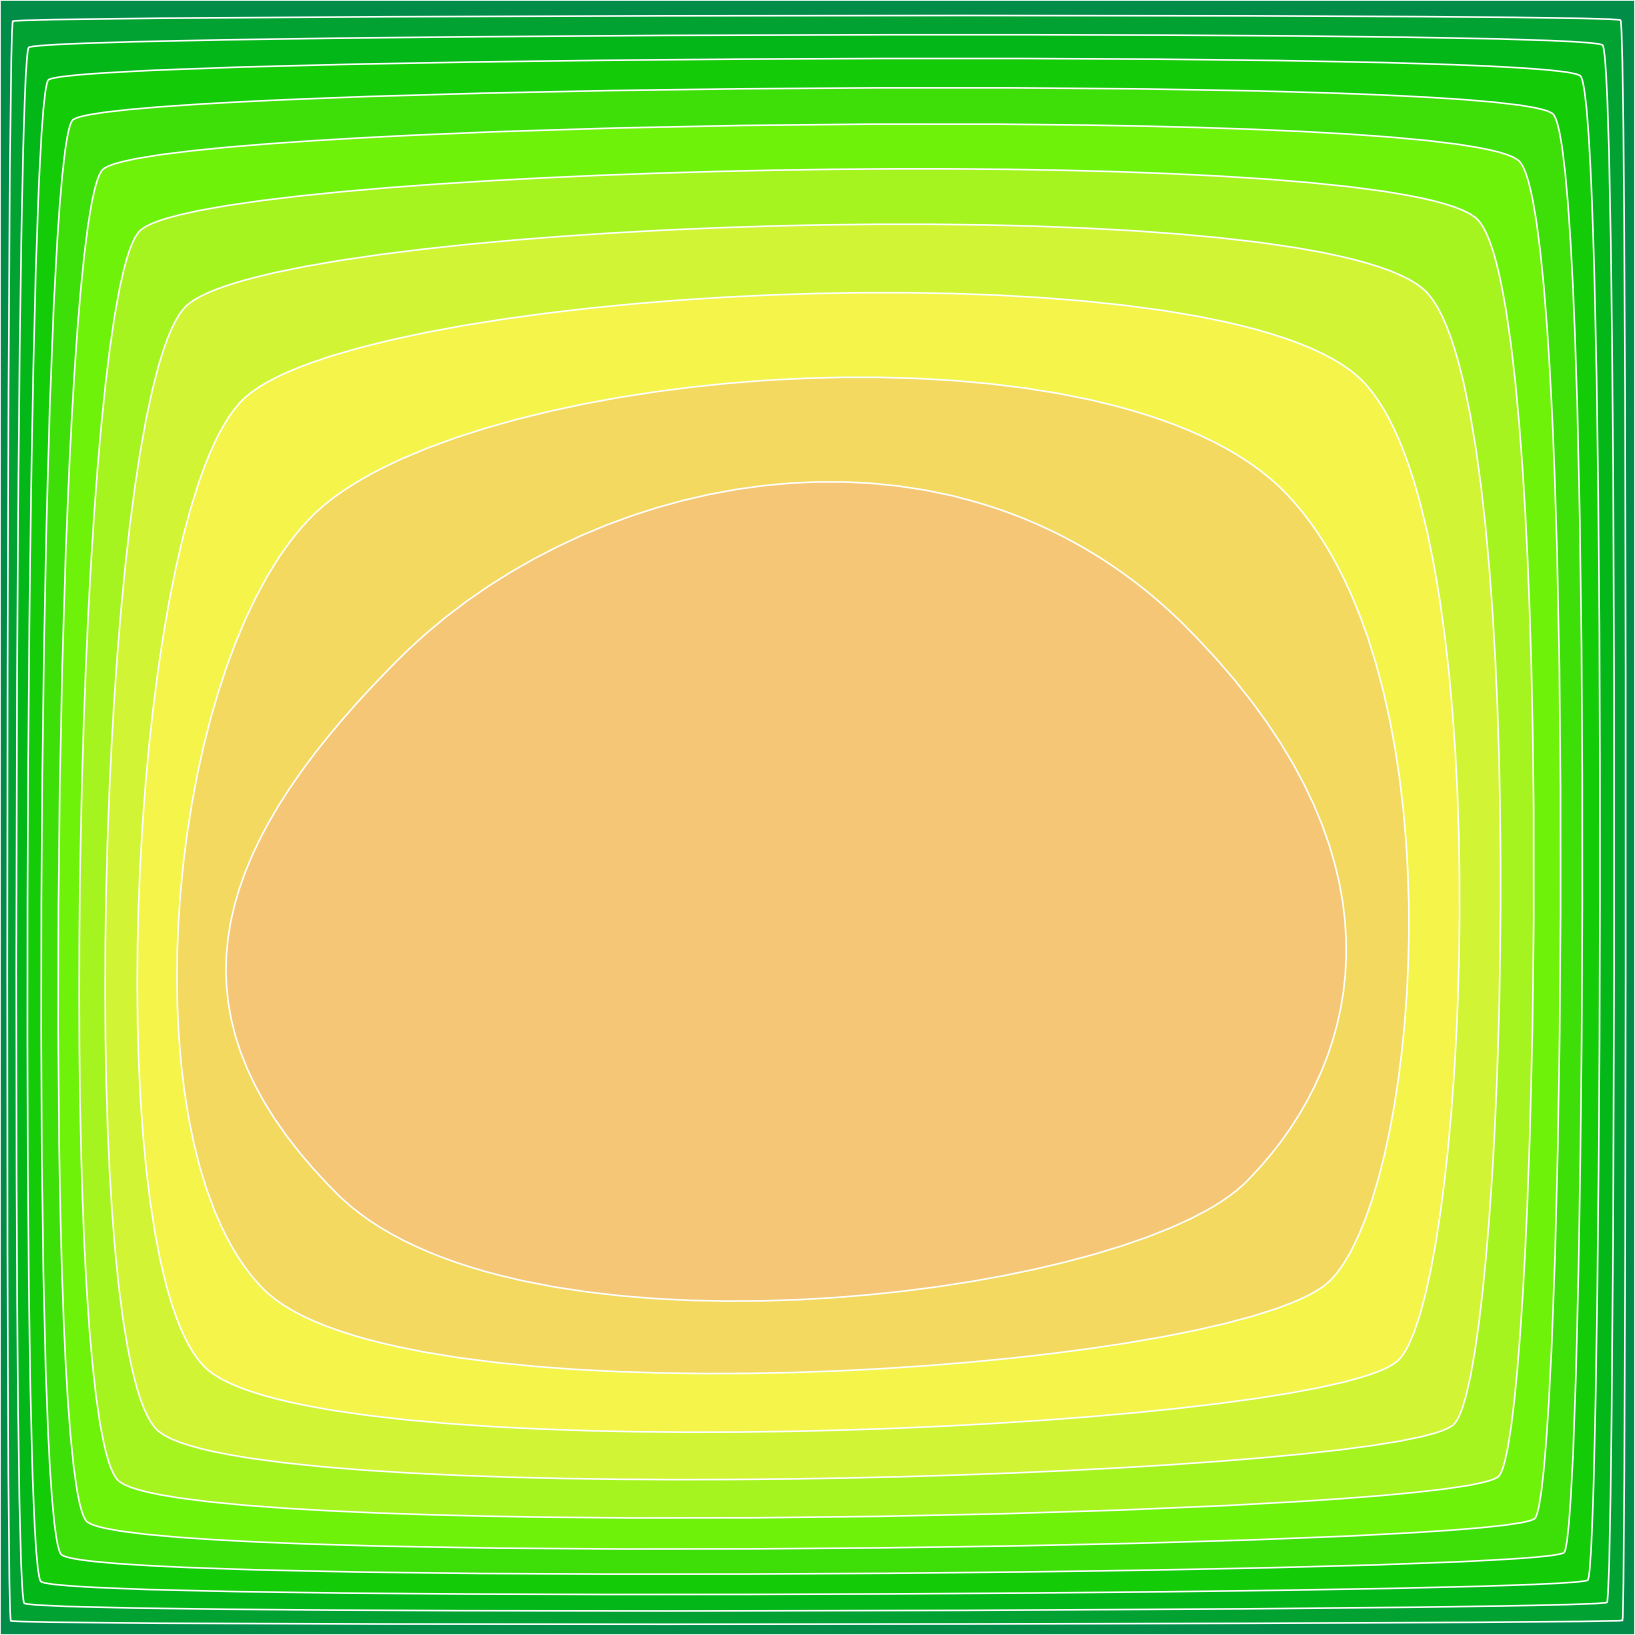

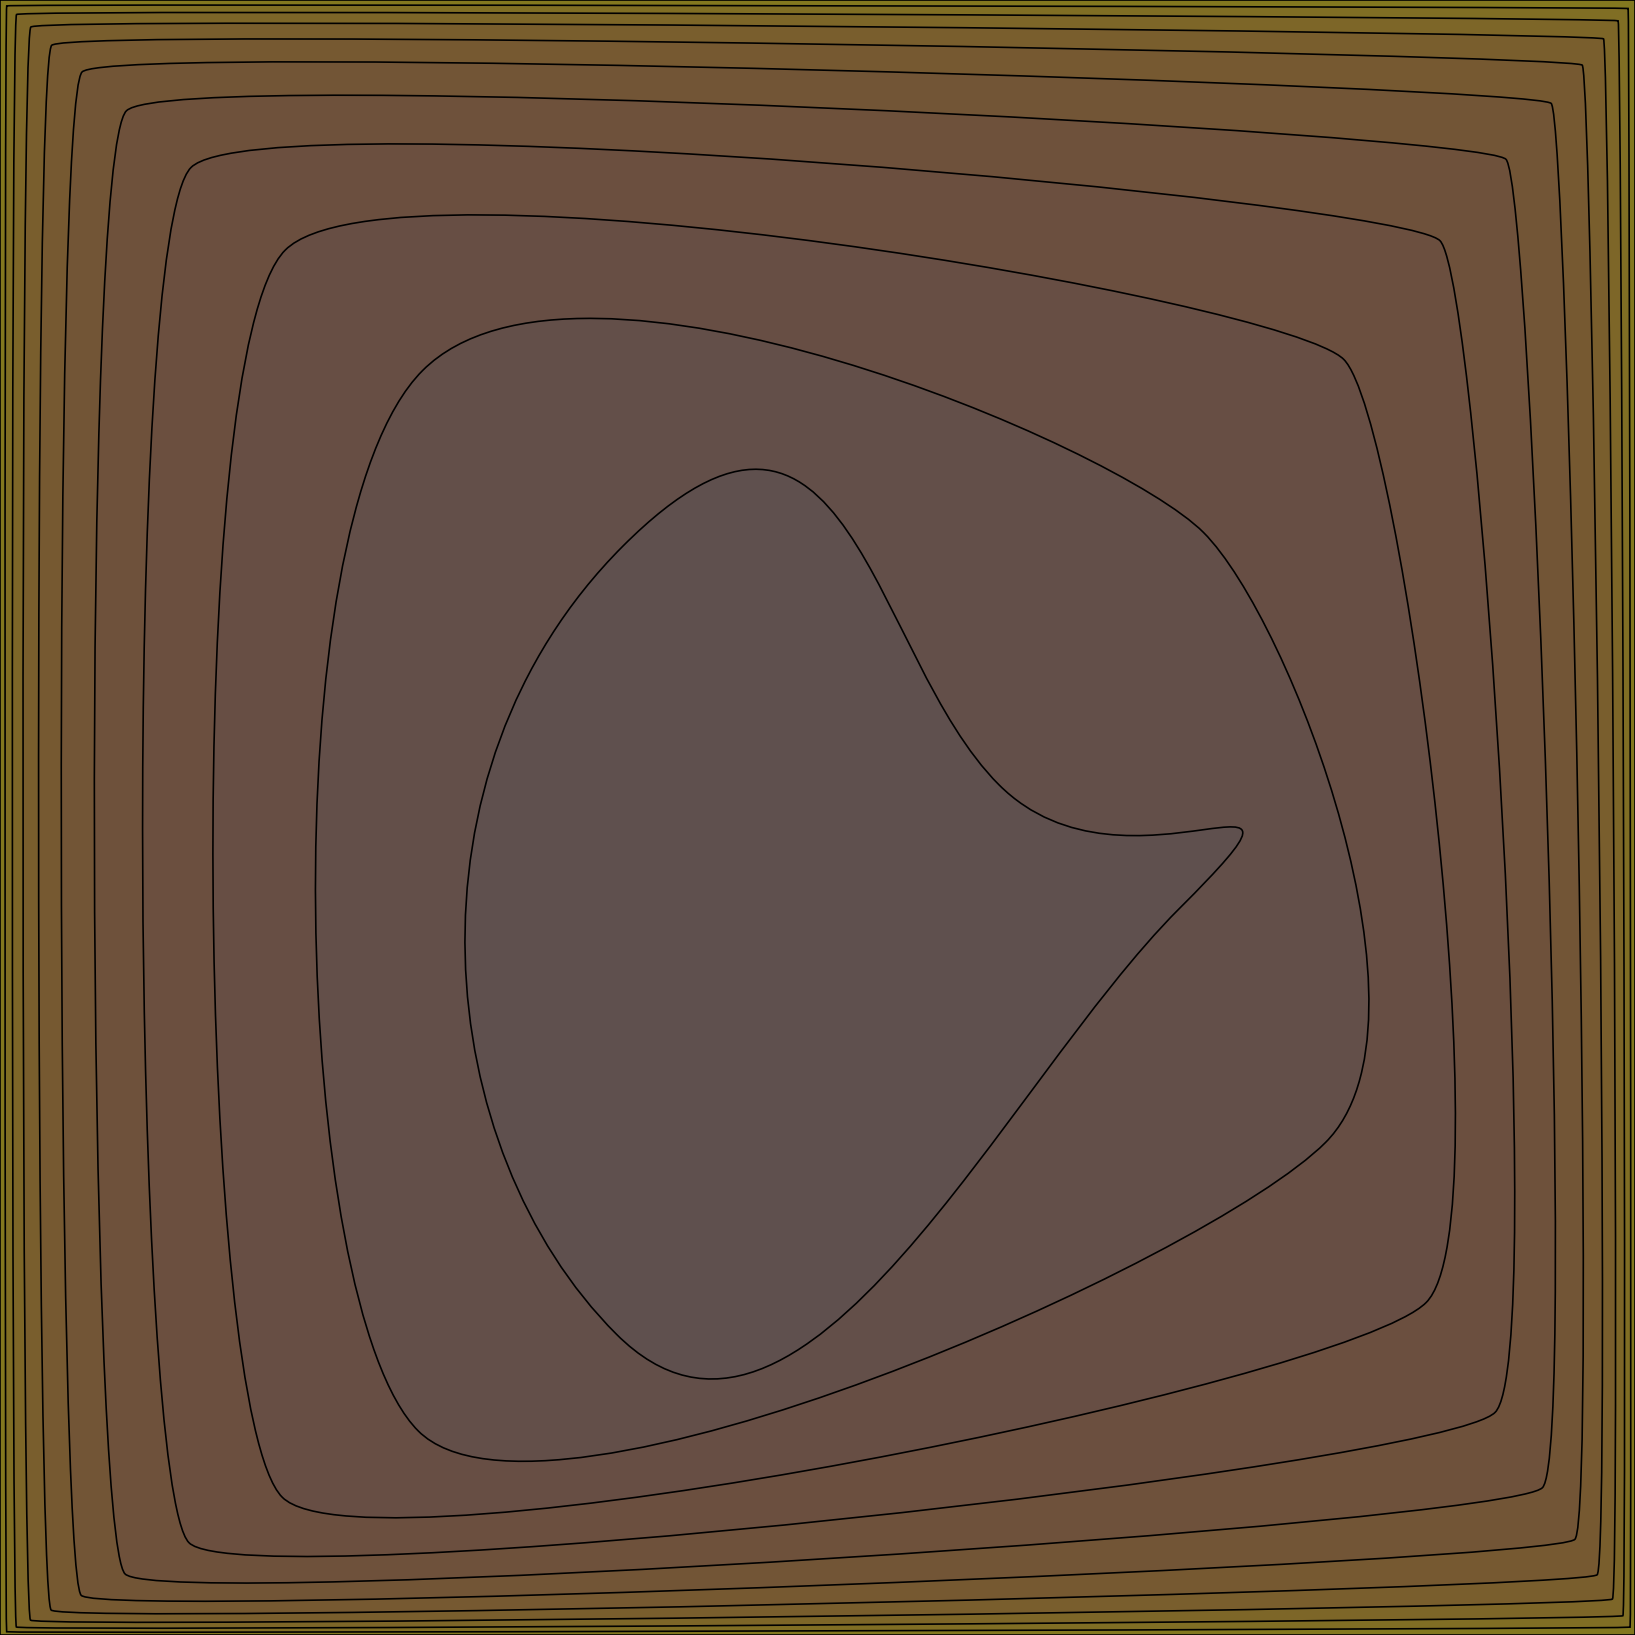

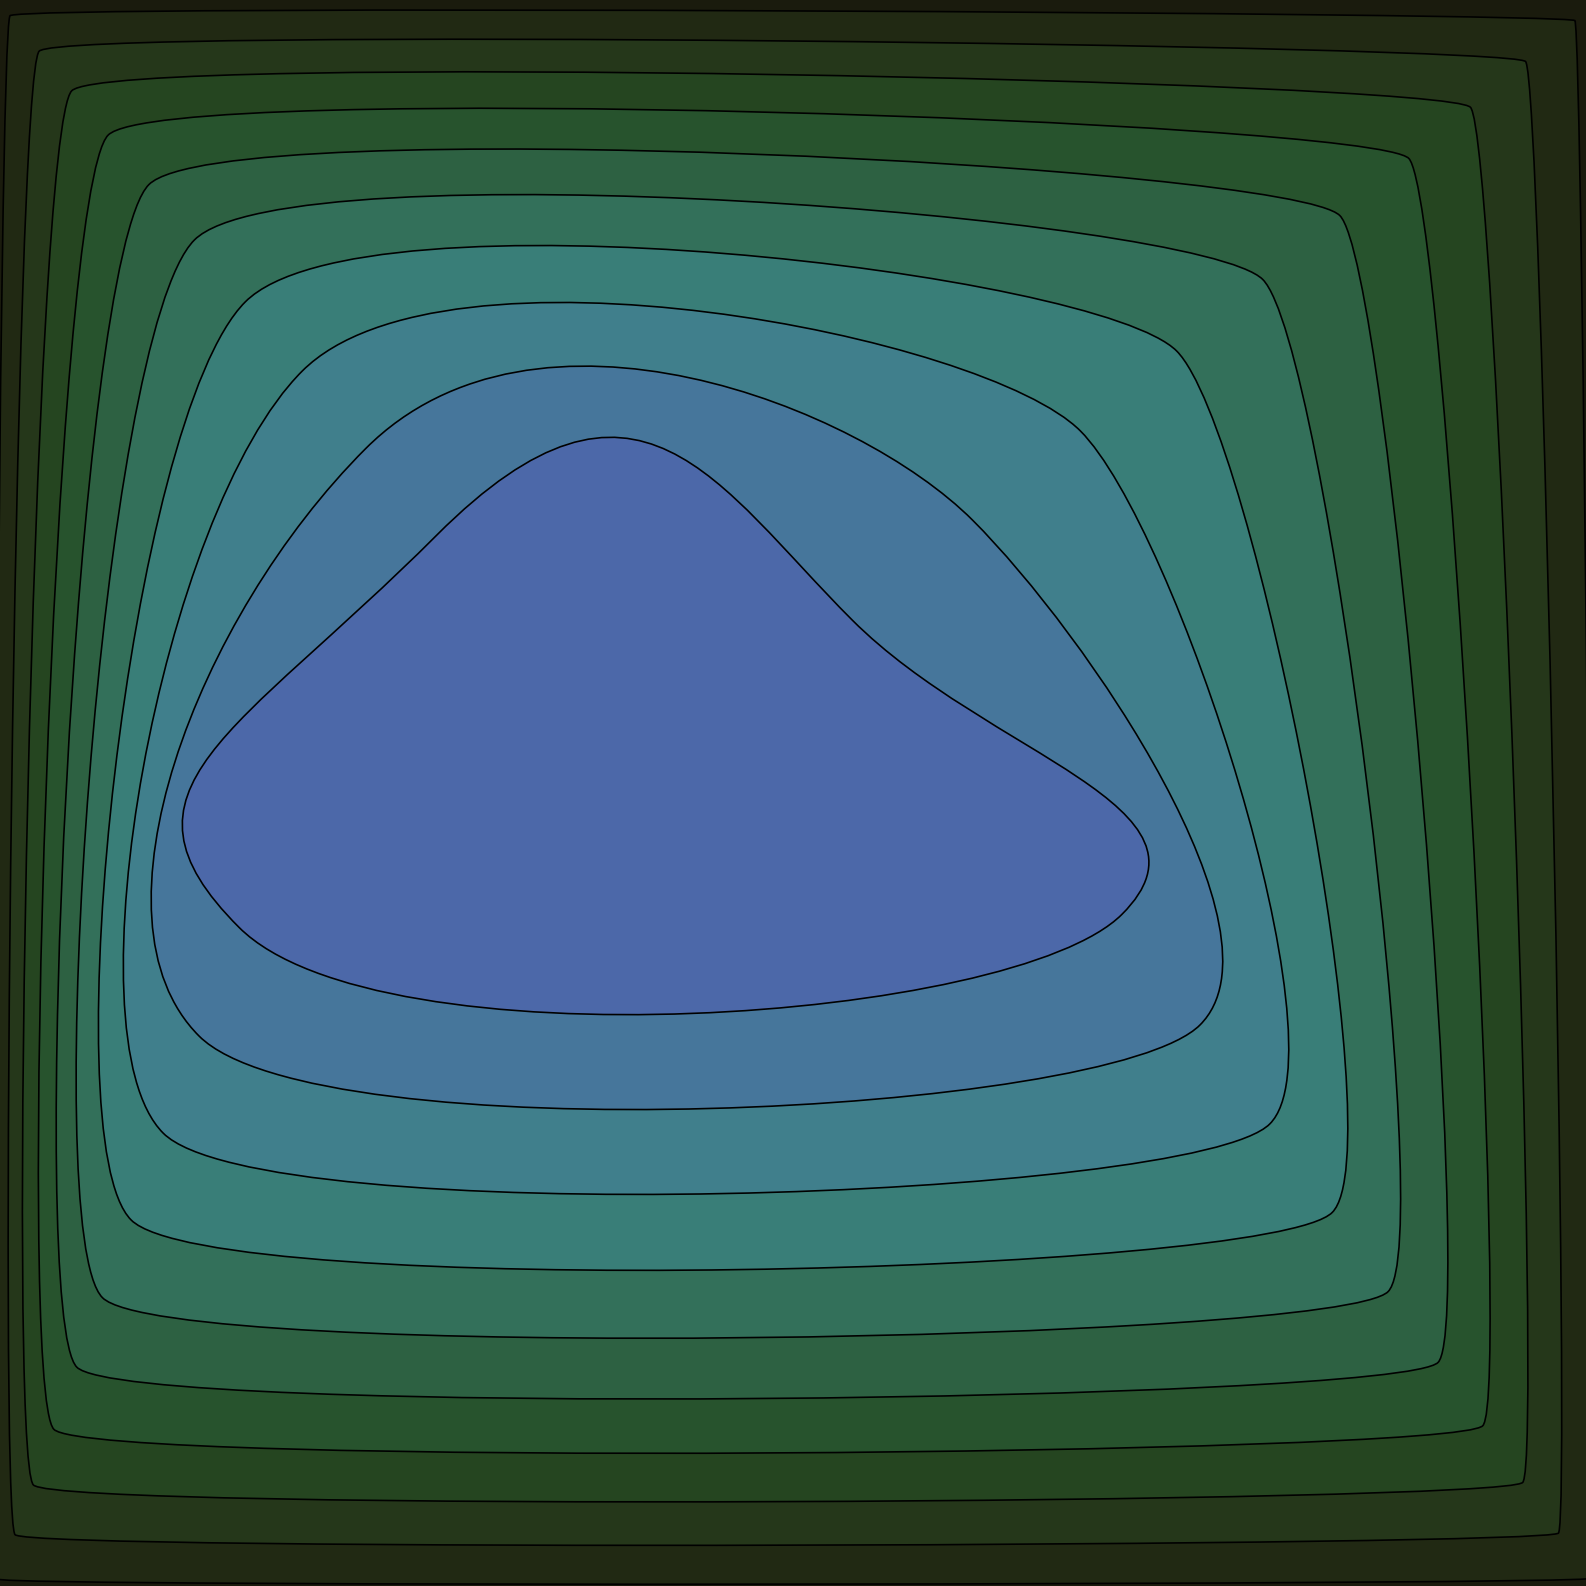

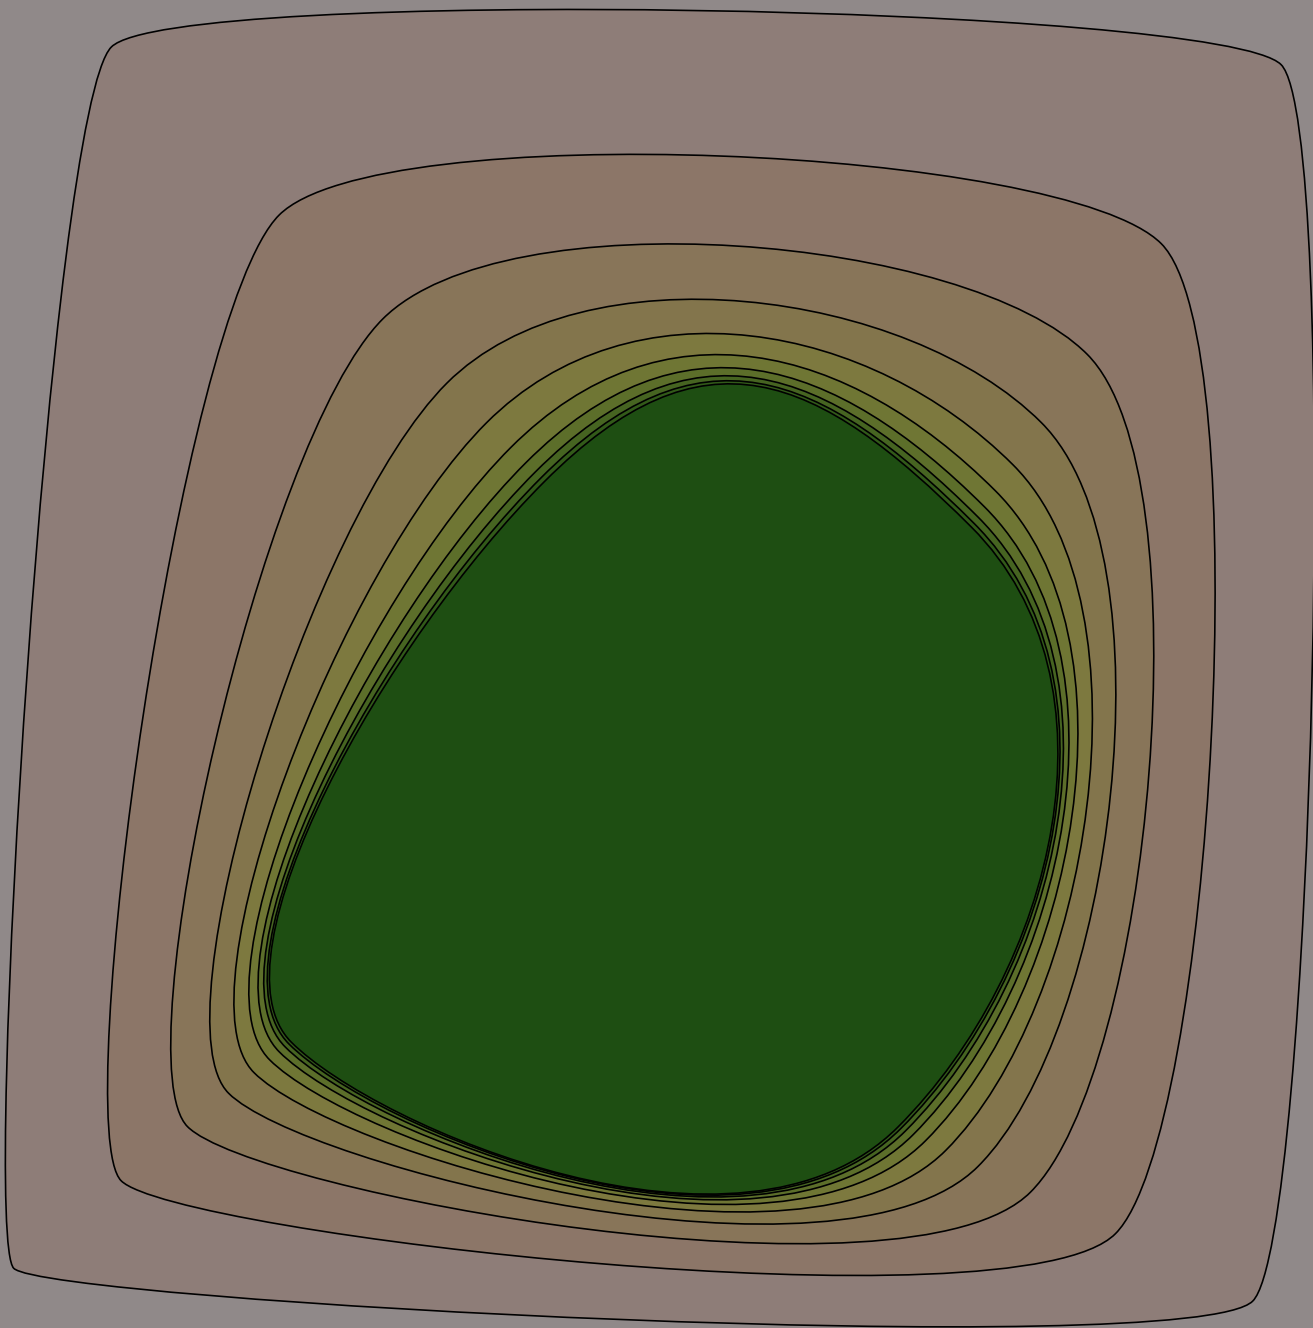

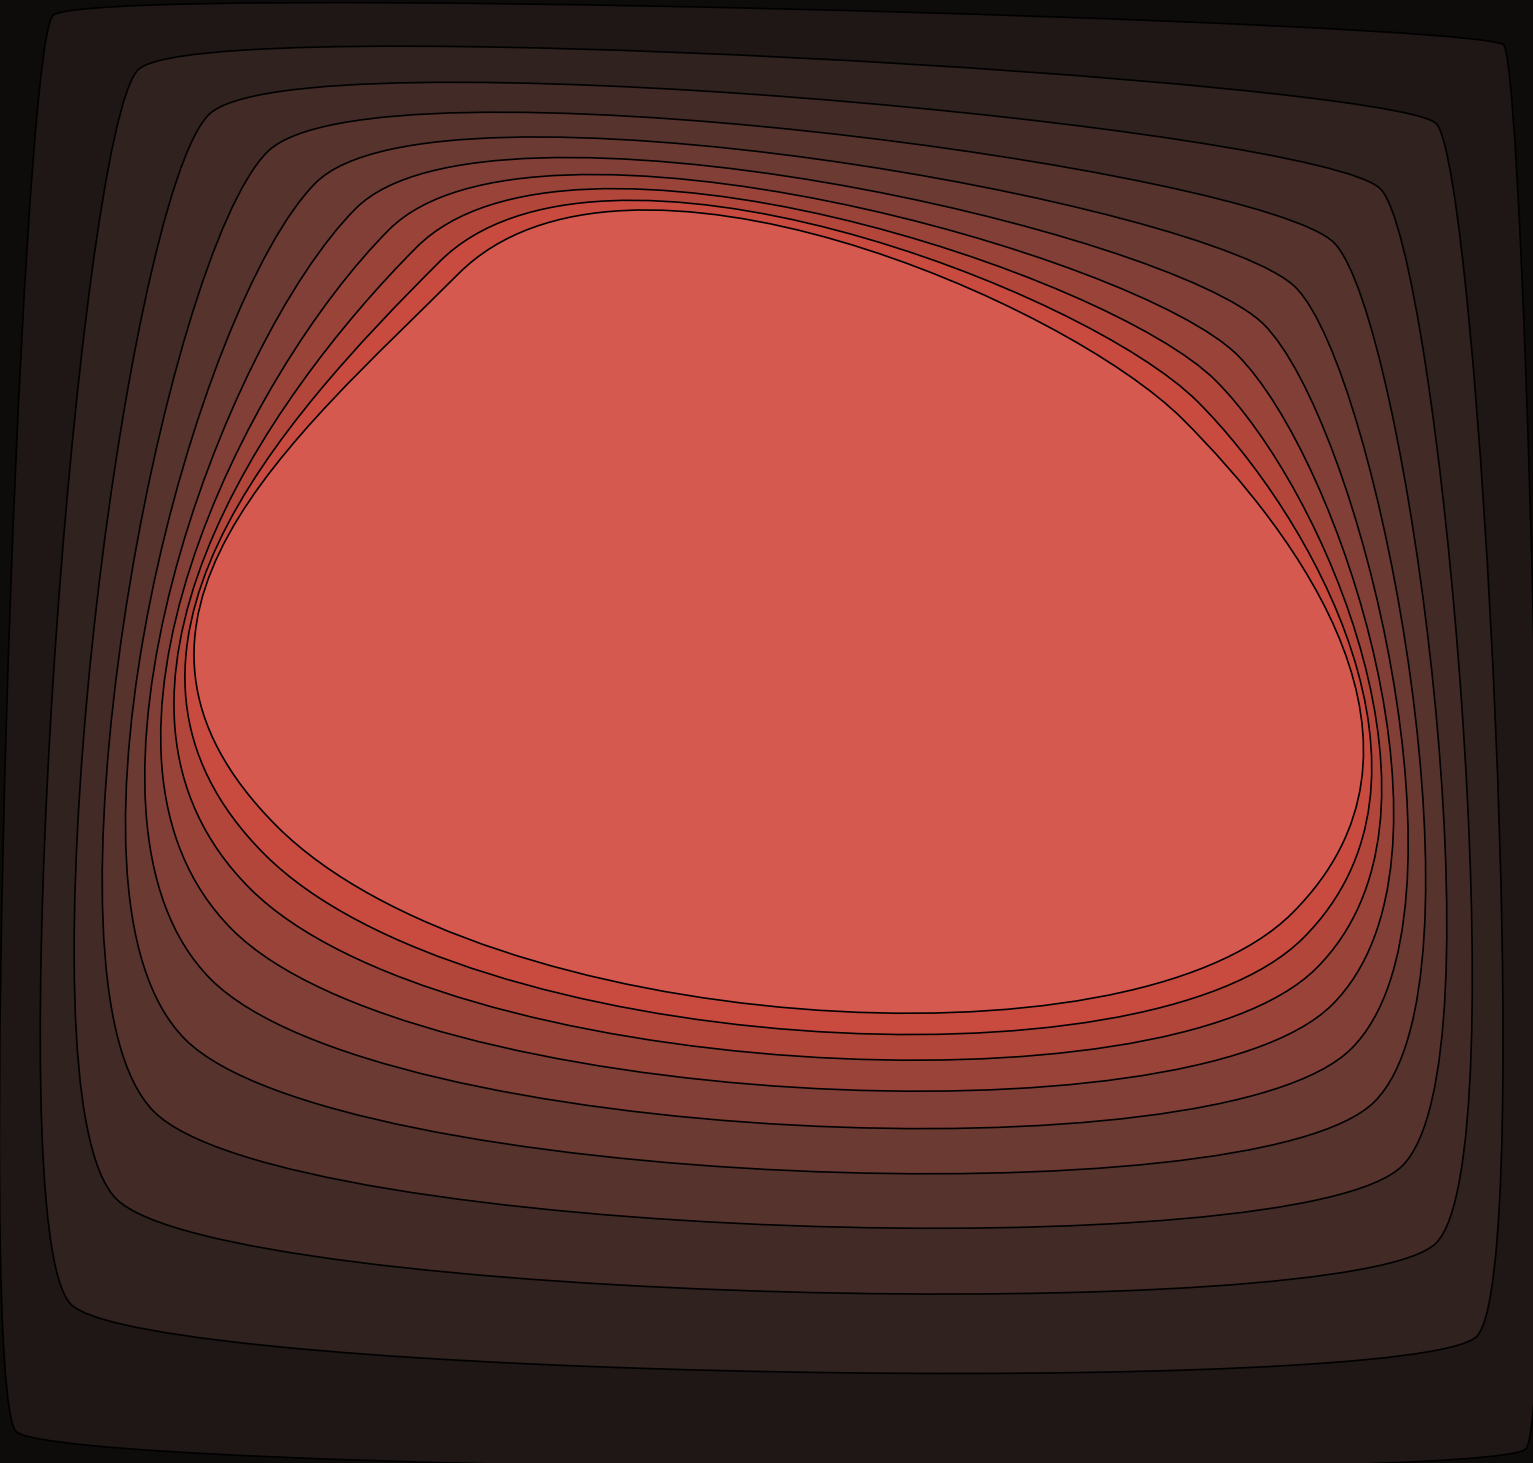

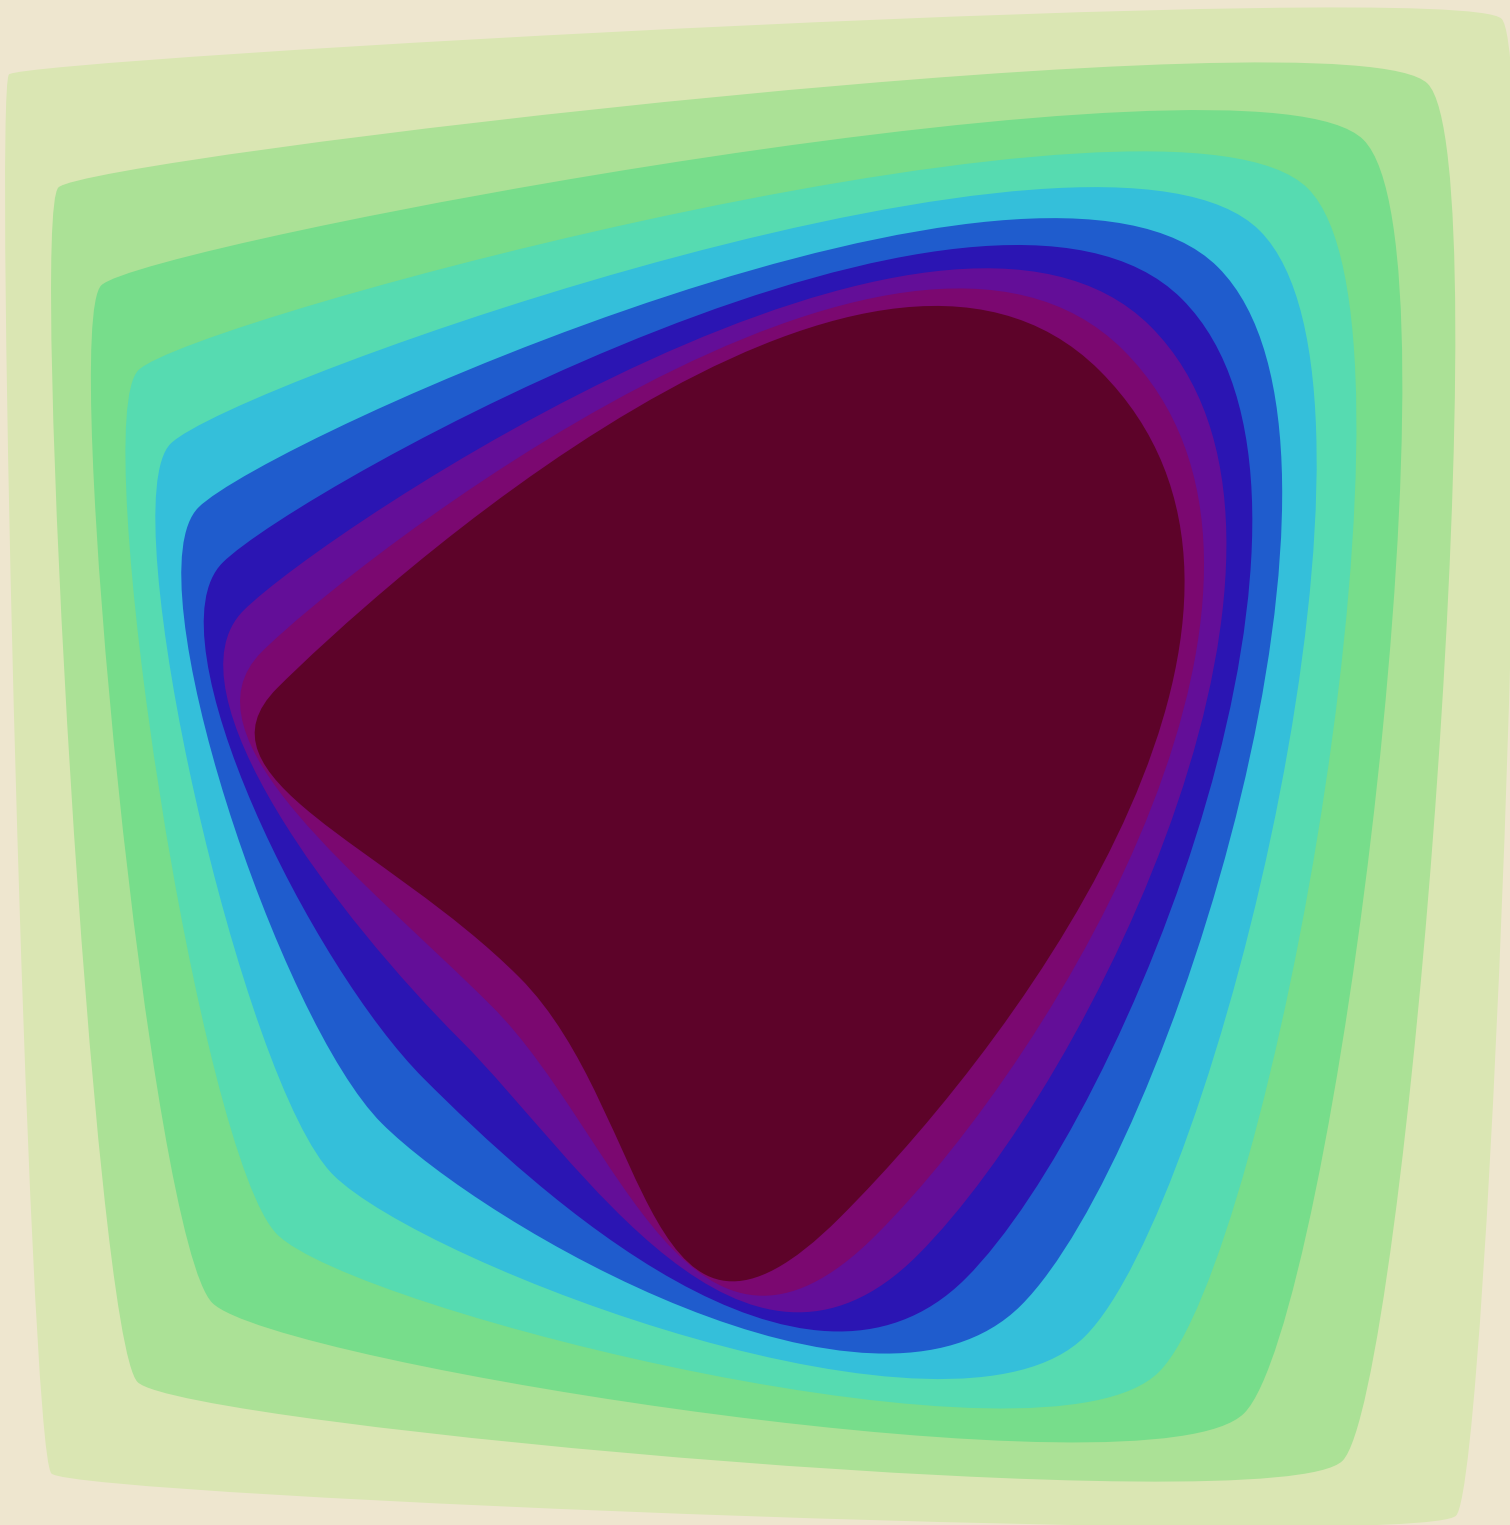

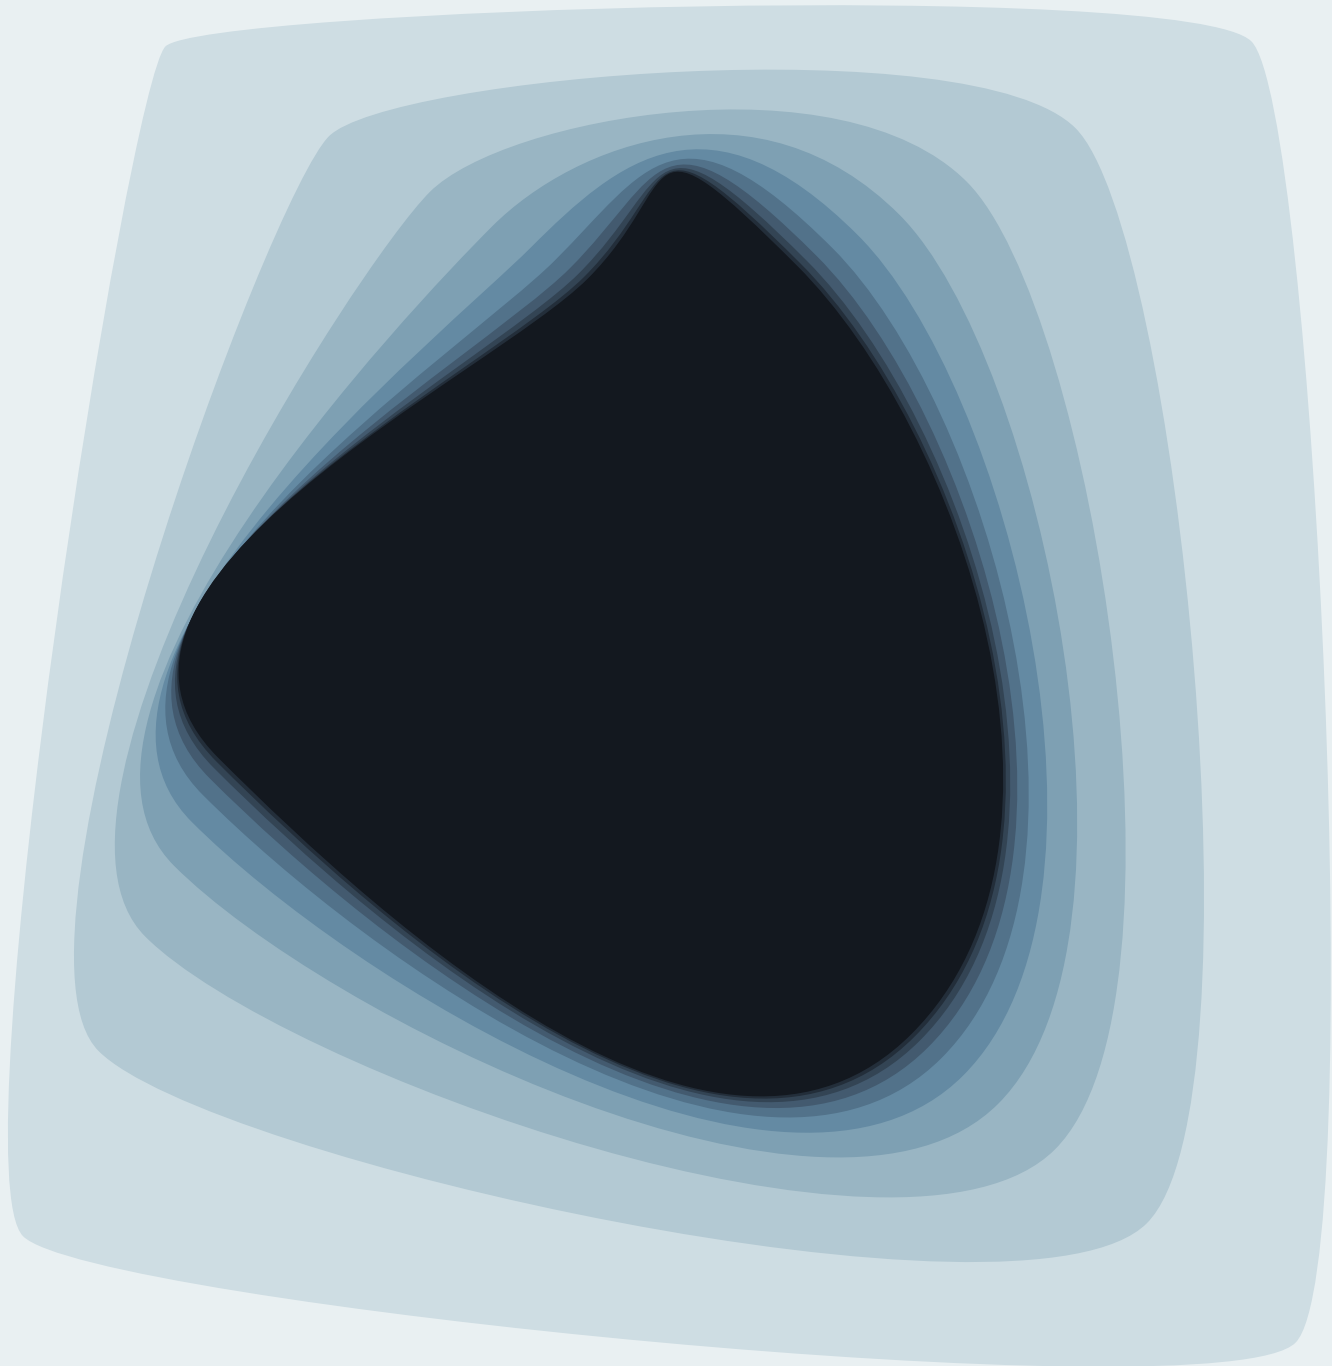

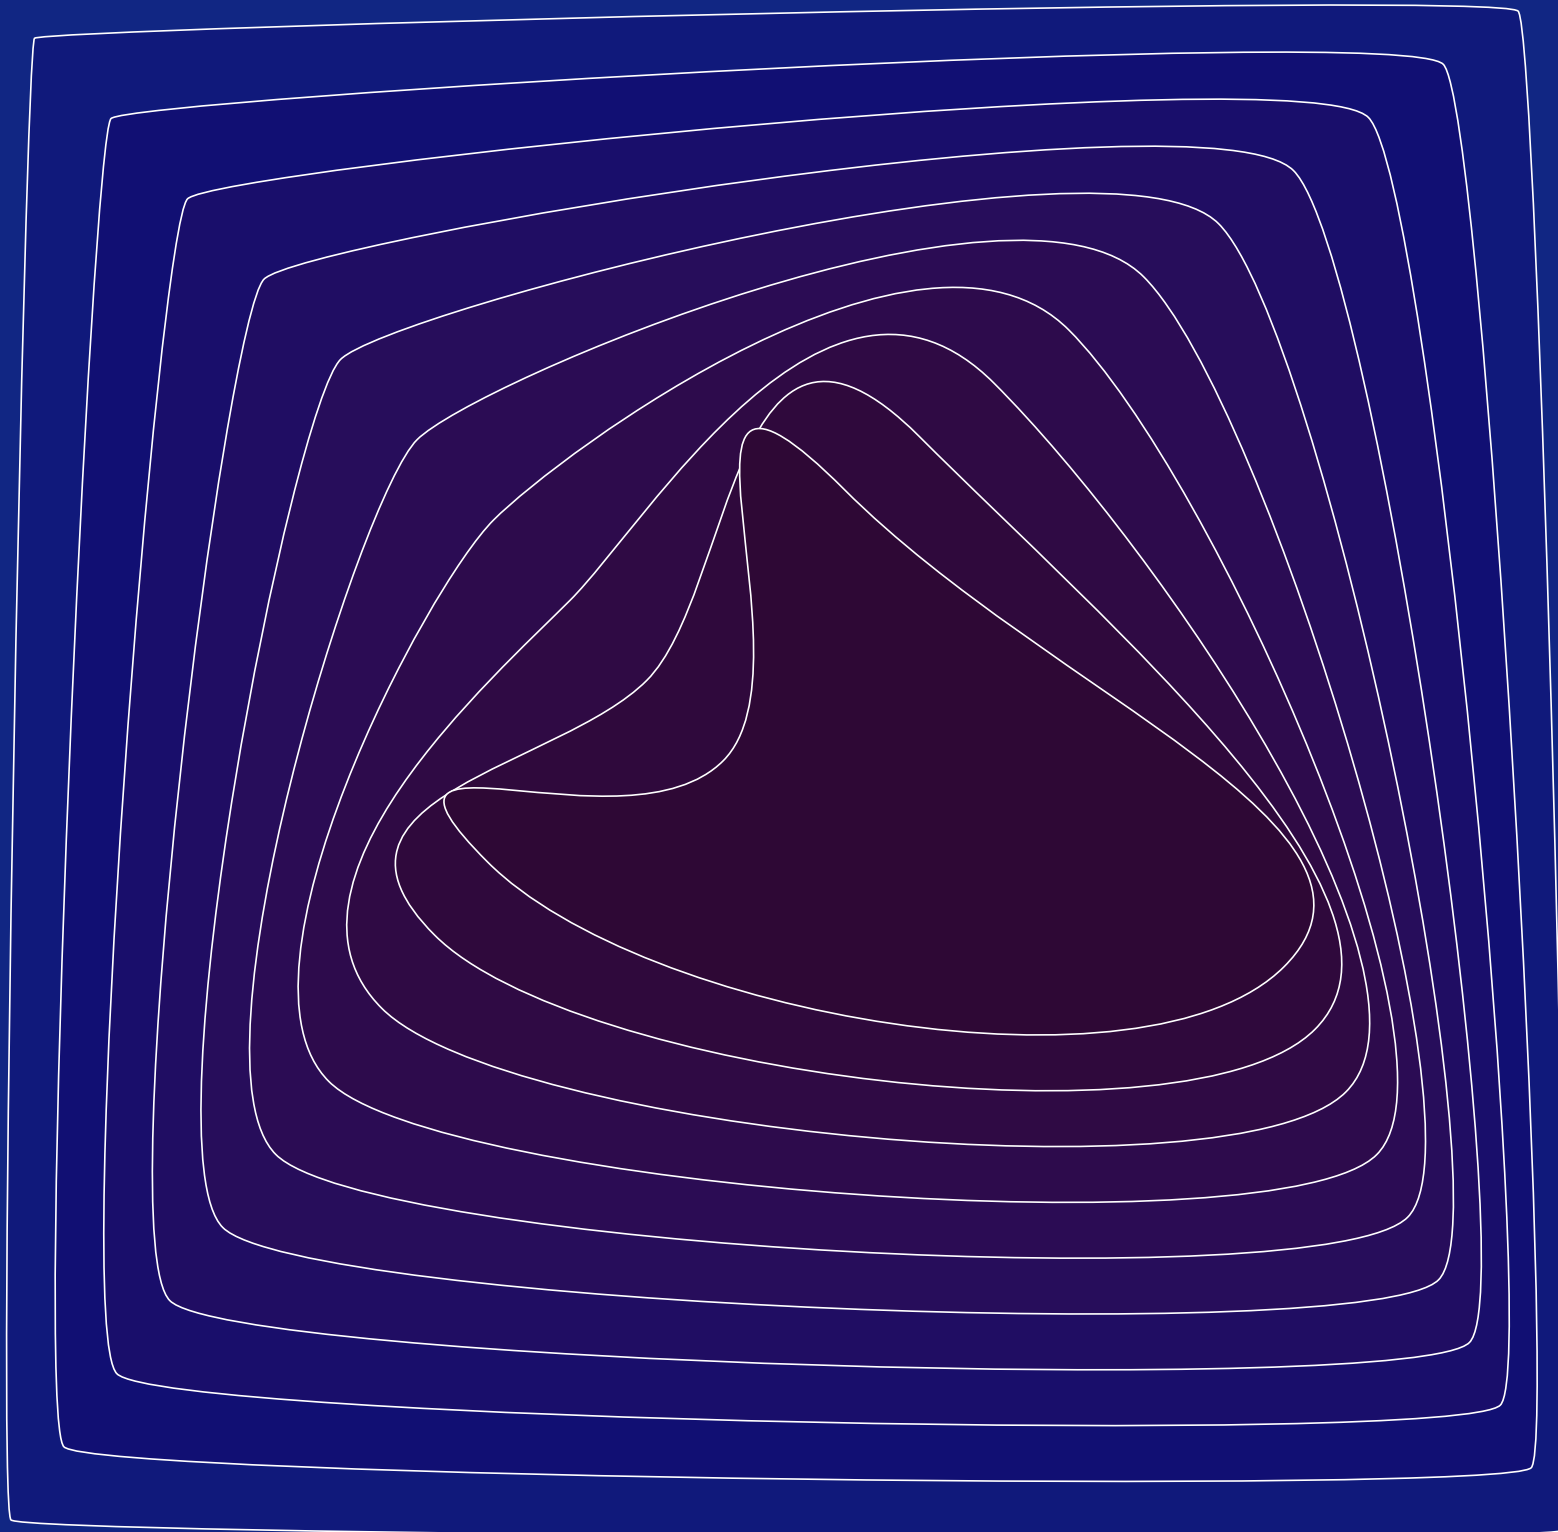

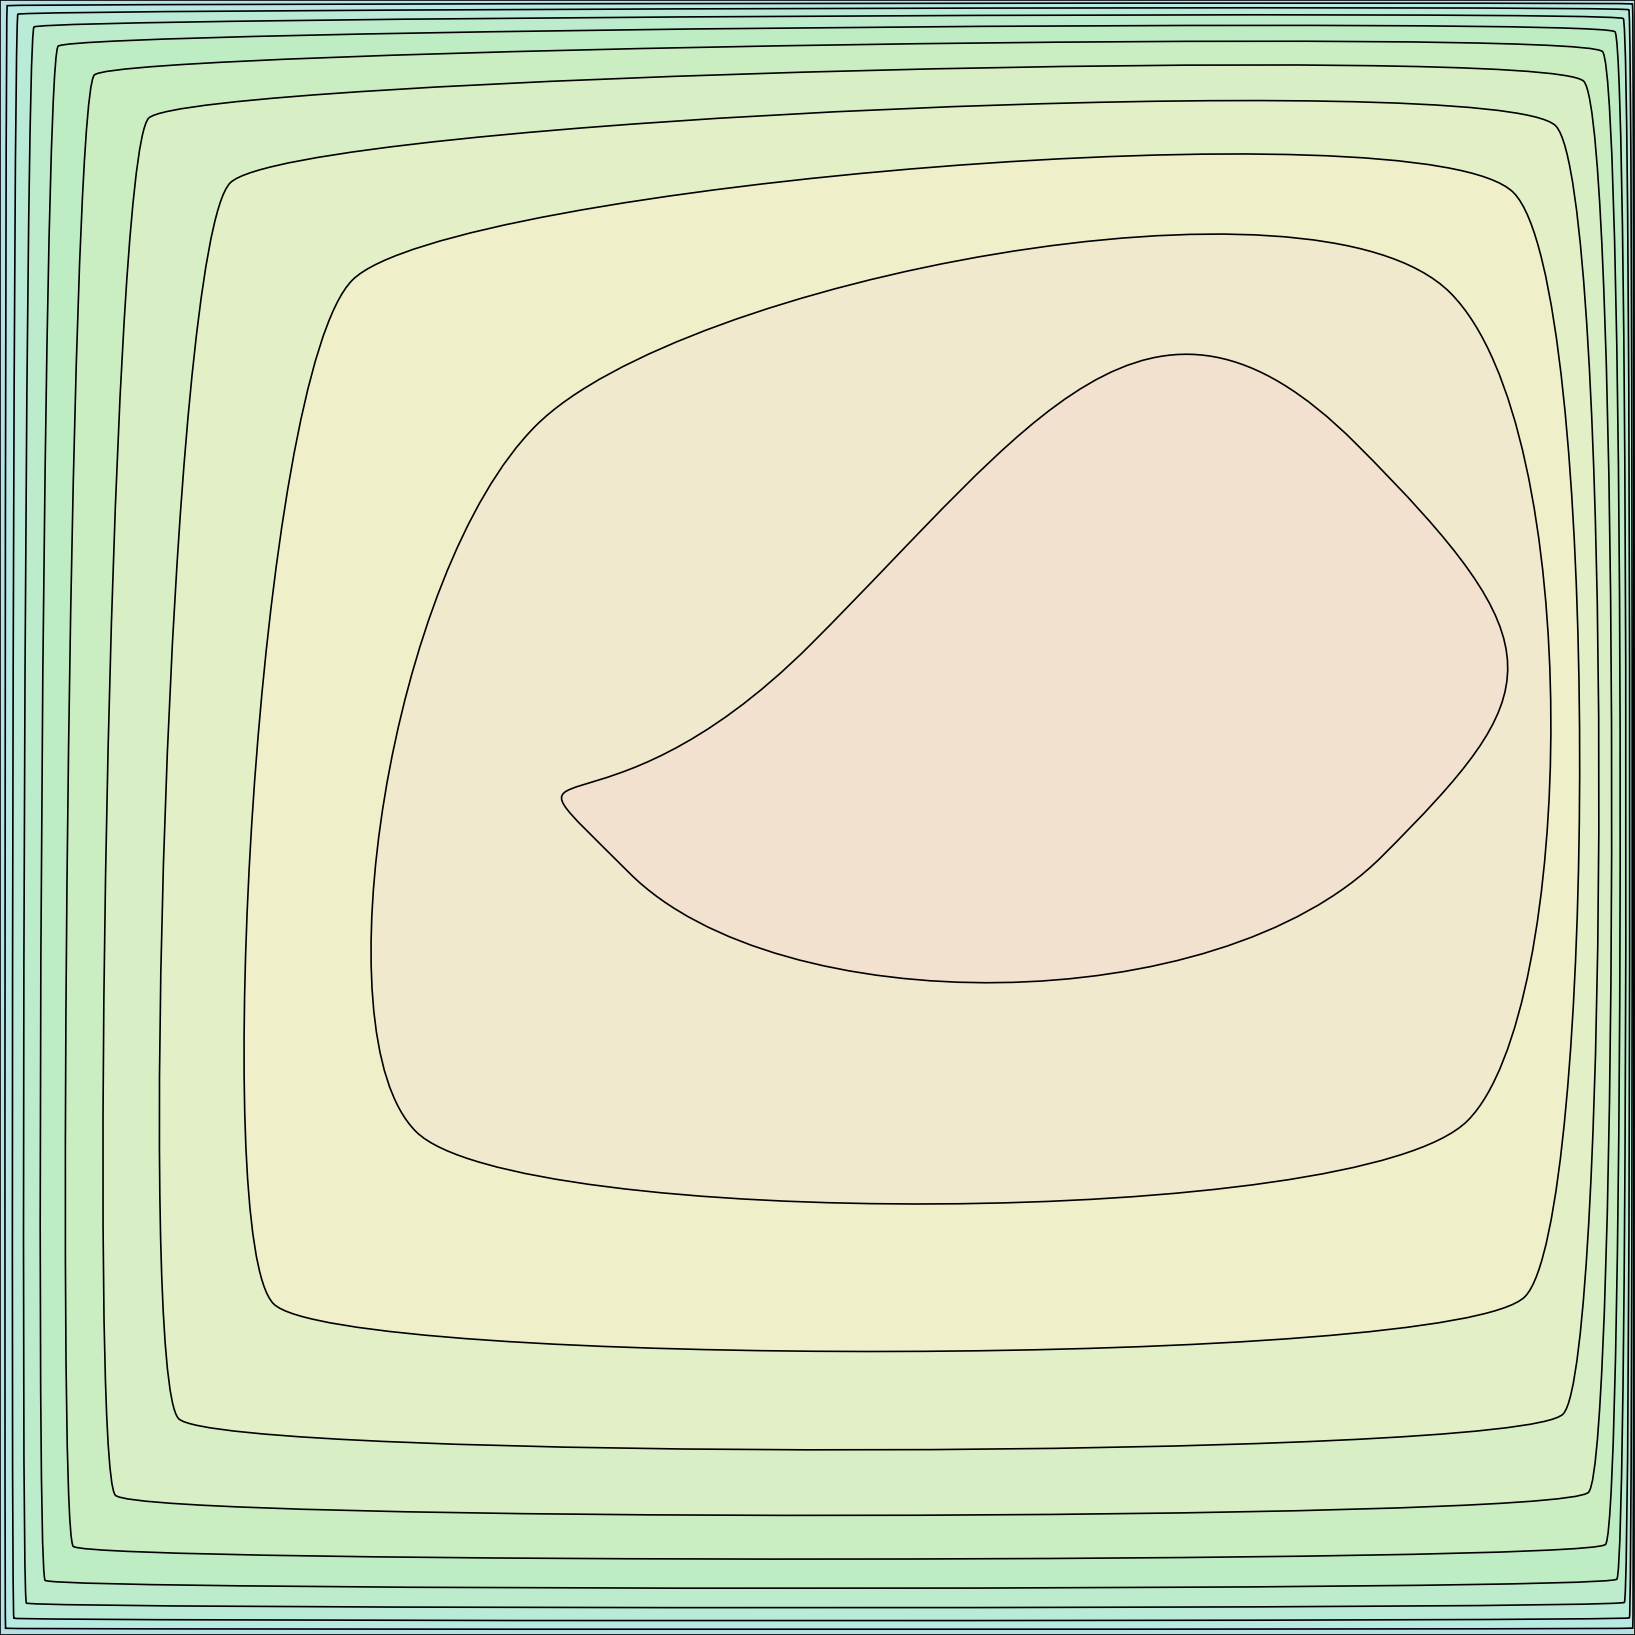

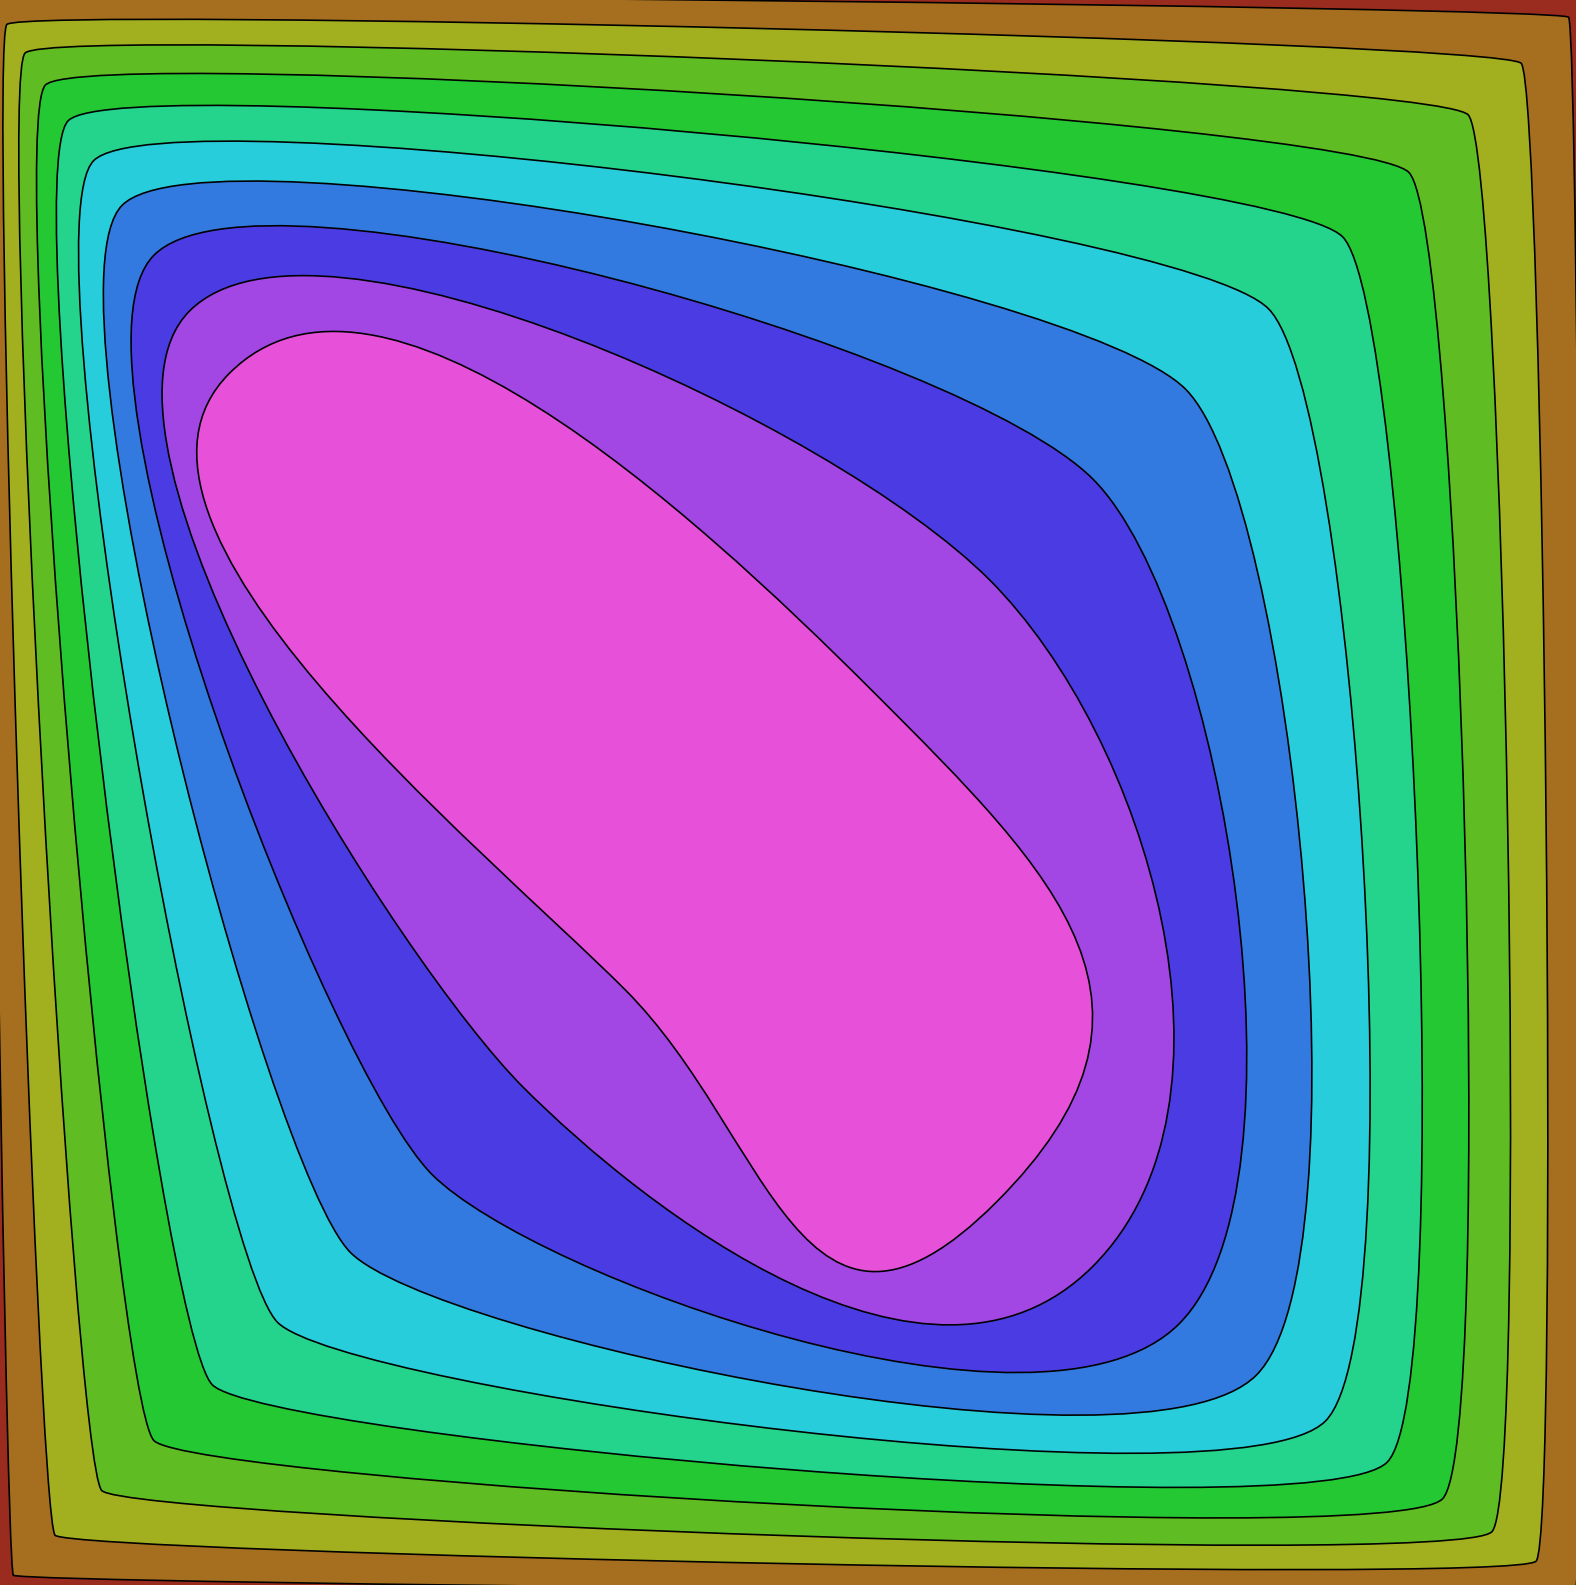

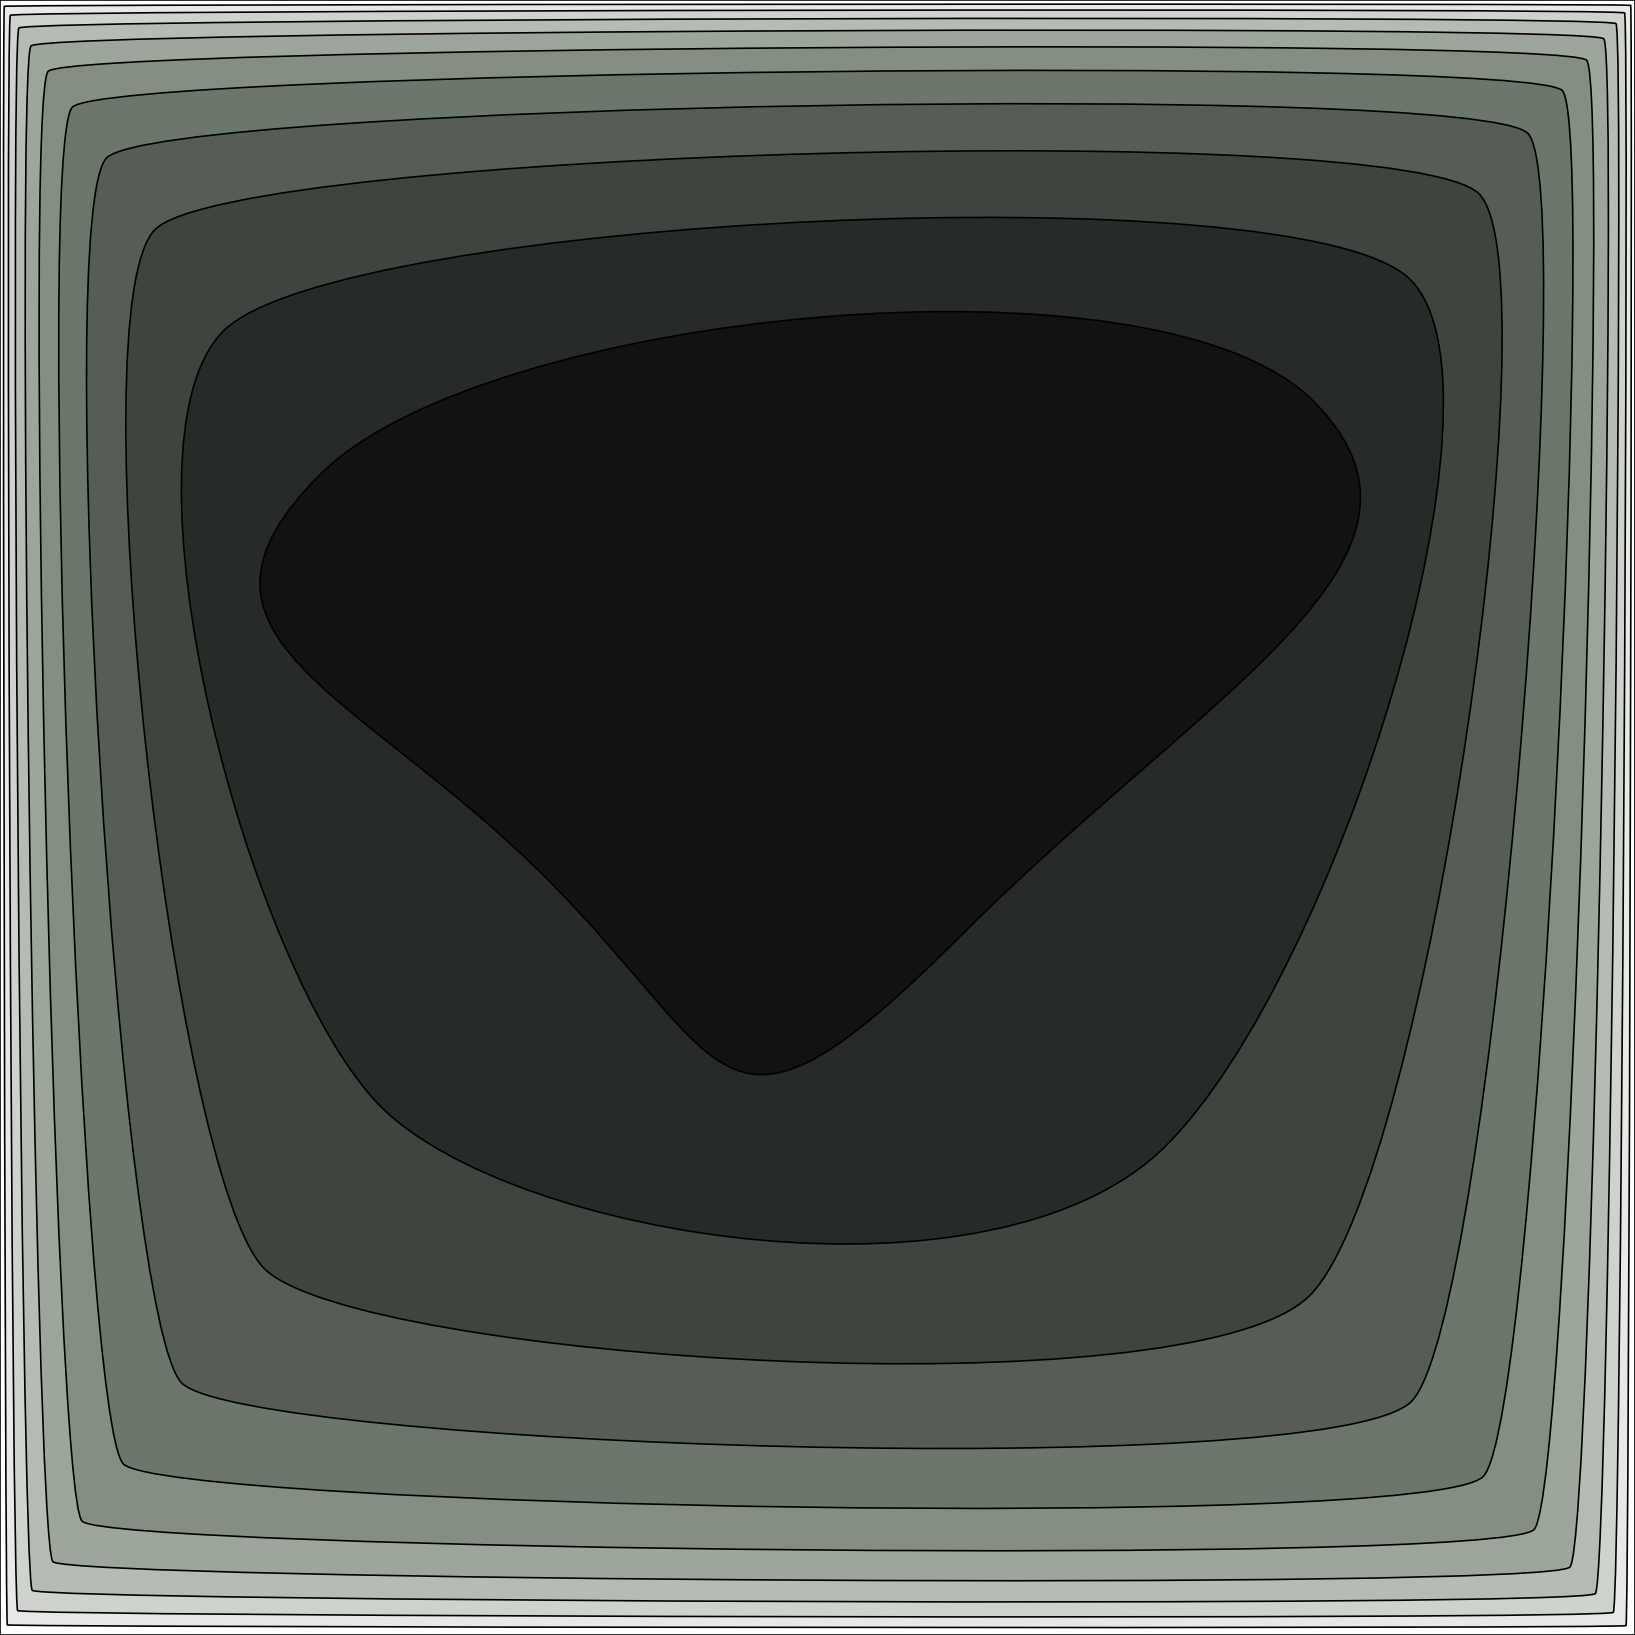

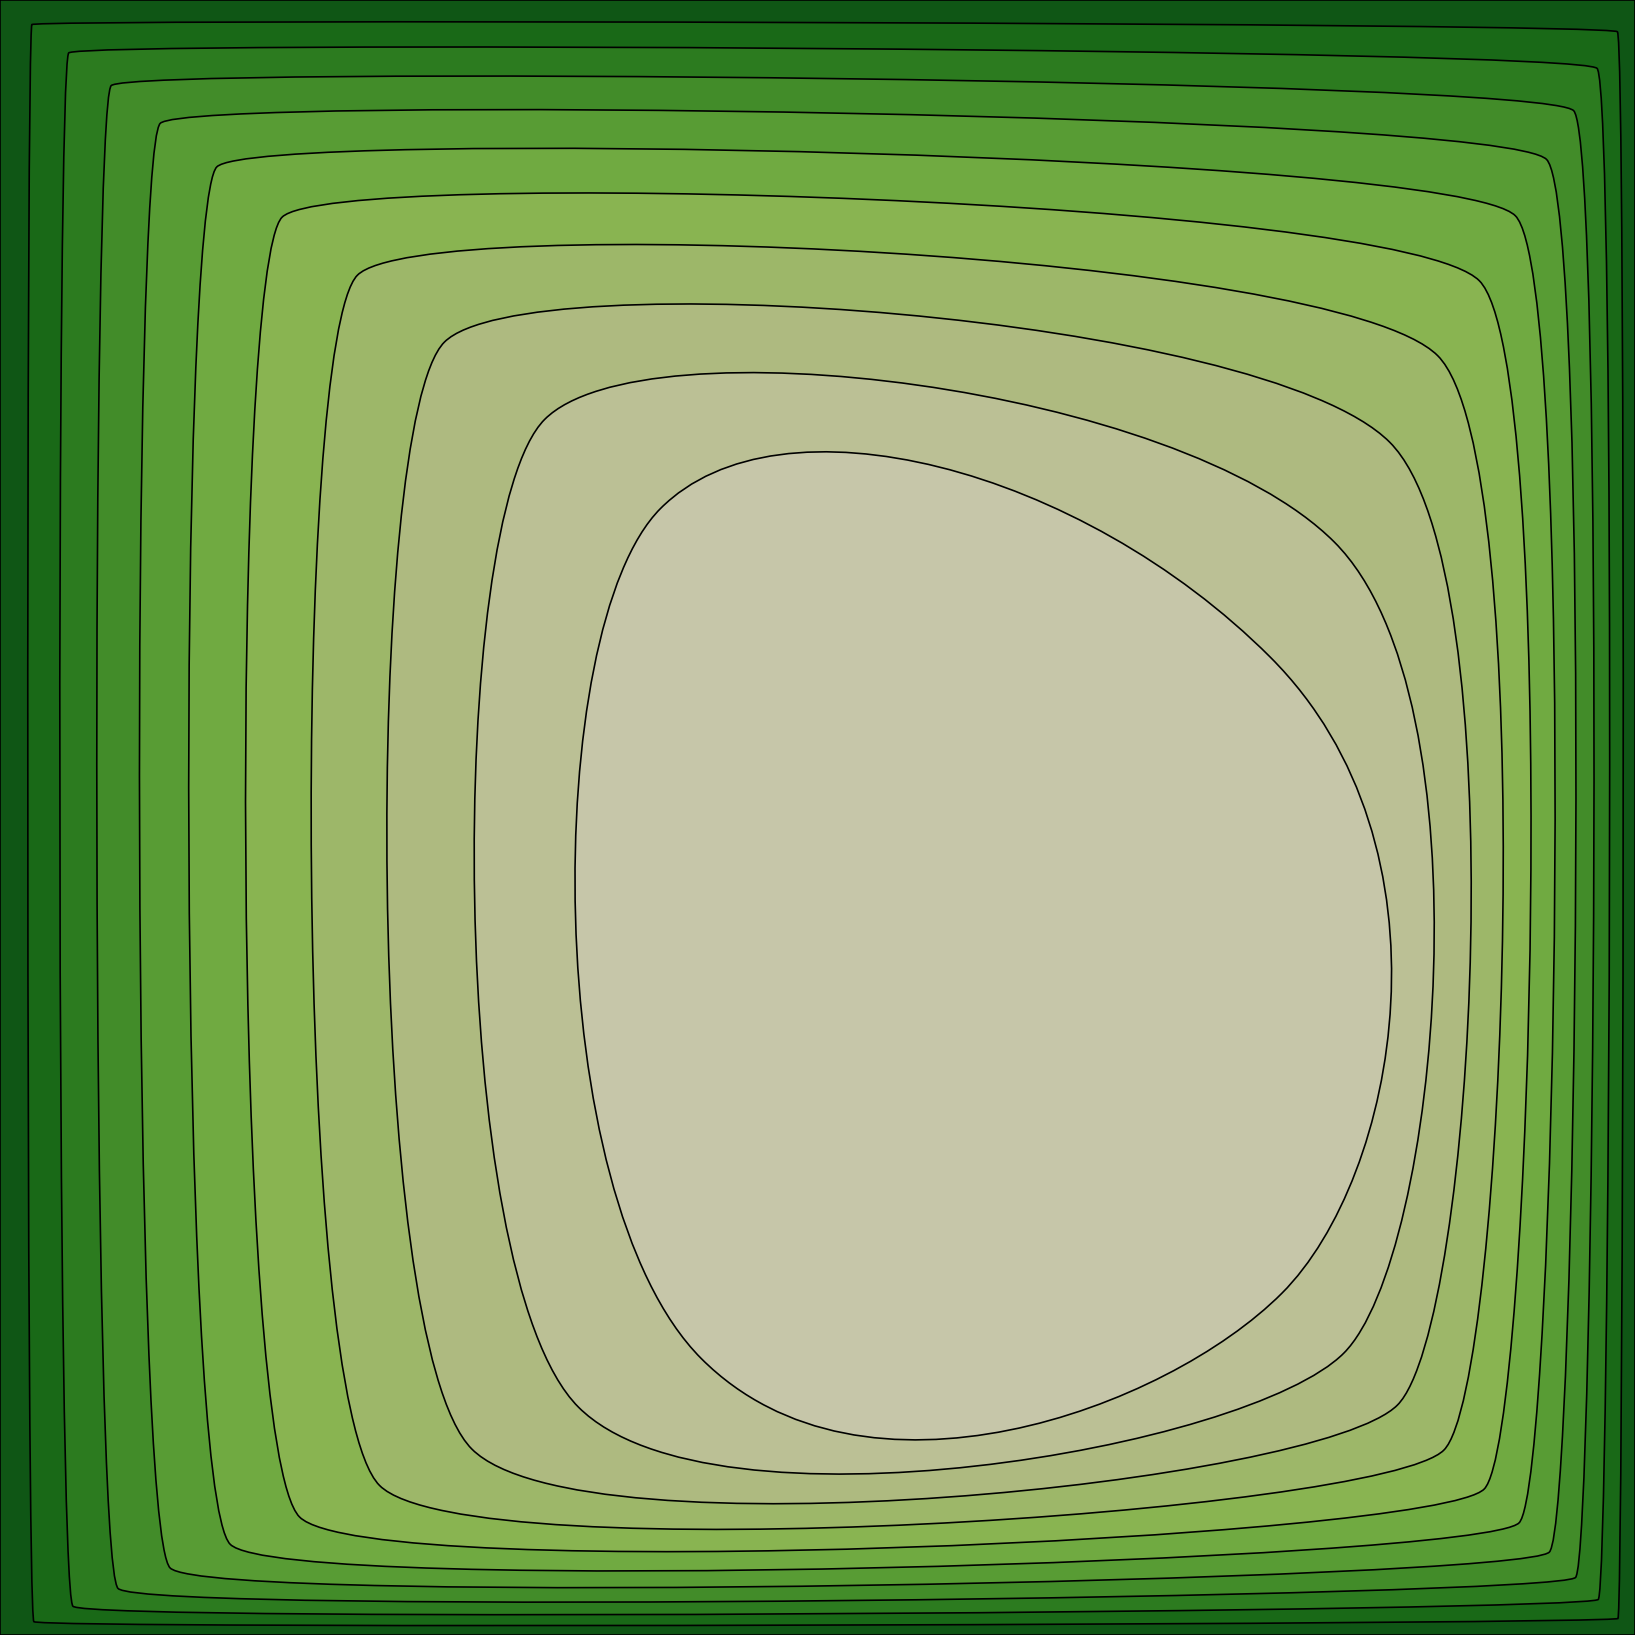

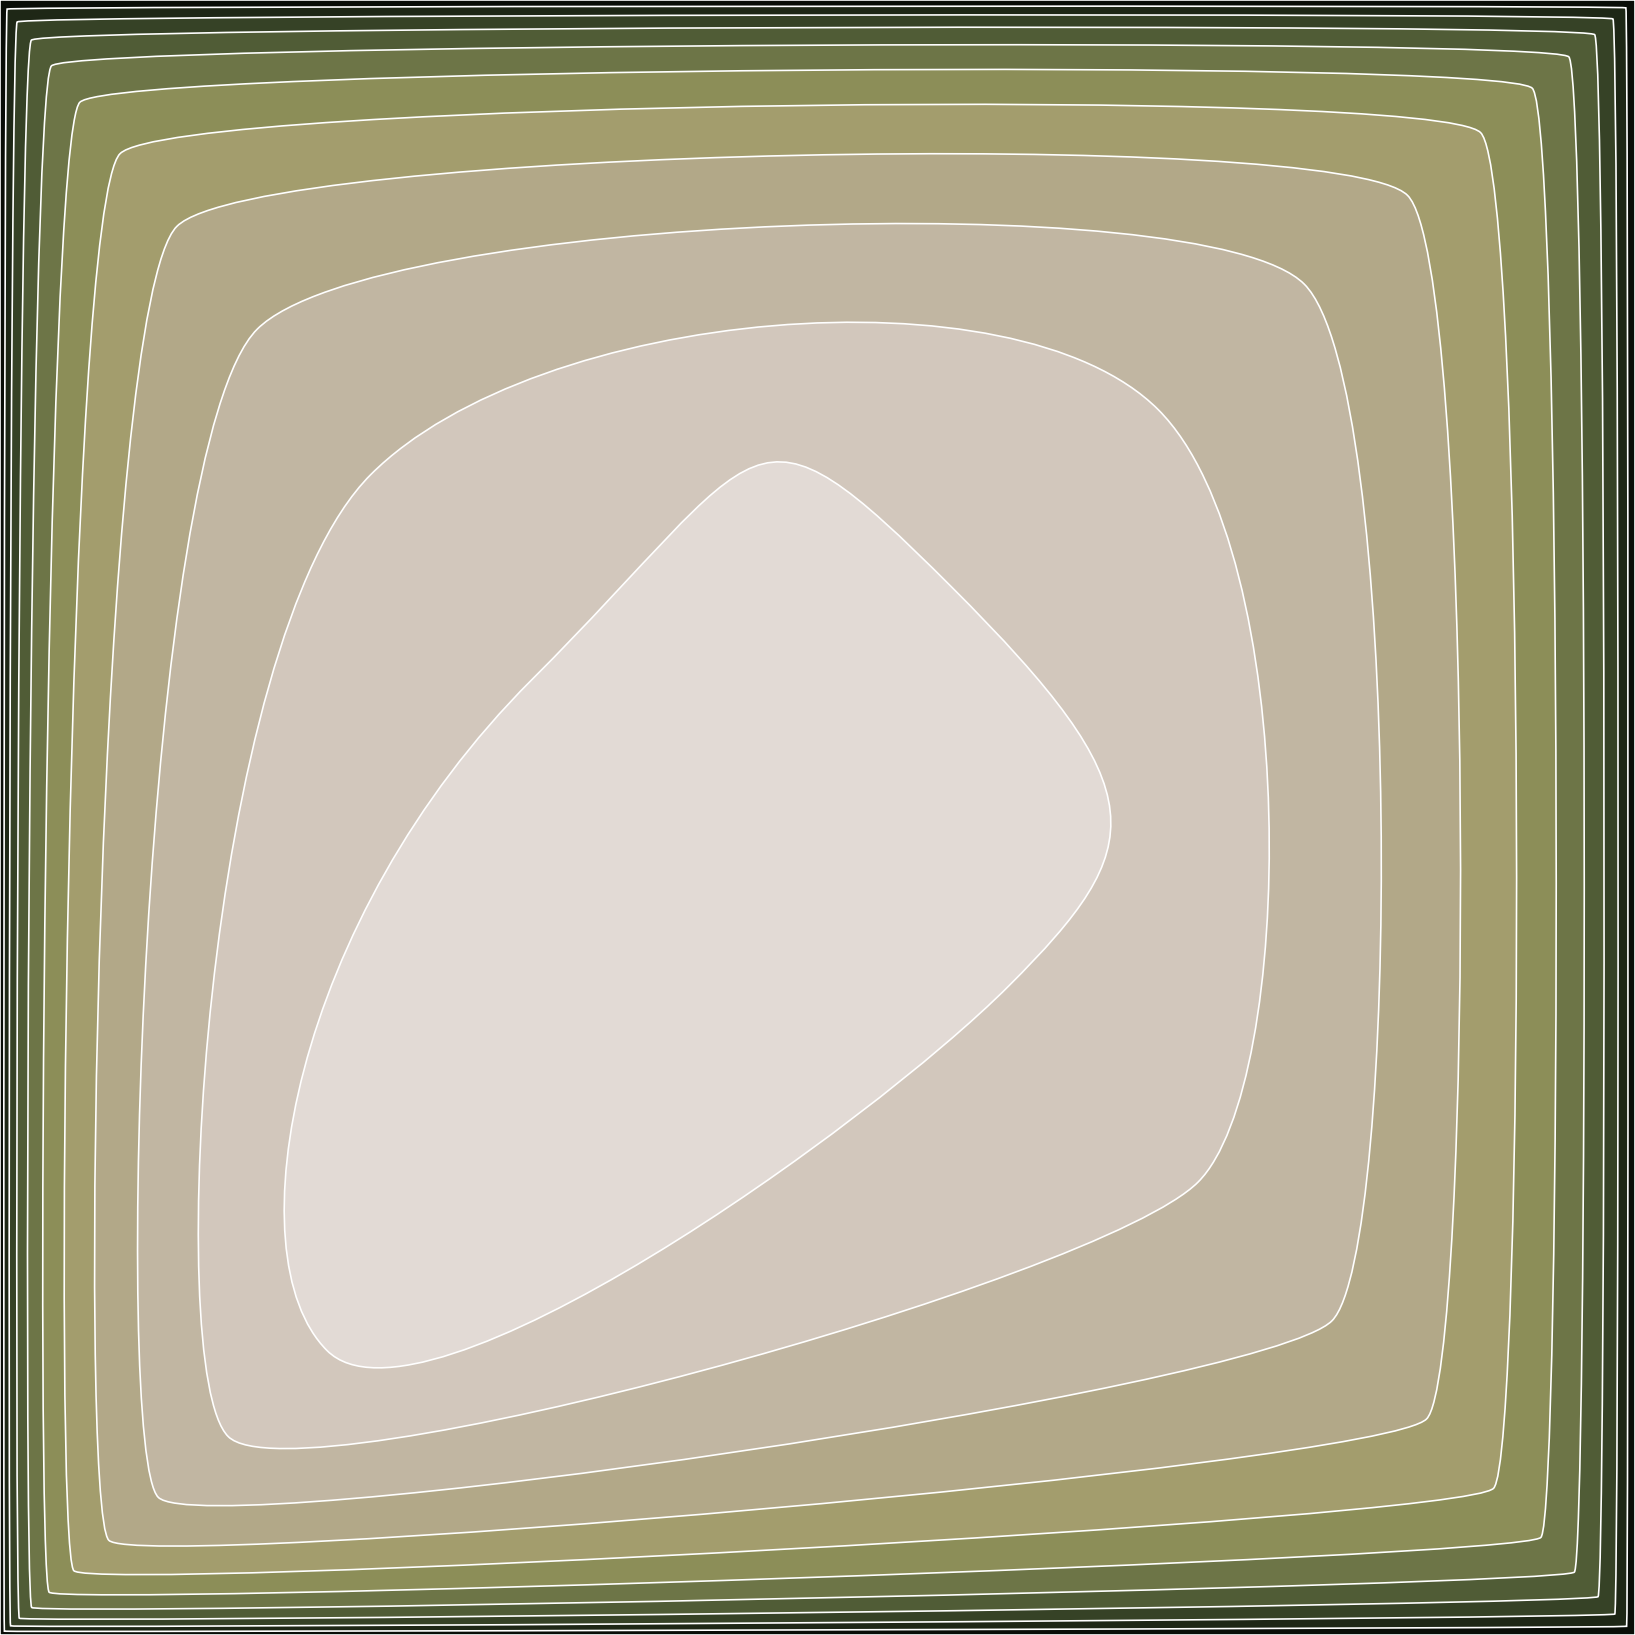

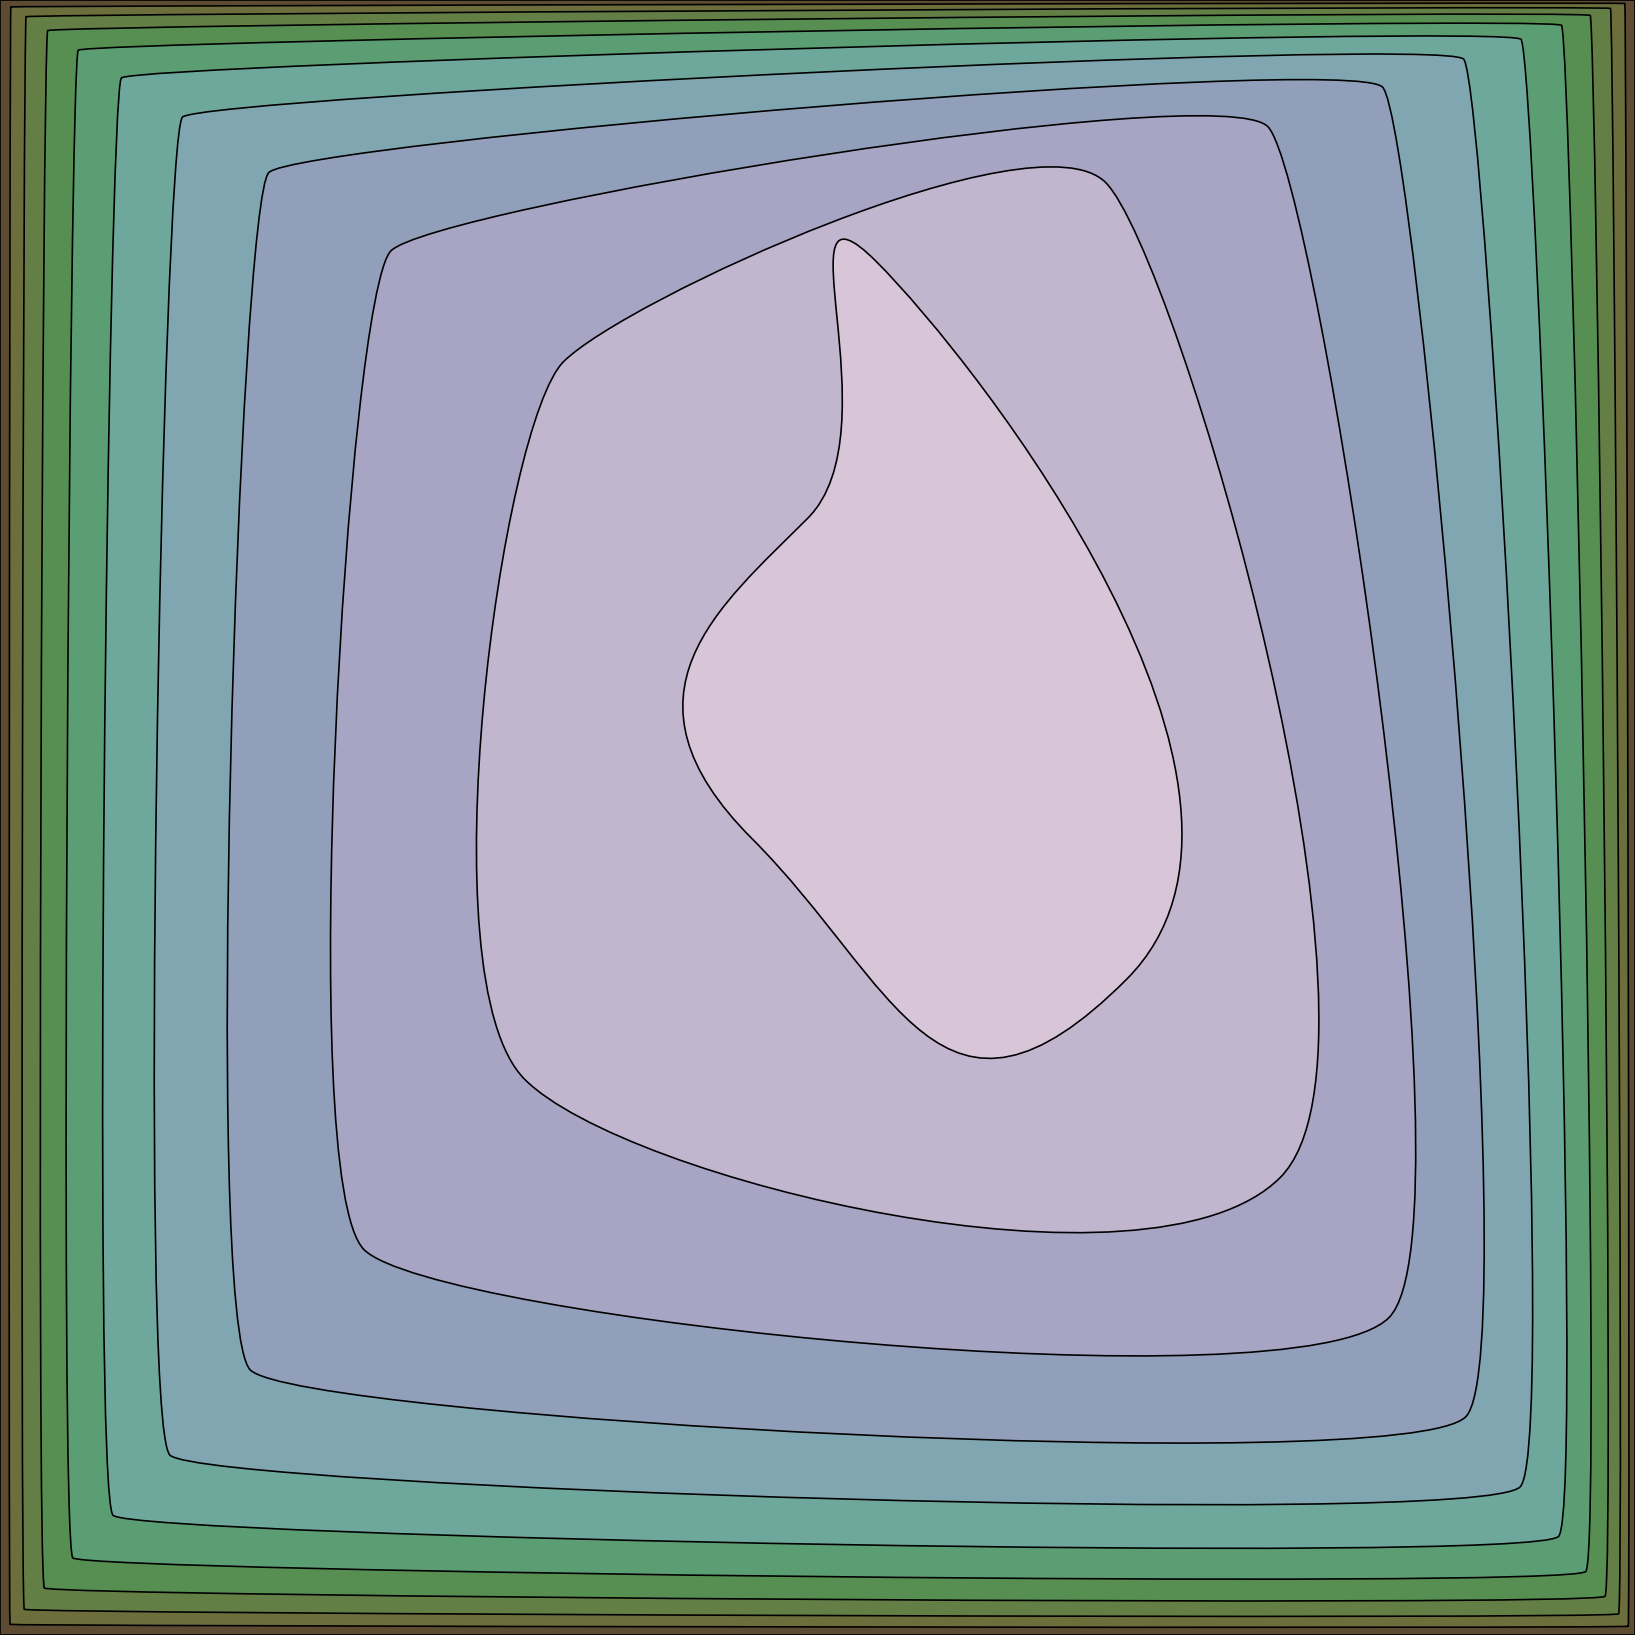

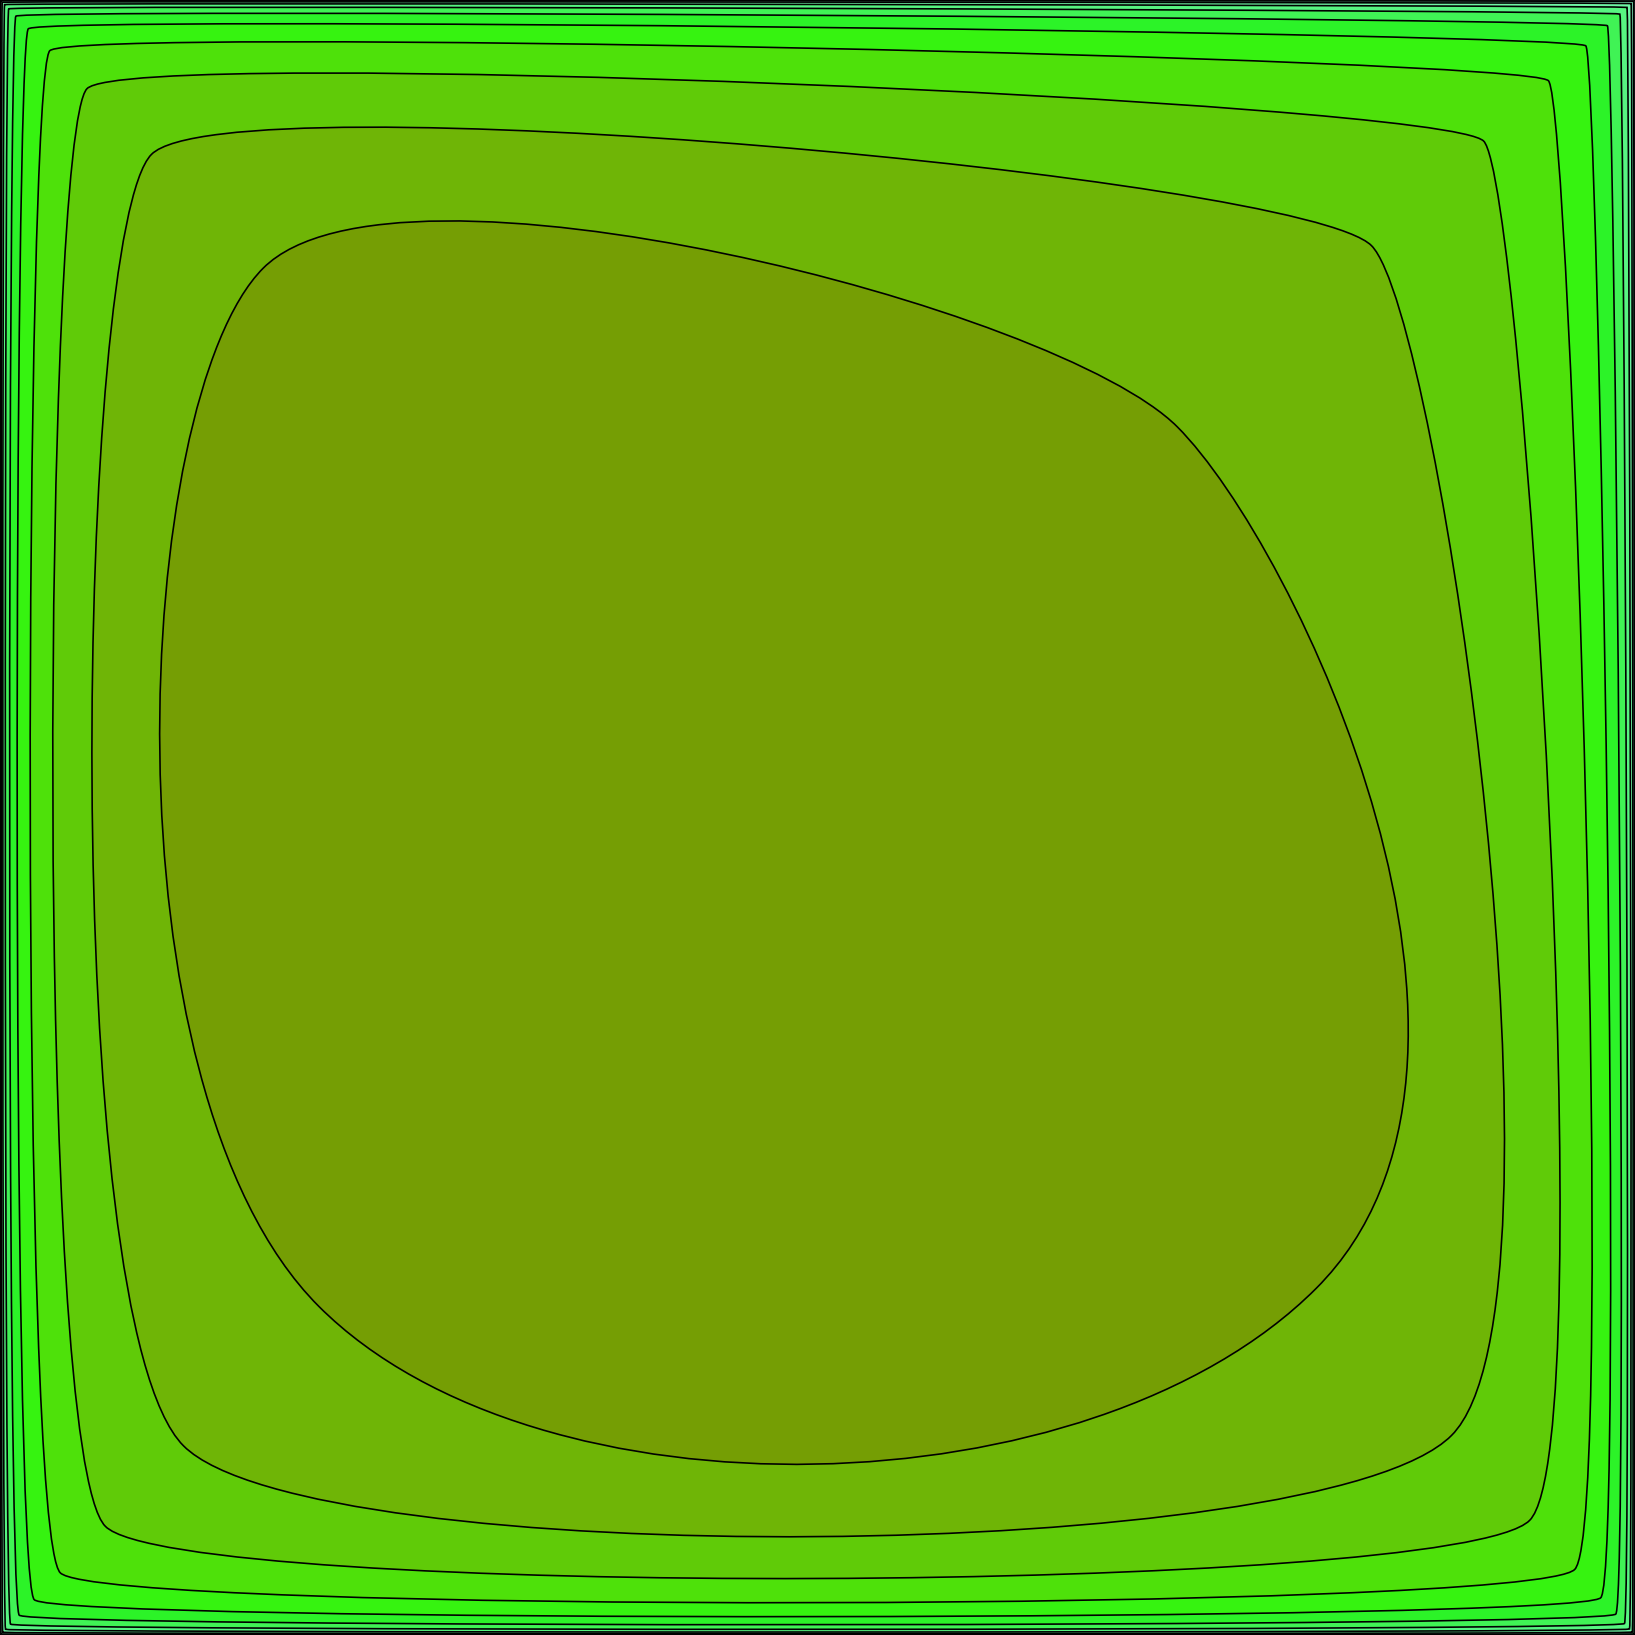

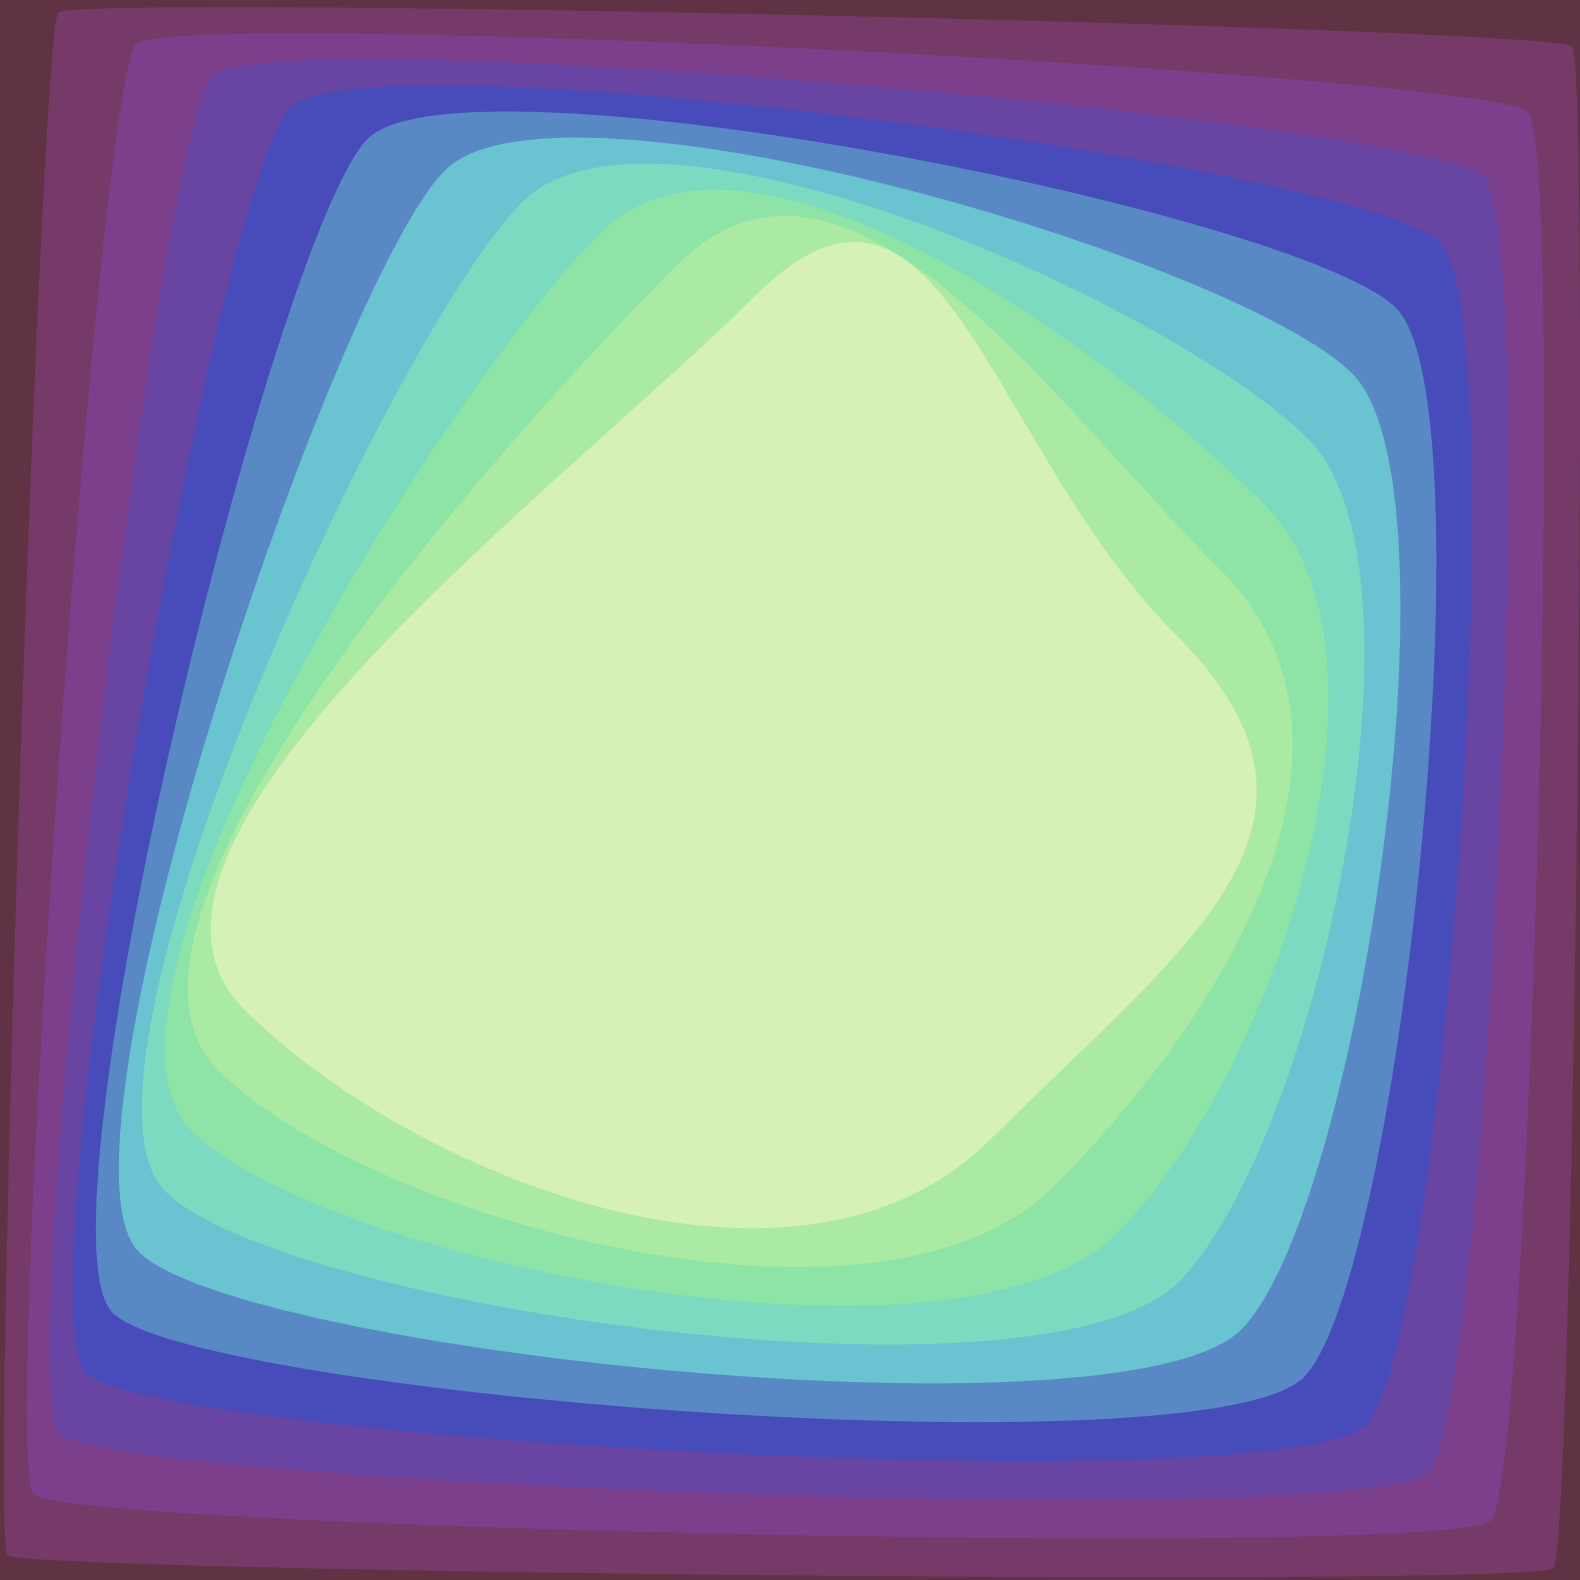

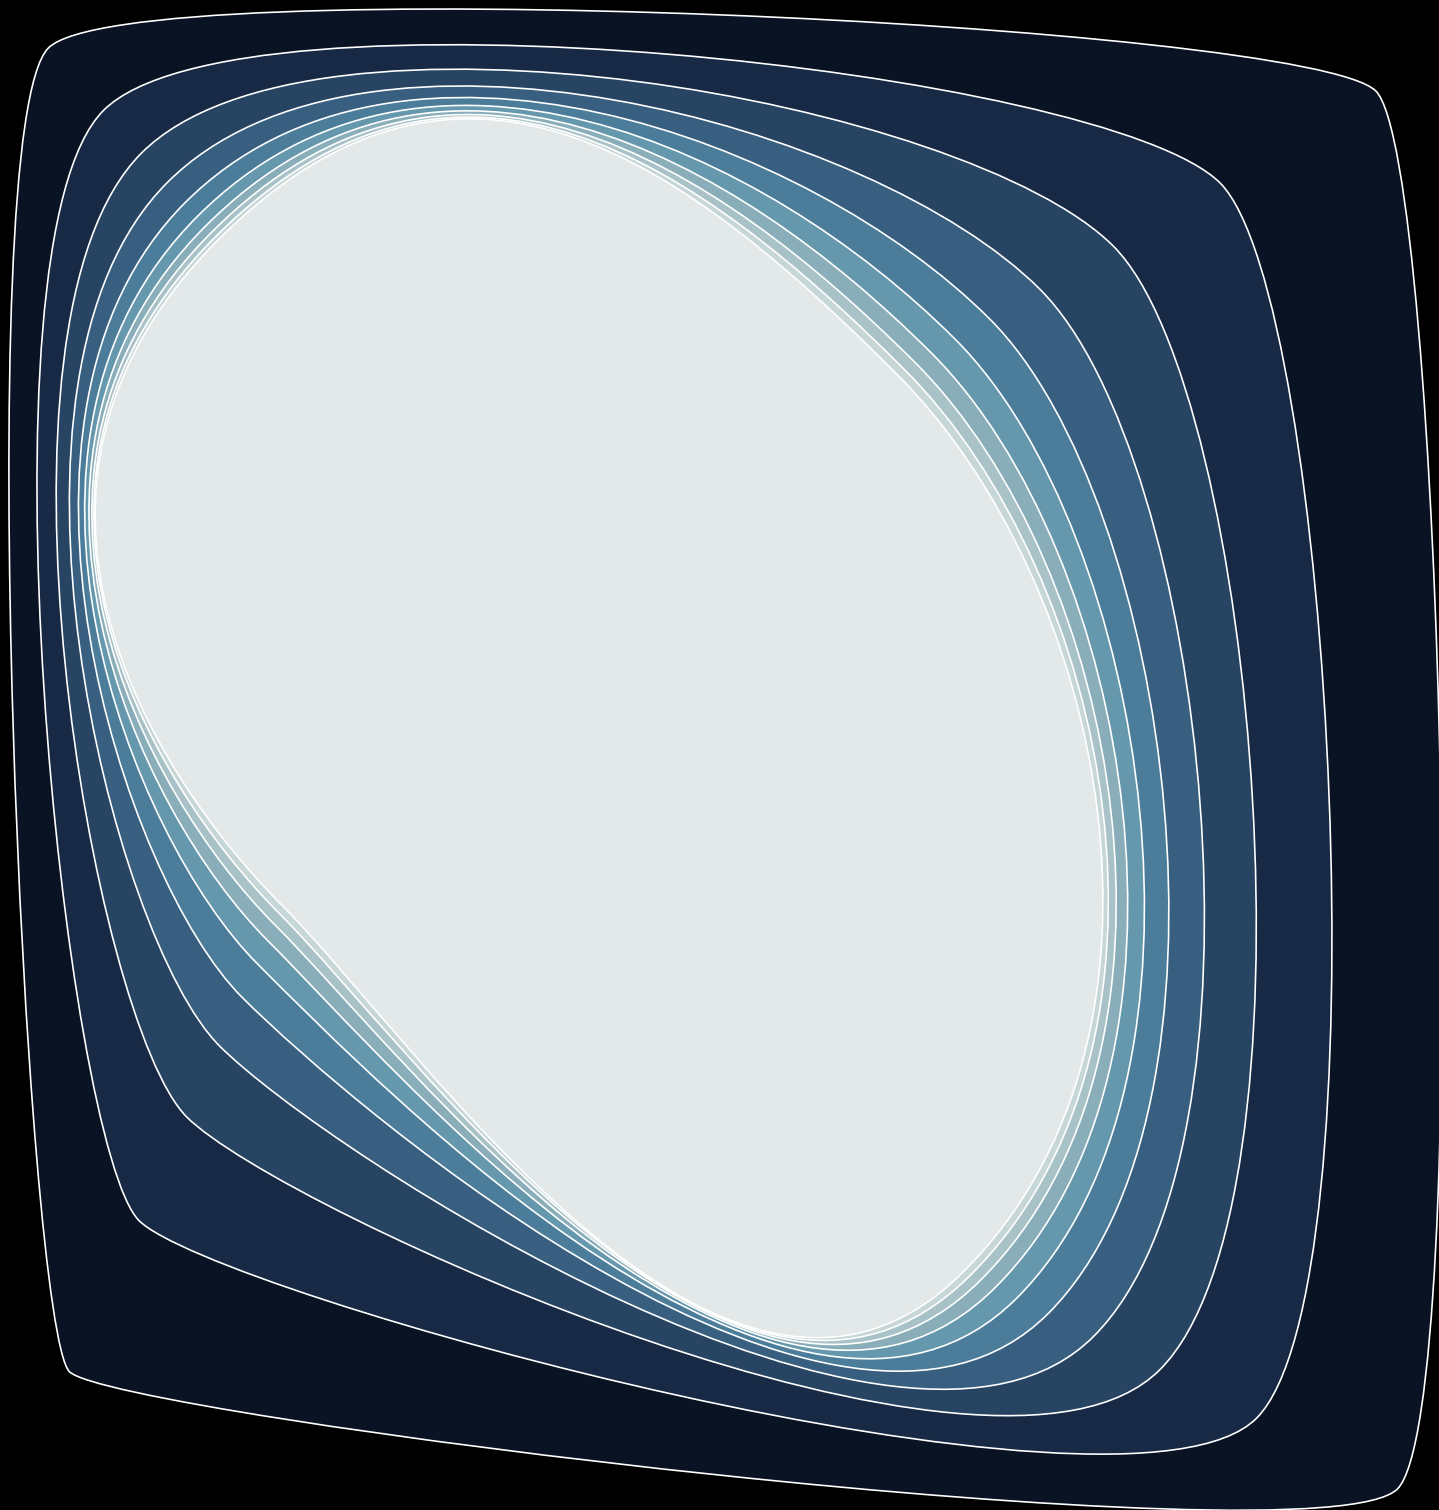

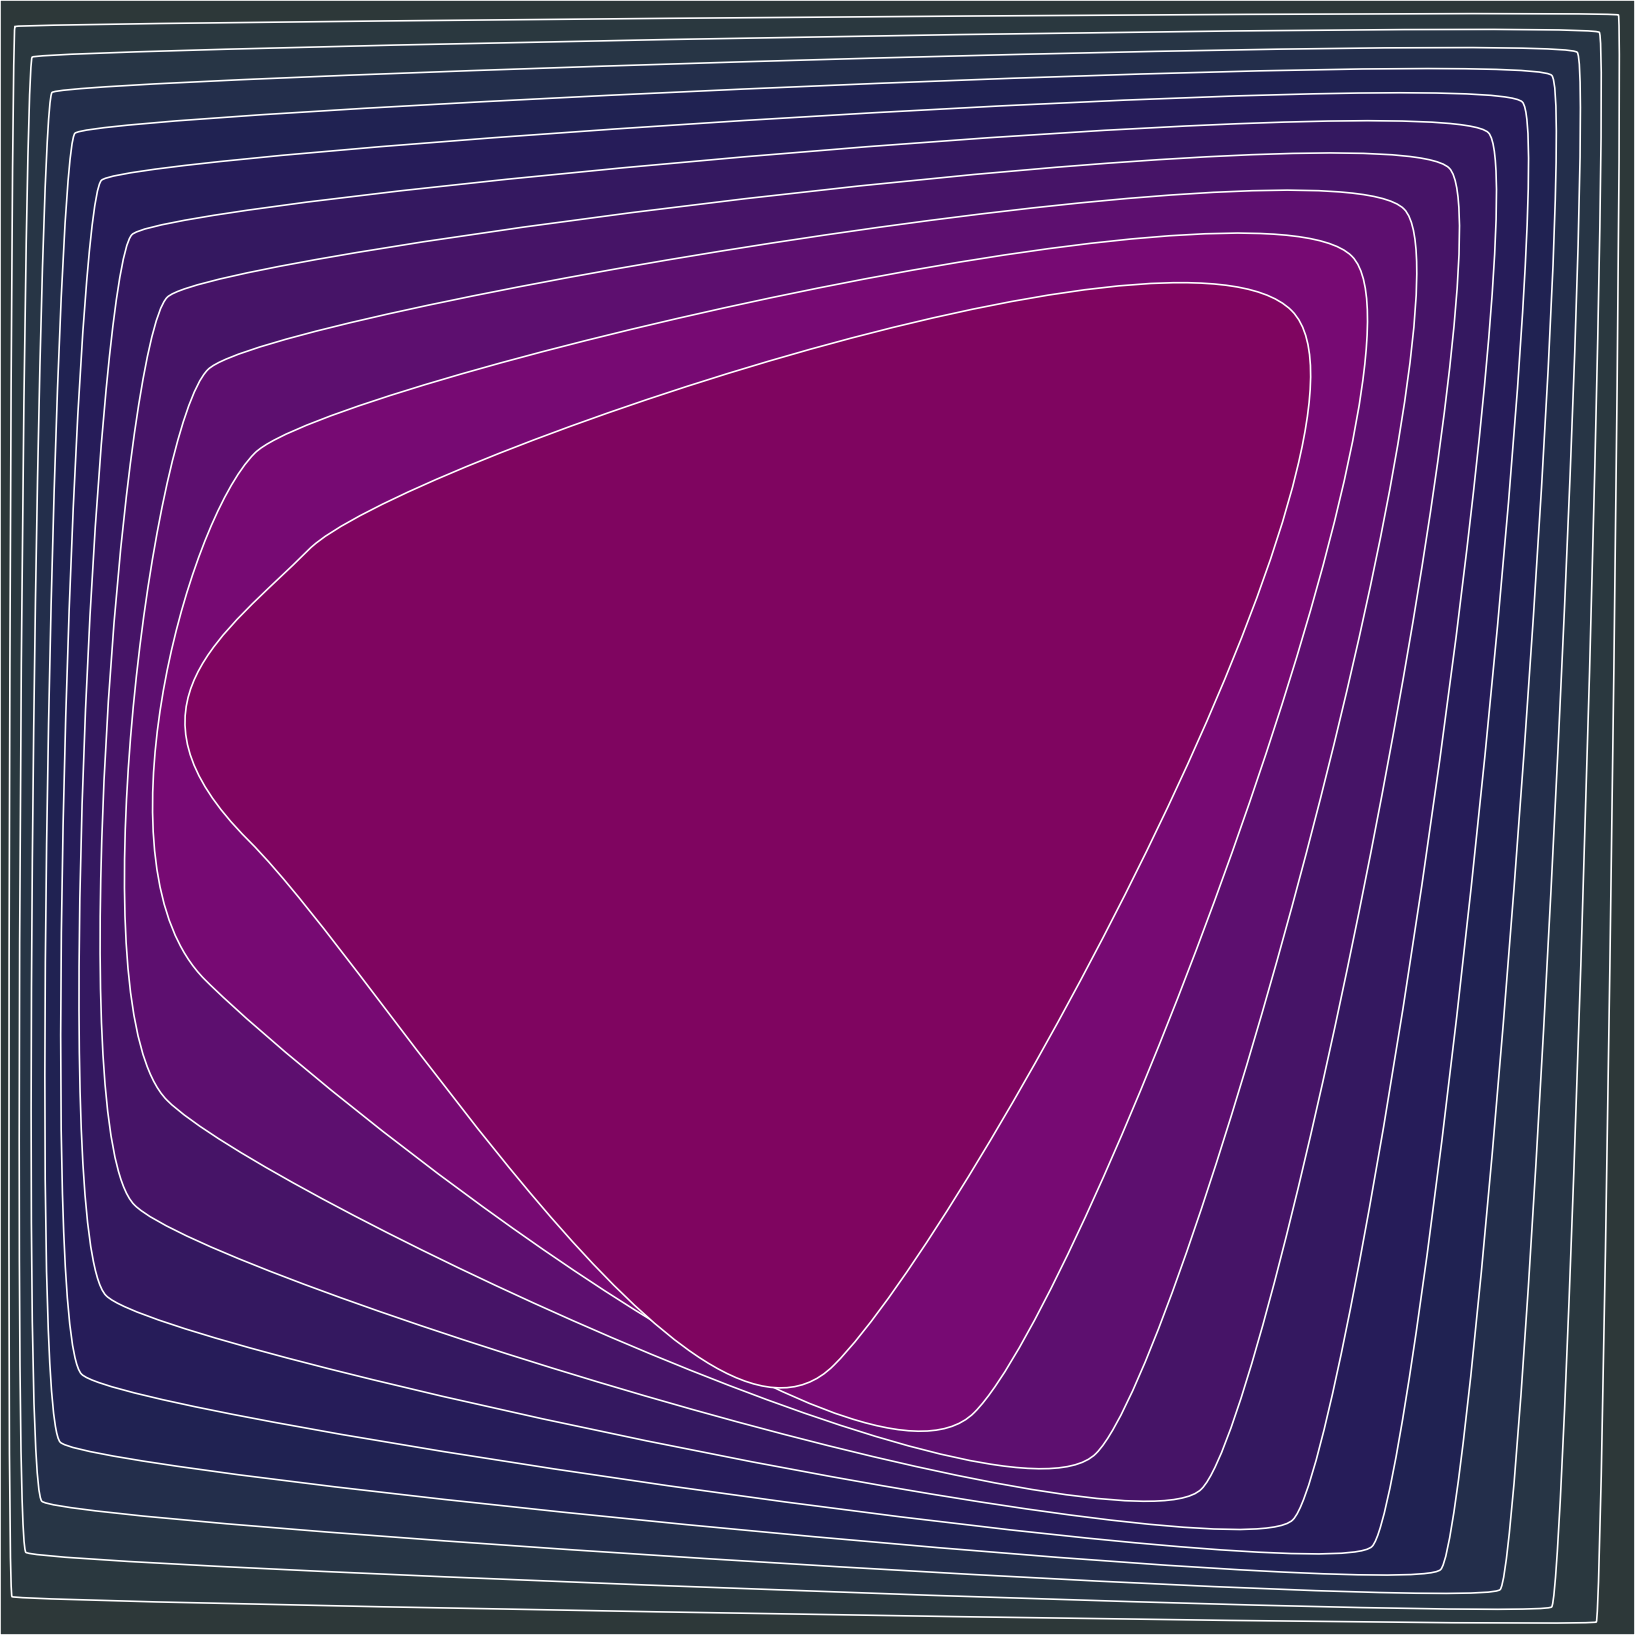

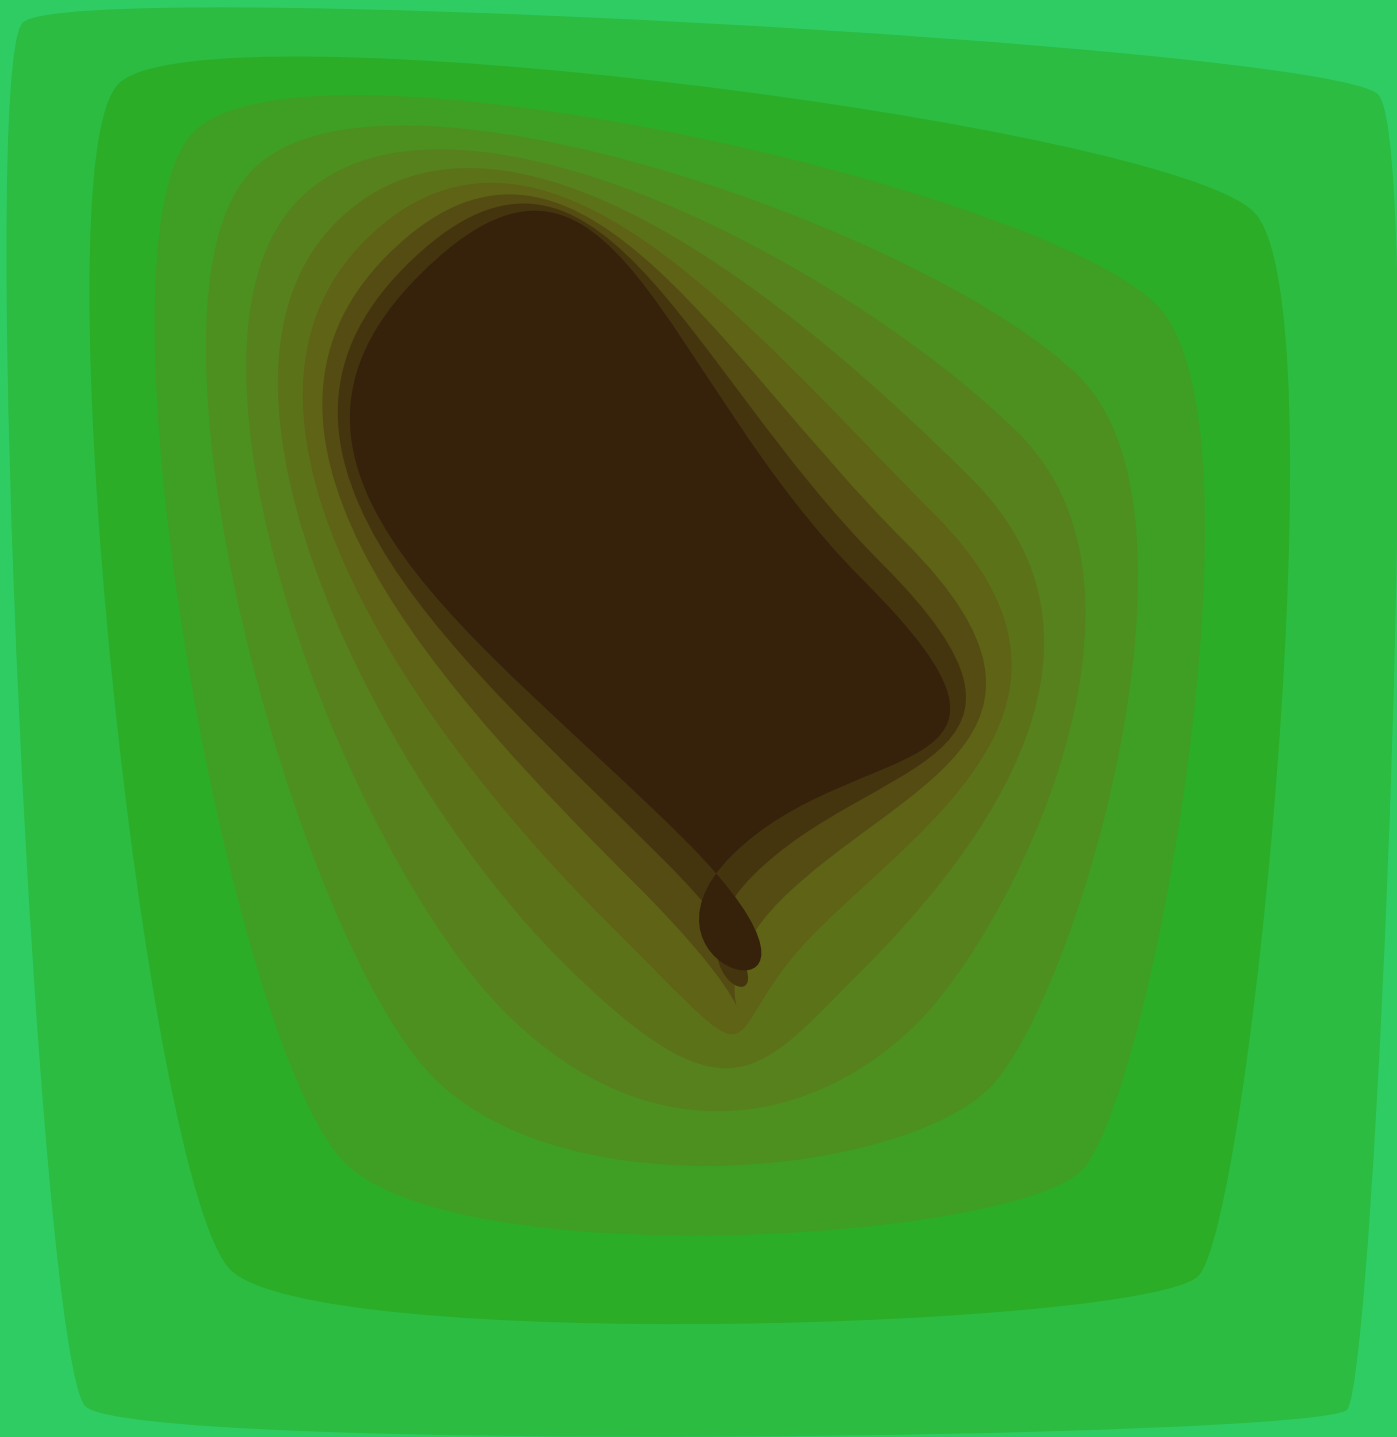

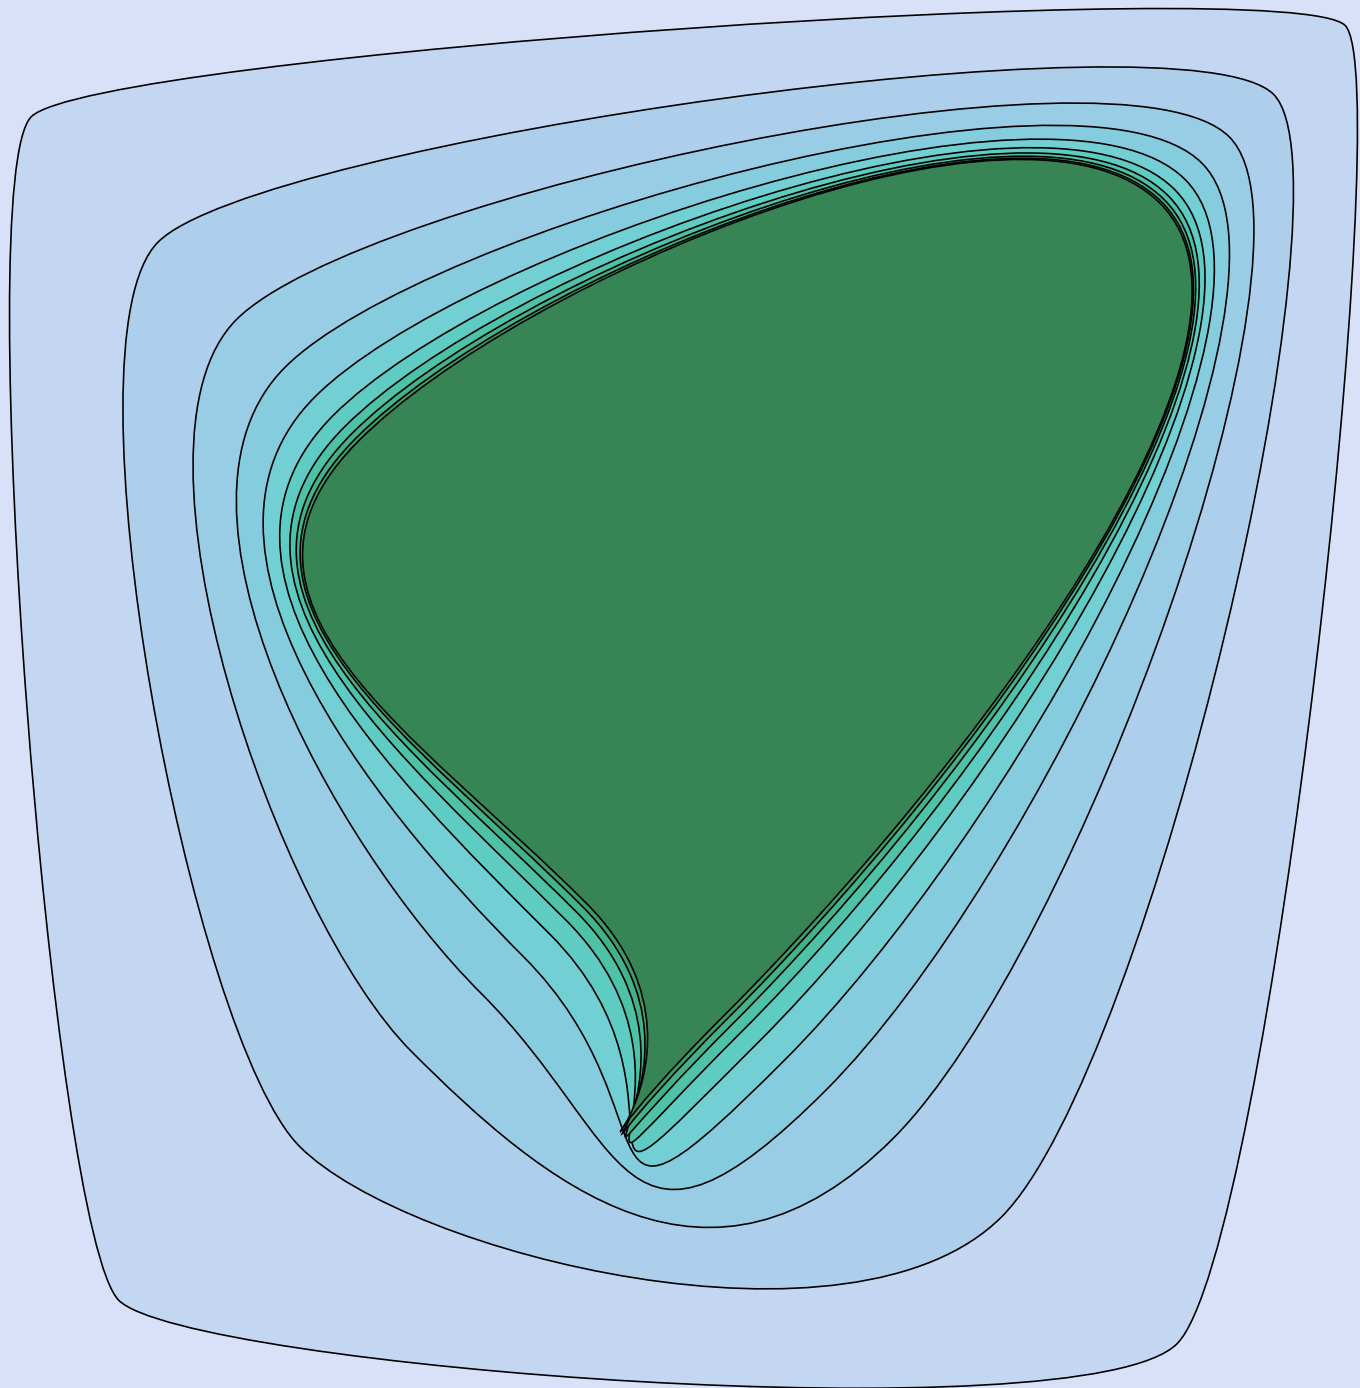

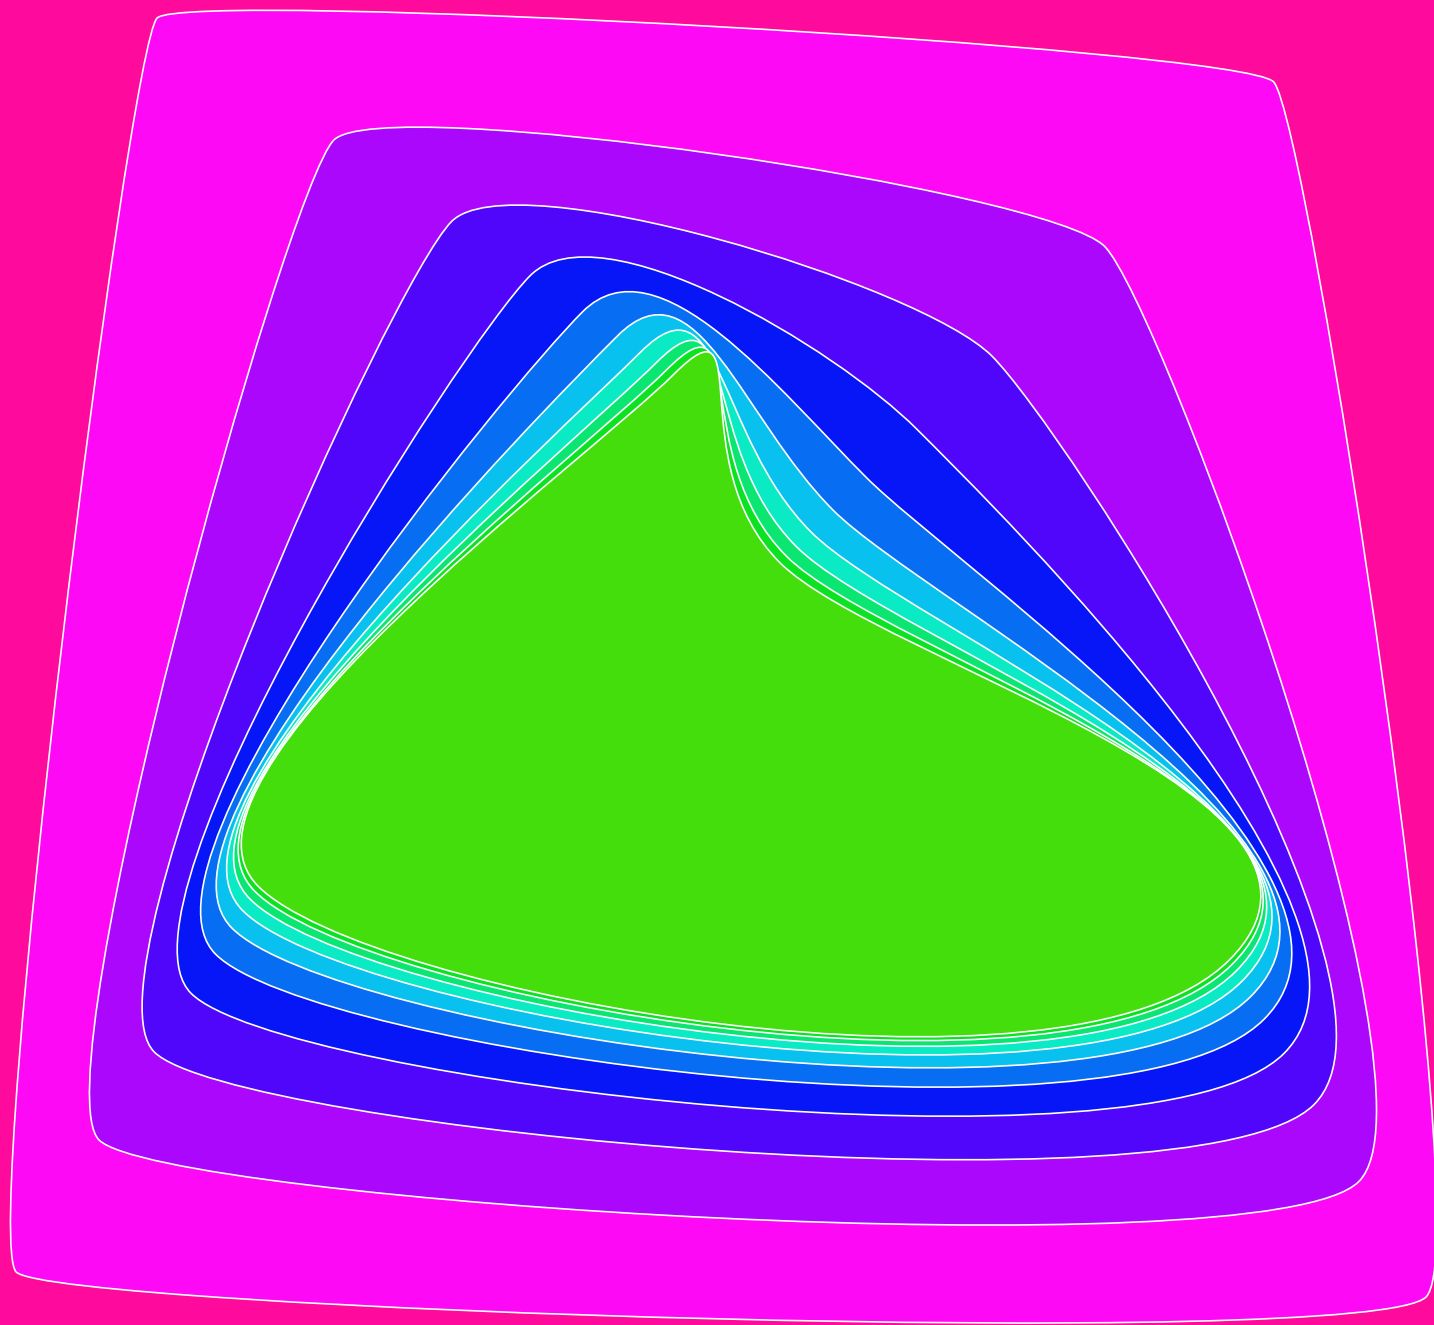

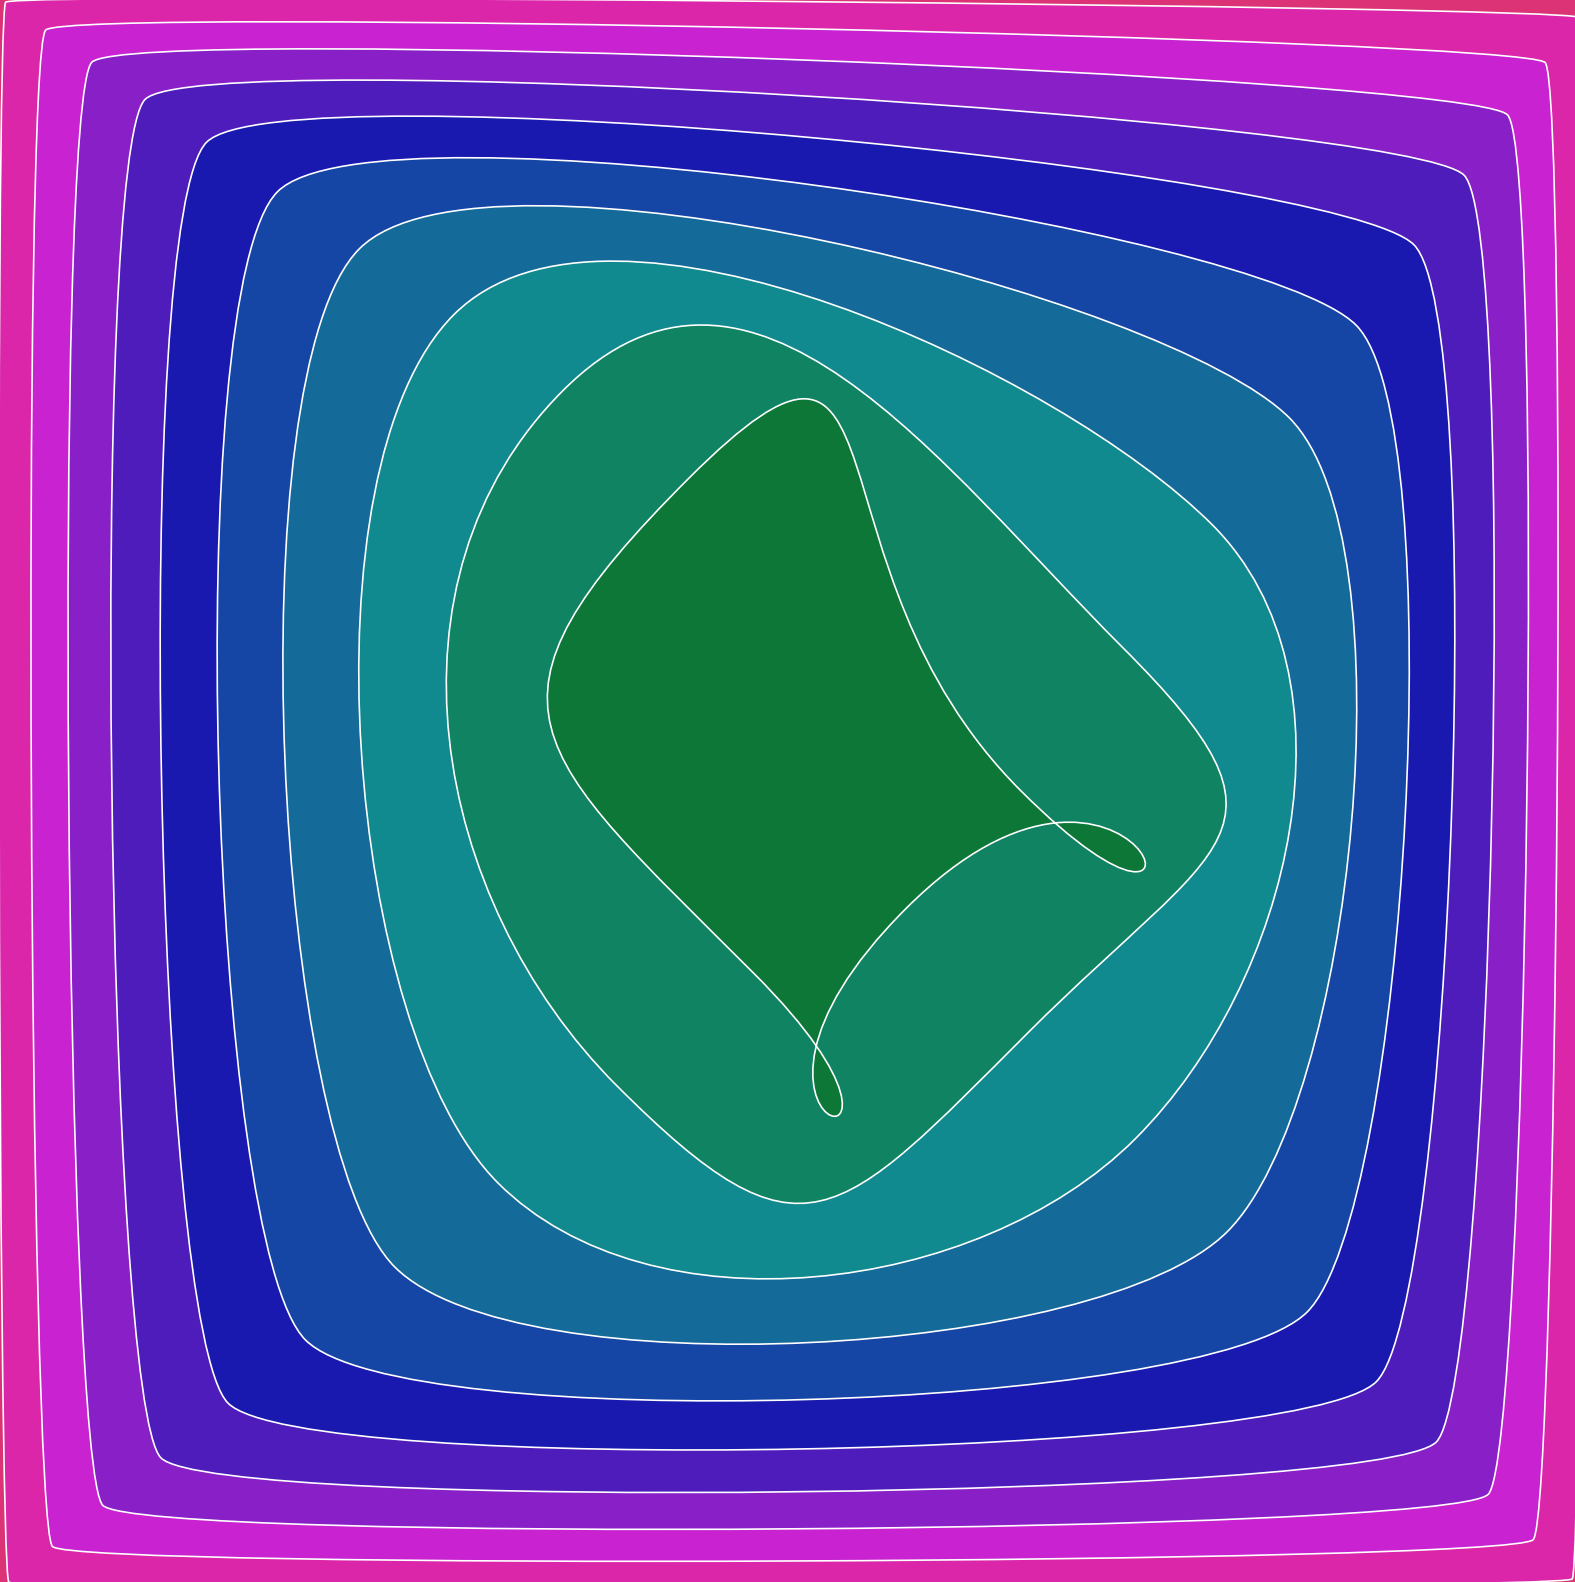

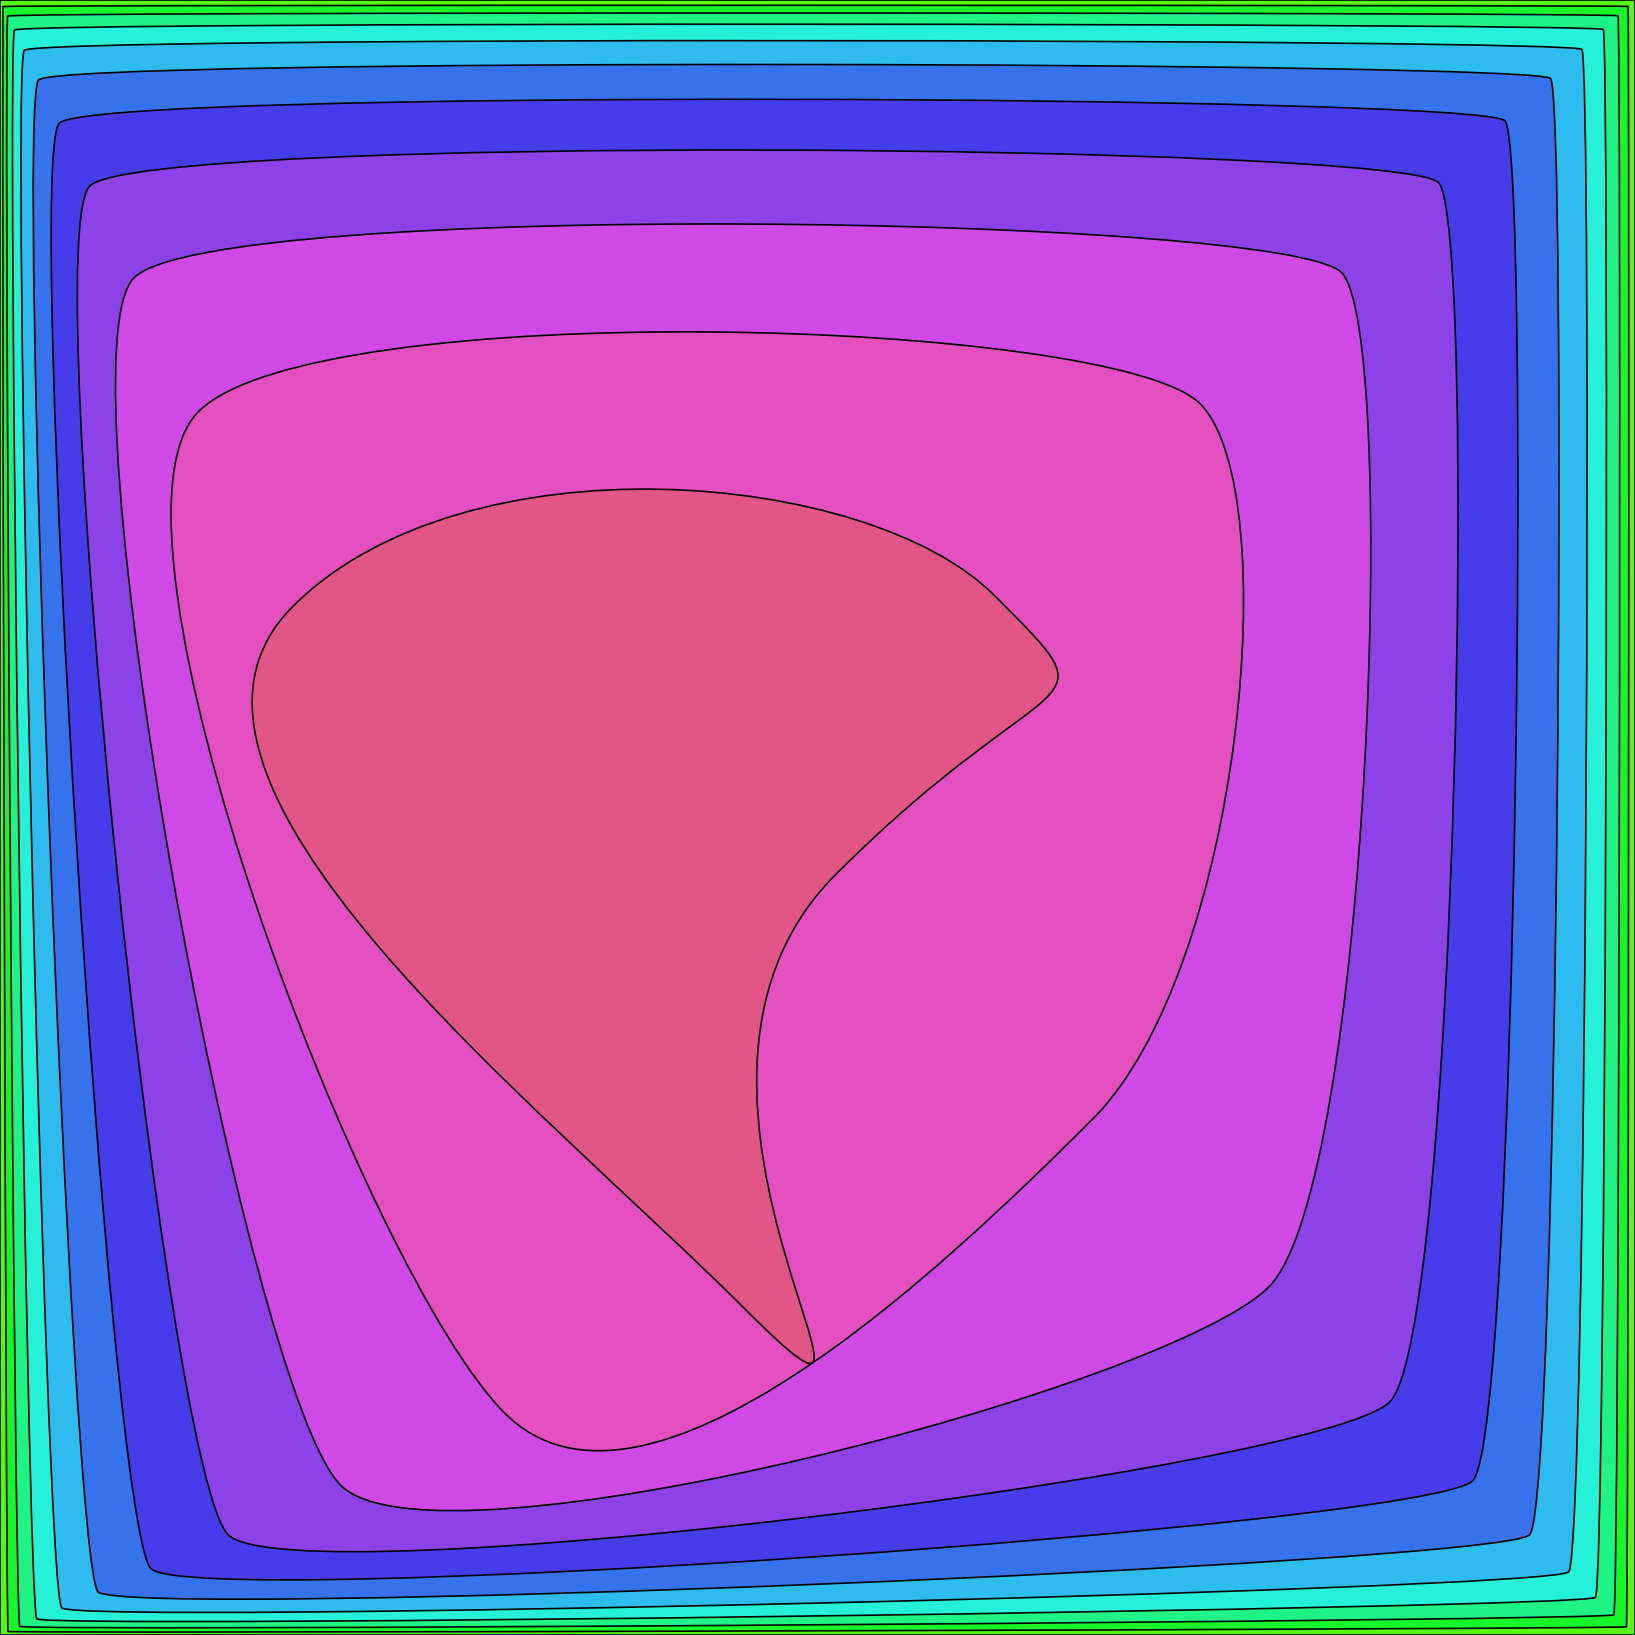

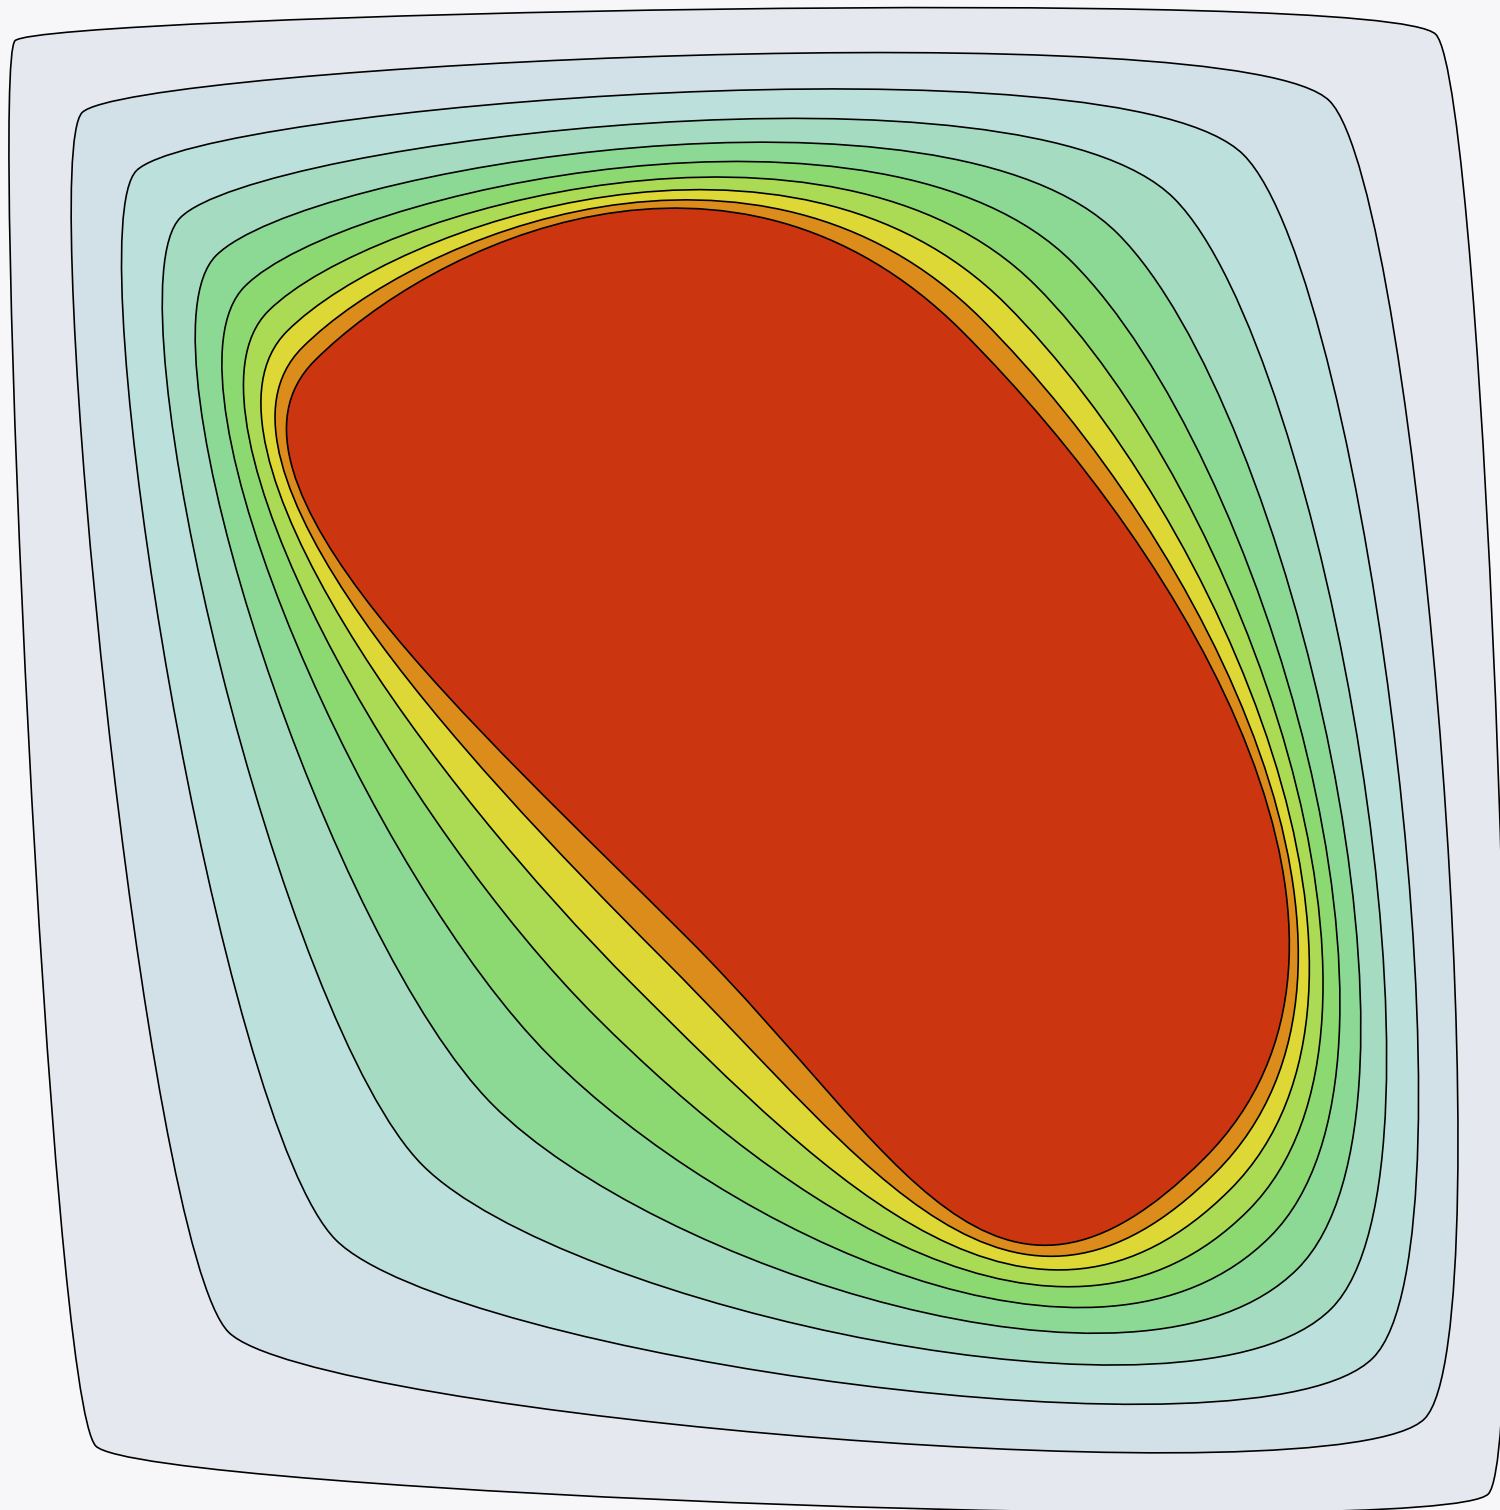

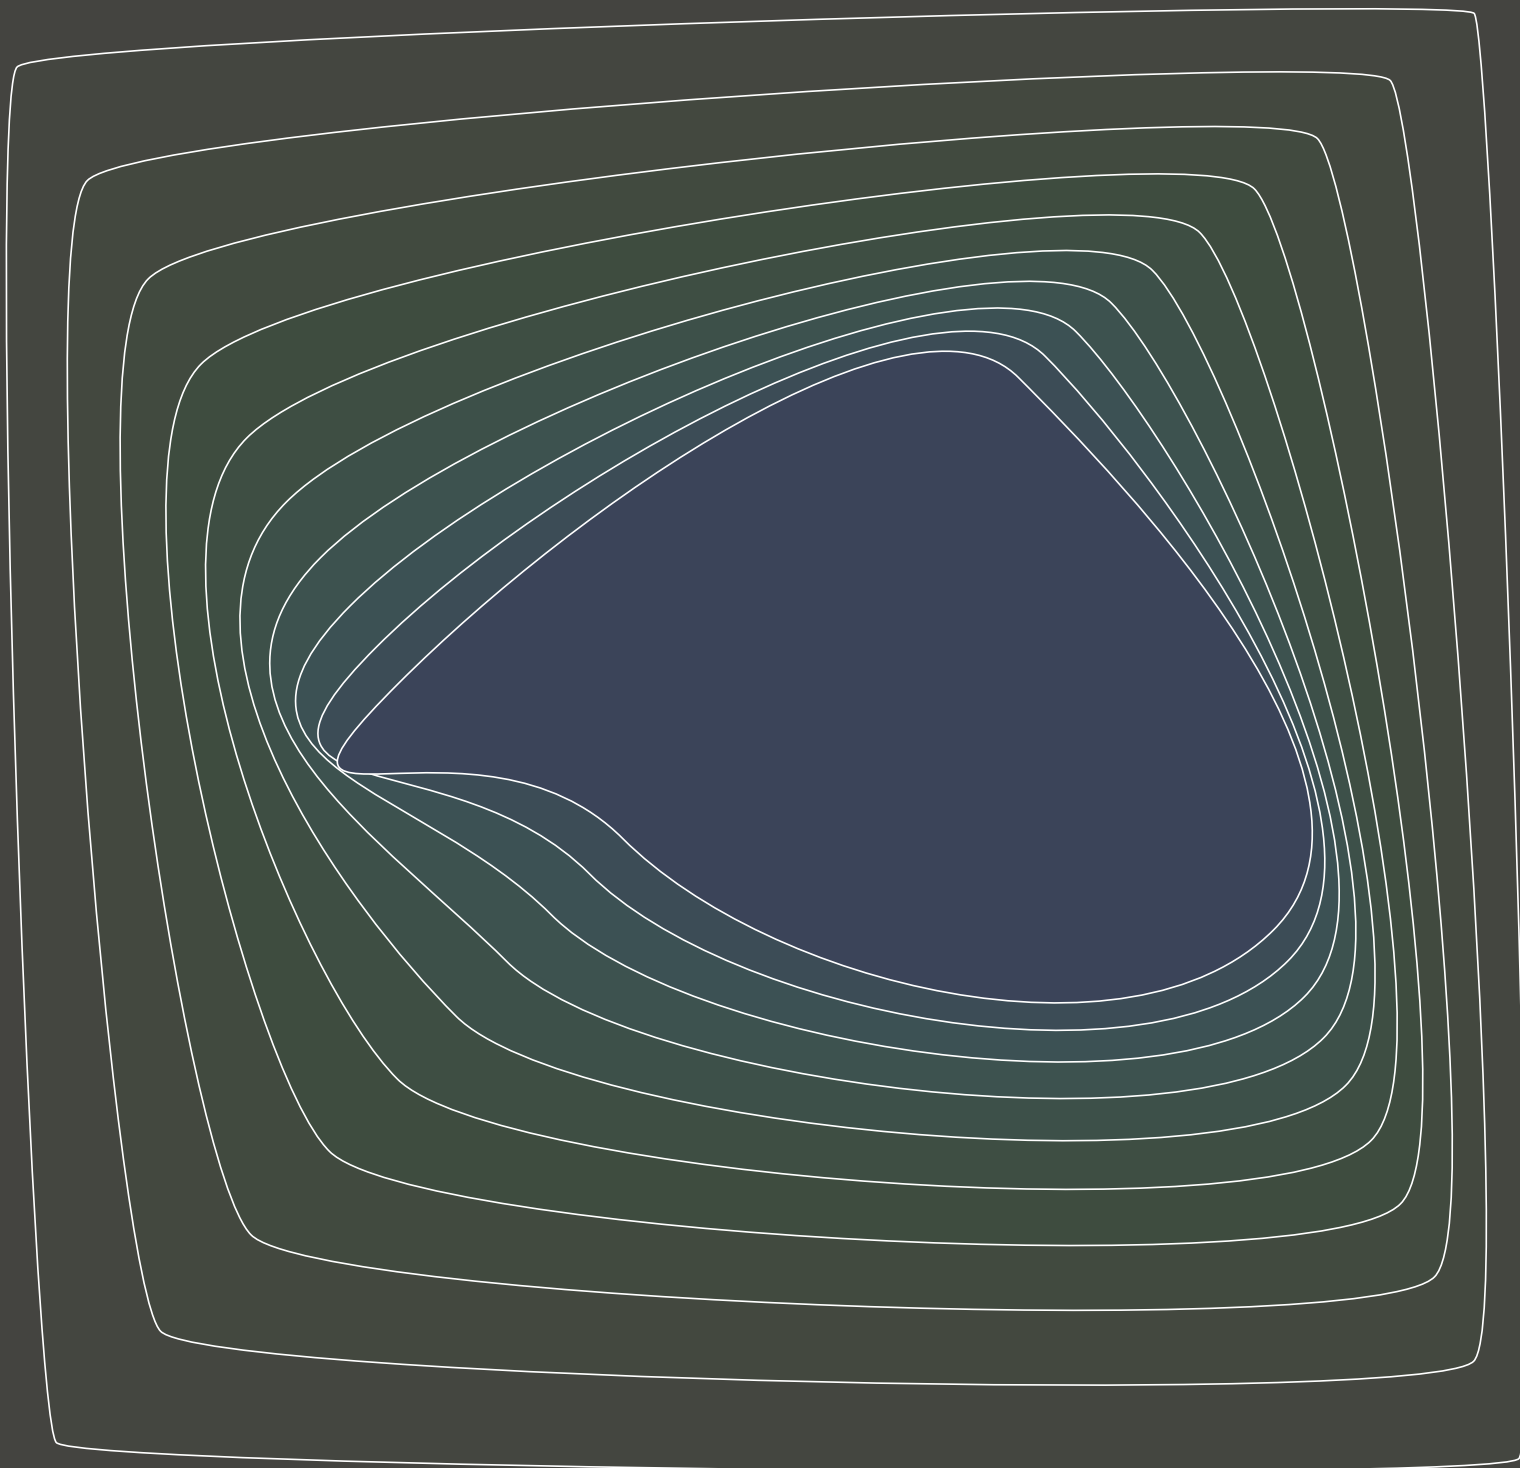

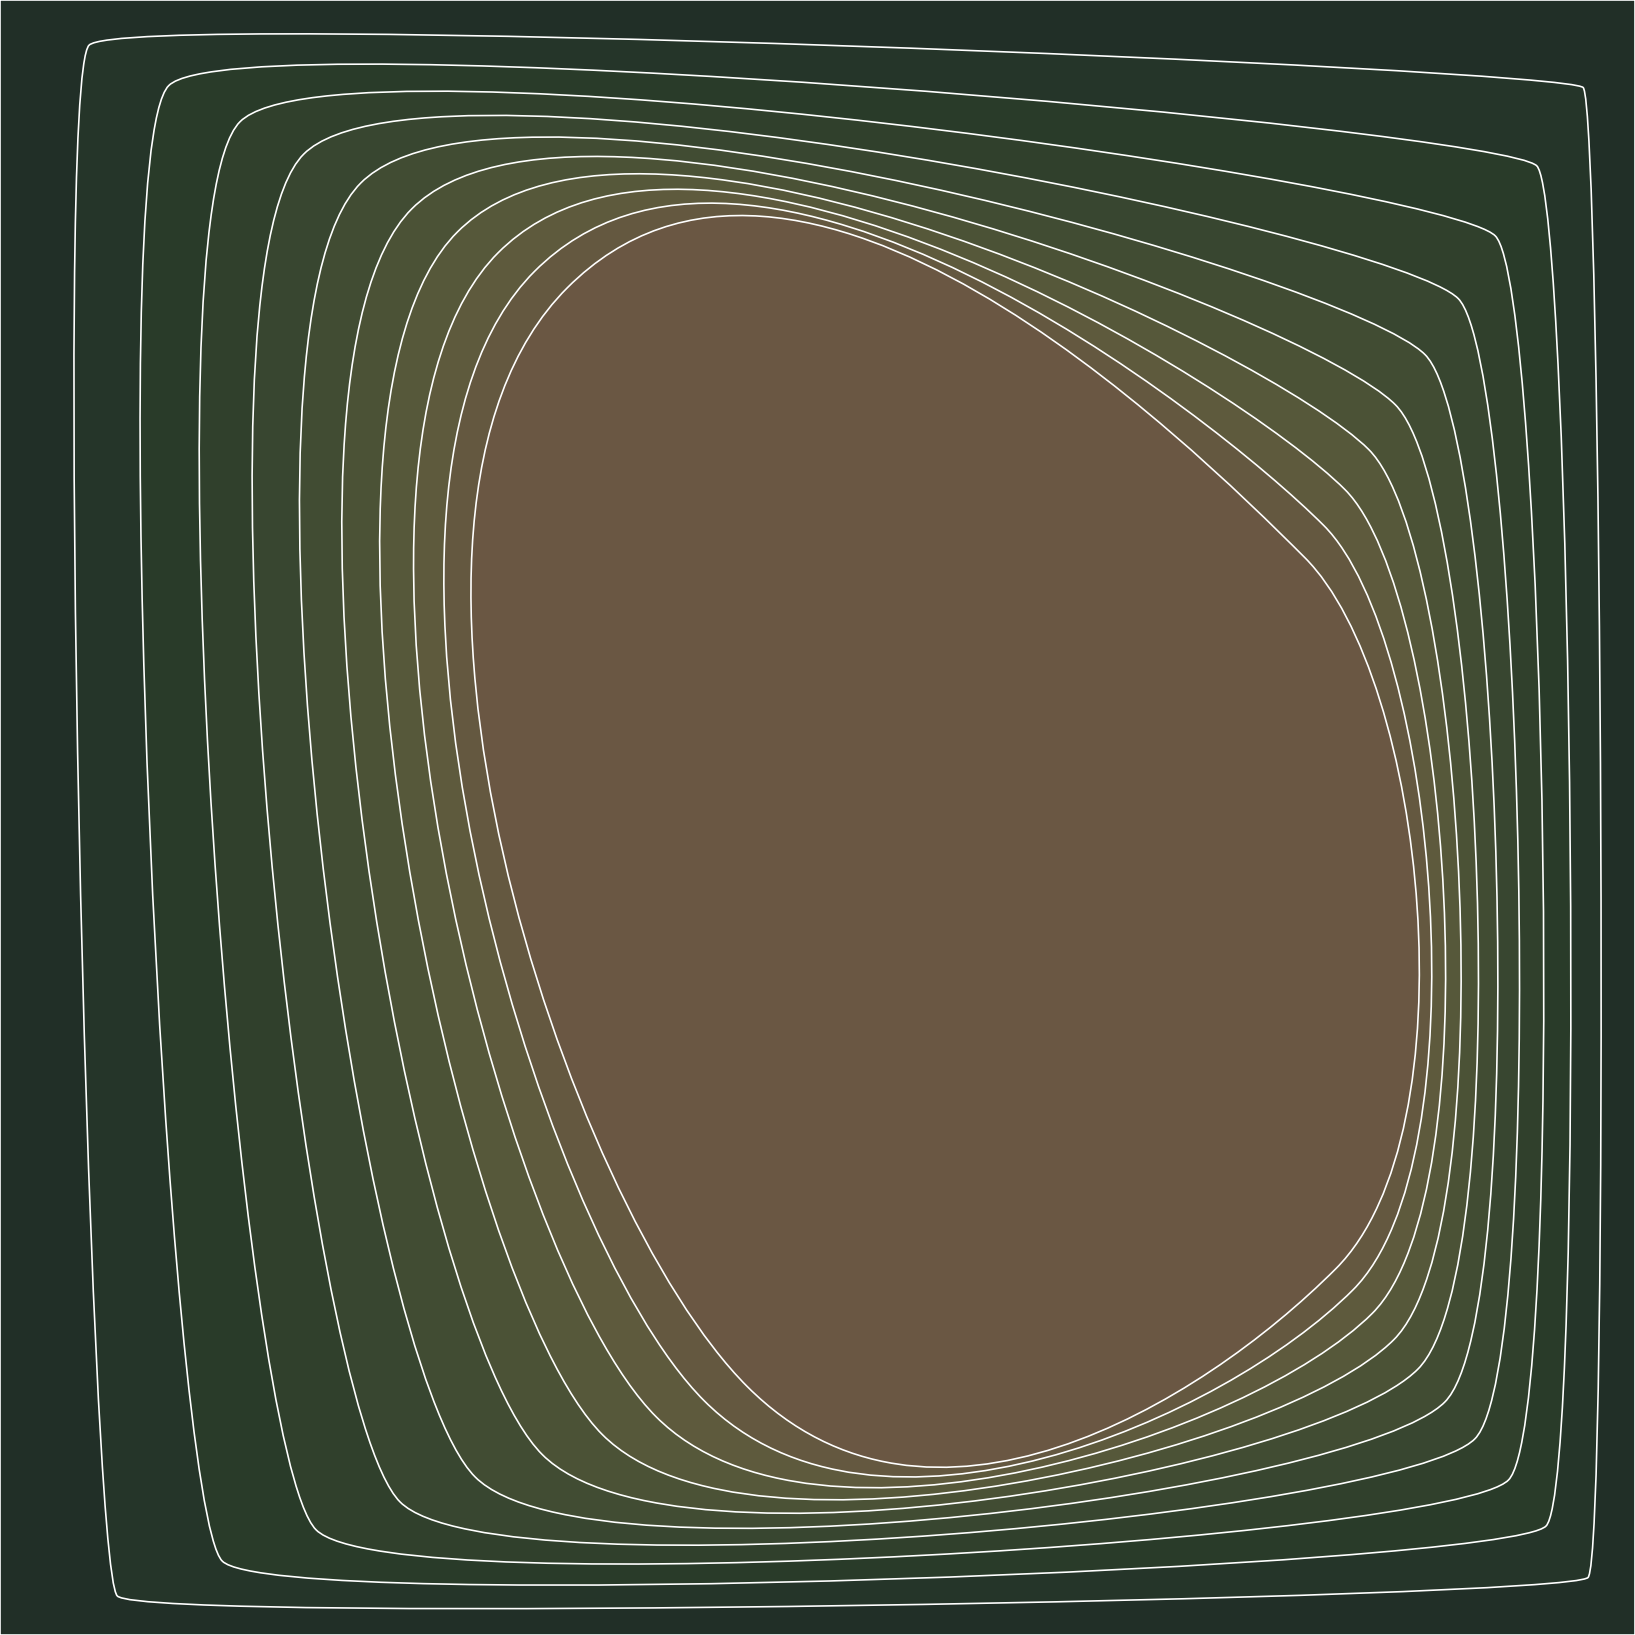

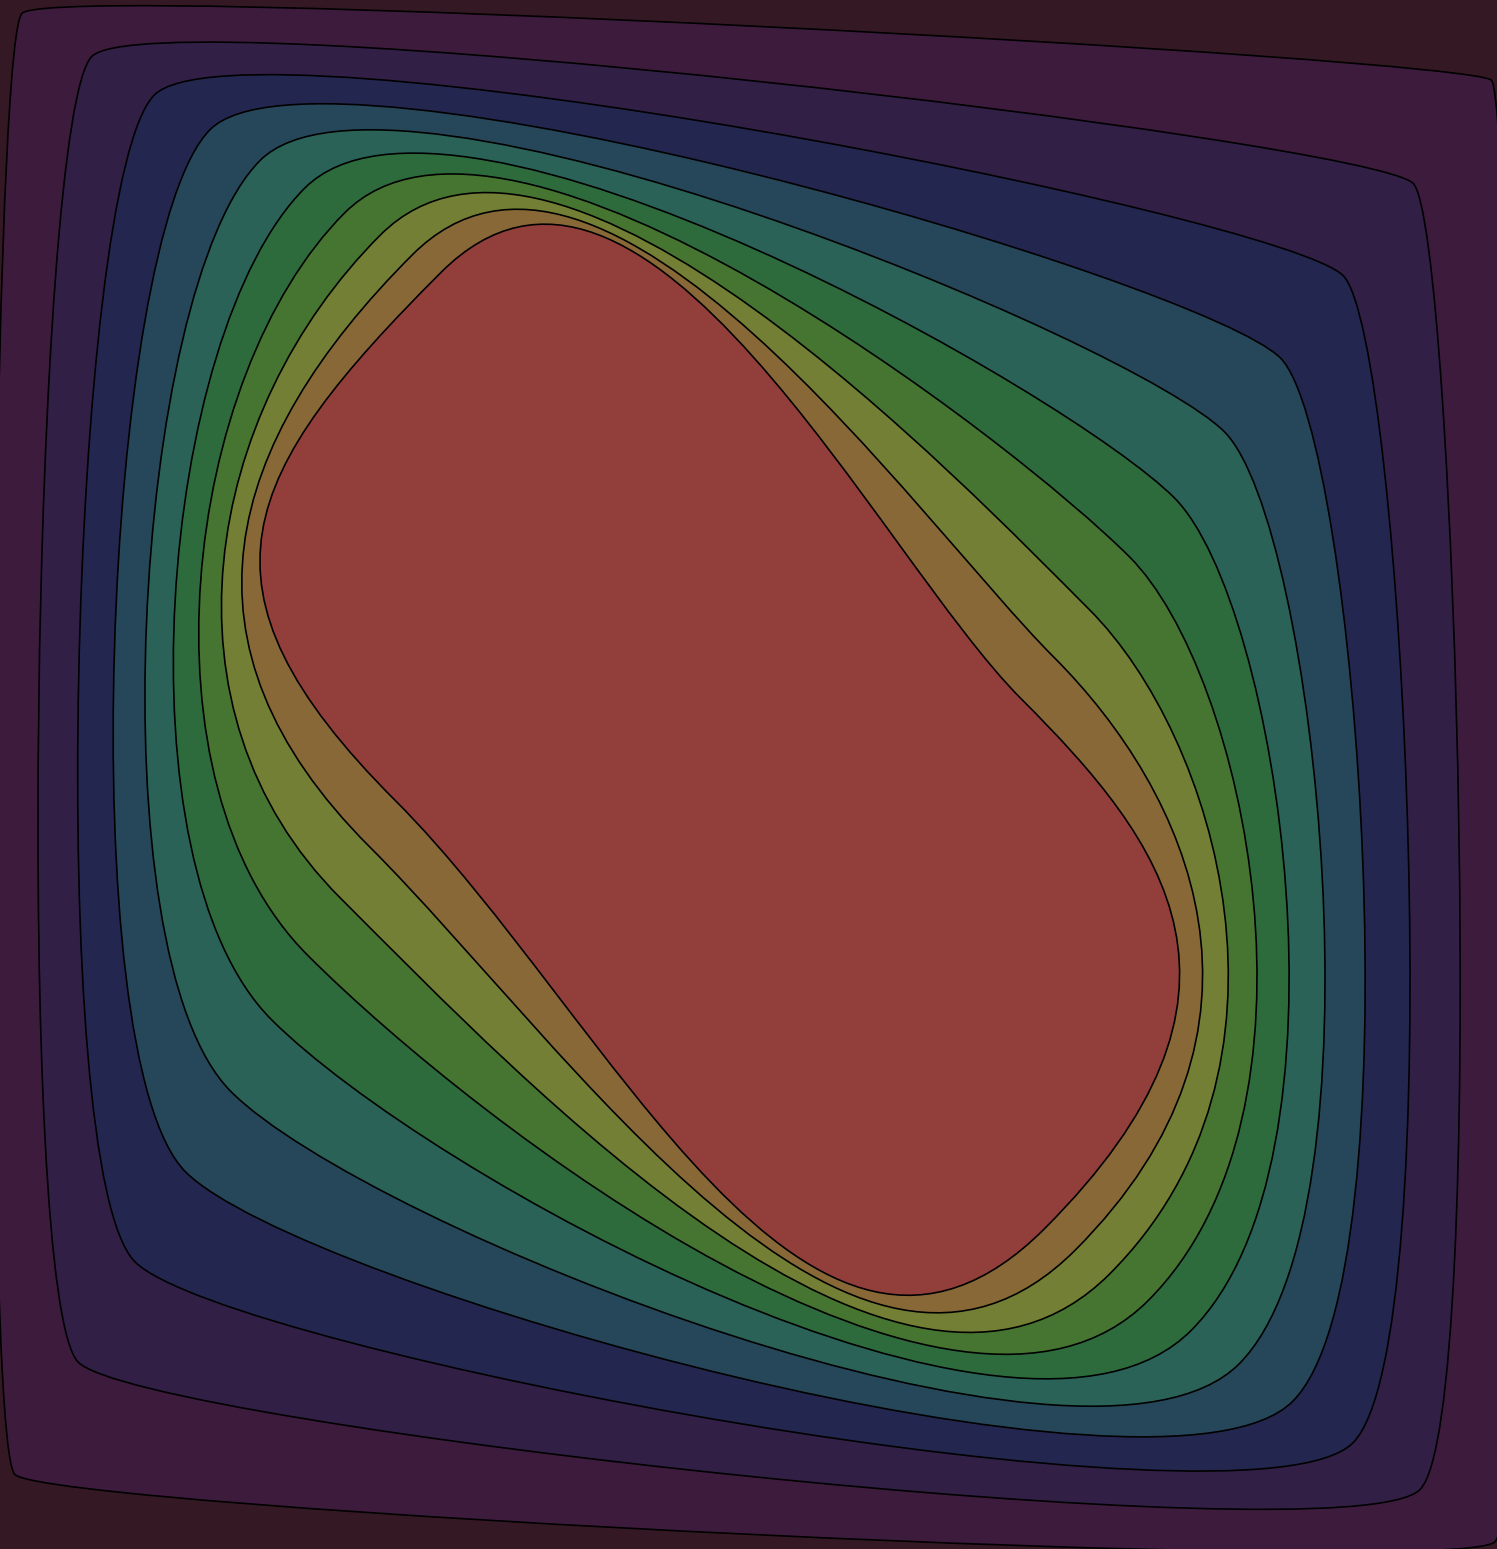

Every day my webserver generates a new book, filled with blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
